Foreword.....		v
Introduction.....		vi
1	Scope	1
2	Normative references	1
3	Terms and definitions	2
3.1	General terms.....	2
3.2	Control modes	13
3.3	Architecture channel.....	13
3.4	Forward and reverse power transfer.....	13
3.5	Minimum and maximum energy request limits	13
3.6	Source generator modes	14
4	Abbreviated terms	14
5	Requirements	15
5.1	List of requirements	15
5.2	General communication requirements	15
5.3	User-specific requirements	16
5.3.1	Reliability, availability, error handling and error reporting	16
5.3.2	Private data protection	17
5.3.3	Ease of use	17
5.4	OEM-specific requirements	17
5.5	Utility-specific requirements	18
5.5.1	Power limiting for grid control or local energy control	18
5.5.2	Current and voltage limits for EV supply equipment protection	19
5.5.3	Current and voltage limits for EV protection	19
5.5.4	Authorization of charging services	19
5.5.5	Authorization of energy transfer from the EV to the EV supply equipment	20
5.5.6	Retrofitting	20
5.6	Wireless communication requirements	20
5.6.1	General	20
5.6.2	Communication infrastructure requirements	20
5.7	RPT description	21
5.7.1	General	21
5.7.2	General information and requirements	22
5.8	Traceability requirements	22
6	Actors	23
7	Use case elements	24
7.1	General	24
7.2	Task groups	25
7.3	Task groups description	26
7.3.1	Start of communication process [A]	26
7.3.2	Plug-in and forced HLC	28
7.3.3	WA1: discovery with reservation	29
7.3.4	Plug-in with concurrent IEC 61851-1 and HLC	29
7.3.5	WA2: discovery without reservation	30
7.4	Communication set-up [B]	31
7.4.1	EVCC/SECC conductive communication set-up	31
7.4.2	WB1: EVCC/SECC wireless communication set-up	32
7.5	Certificate handling [C]	32
7.5.1	Certificate update	32
7.5.2	Certificate installation	33
7.6	Identification and authorization [D]	35
7.6.1	Overview	35

7.6.2	Authorization using contract certificates performed at the EV supply equipment.....	36
7.6.3	Authorization using contract certificates performed with the help of an SA.....	37
7.6.4	Authorization at the EV supply equipment using external credentials performed at the EV supply equipment.....	39
7.6.5	Authorization at the EV supply equipment using external credentials performed with the help of an SA.....	40
7.6.6	WD1: Authentication with prior reservation.....	41
7.7	Pairing and fine positioning.....	42
7.7.1	WP1: WPT fine positioning.....	42
7.7.2	WP2: WPT fine positioning without communication support.....	42
7.7.3	WP3: Conductive energy transfer pairing.....	43
7.7.4	WP4: WPT pairing.....	44
7.8	Target setting and energy transfer scheduling [E].....	45
7.8.1	AC charging with load levelling based on HLC.....	45
7.8.2	WE1: WPT target setting and charge scheduling.....	46
7.8.3	Optimized charging with scheduling from secondary actors.....	46
7.8.4	DC charging with load levelling based on HLC.....	48
7.8.5	Resume to authorized charging schedule.....	49
7.8.6	Reverse power transfer with load levelling based on HLC.....	50
7.8.7	Reverse power transfer on stand-alone operation.....	51
7.8.8	Fast responding energy transfer services based on dynamic control mode.....	52
7.8.9	Managed bidirectional power transfer into the grid and/or into the home.....	54
7.9	Energy transfer controlling and re-scheduling [F].....	56
7.9.1	Energy transfer loop.....	56
7.9.2	Energy transfer loop with metering information exchange.....	57
7.9.3	WF1: WPT charging loop.....	58
7.9.4	Energy transfer loop with interrupt from the SECC.....	59
7.9.5	Energy transfer loop with interrupt from the EVCC or USER.....	59
7.9.6	Energy transfer control based on dynamic control mode.....	60
7.10	Value-added services [G].....	62
7.10.1	Value-added services.....	62
7.10.2	WG1: ACD system status check.....	63
7.10.3	Energy transfer details.....	64
7.11	End of energy transfer process [H].....	64
7.11.1	General.....	64
7.11.2	End of energy transfer process.....	65
7.12	WPT end of charge WH1.....	66
7.12.1	General.....	66
7.12.2	WPT end of charge WH1.....	66
7.13	ACD connect/disconnect WI.....	68
7.13.1	ACD connect/disconnect WI.....	68
Annex A (informative) Conductive charging infrastructure architecture.....		69
Annex B (informative) Security.....		82
Annex C (informative) Examples of charging scenarios derived from the use case elements.....		88
Annex D (informative) Typical RPT system.....		106
Annex E (normative) Requirement list.....		108
Bibliography.....		116
