<i>Preface</i>	xiii
<i>Acknowledgements</i>	xvii
<i>Author Biographies</i>	xix
<i>Glossary</i>	xxi
 STAGE I	
Setting out	I
 1 Context	3
<i>Overview</i> 3	
<i>Prelude</i> 3	
<i>Timeline</i> 5	
<i>Past</i> 5	
<i>Present</i> 7	
<i>Future</i> 9	
<i>Definitions</i> 11	
<i>Taxonomies</i> 14	
<i>Classical taxonomies</i> 14	
<i>Contemporary taxonomies</i> 17	
<i>Driving automation taxonomies</i> 21	
<i>The human factor</i> 27	
<i>Key points</i> 28	
 2 Promises, promises...	31
<i>Overview</i> 31	
<i>Introduction</i> 31	
<i>Lessons learned from aviation</i> 33	
<i>Automotive accidents of automation</i> 39	
<i>Collision between a Tesla Model S and a lorry, Williston, Florida, 7 May 2016 (NTSB, 2017)</i> 40	

<i>Collision between Uber's developmental automated vehicle and a pedestrian, Tempe, Arizona, 18 March 2018 (NTSB, 2019b)</i>	41
<i>Collision between a Tesla Model X and a crash attenuator, Mountain View, California, 23 March 2018 (NTSB, 2020)</i>	42
<i>Lessons learned</i>	43
<i>Problems and ironies</i>	43
<i>Vigilance</i>	47
<i>Trust</i>	48
<i>Complacency</i>	49
<i>Behavioural adaptation</i>	50
<i>Situation awareness</i>	53
<i>Mental workload</i>	55
<i>Conclusions</i>	57
<i>Key points</i>	58
3 Pay attention	61
<i>Overview</i>	61
<i>Introduction</i>	61
<i>Mental workload revisited</i>	62
<i>Attention</i>	63
<i>Automaticity</i>	65
<i>The 'problem' of underload</i>	69
<i>Malleable attentional resources theory (MART)</i>	73
<i>Key points</i>	77
STAGE 2	
Taking the load off	79
4 How low is too low?	81
<i>Overview</i>	81
<i>Introduction</i>	81
<i>General methodology</i>	82
<i>Driving performance data</i>	84
<i>Mental workload data</i>	85
<i>Attention data</i>	89
<i>Method – the present study</i>	91
<i>Design</i>	91
<i>Procedure</i>	92

<i>Results</i>	93
<i>Driving performance data</i>	93
<i>Mental workload data</i>	93
<i>Attention ratio data</i>	94
<i>Discussion</i>	97
<i>Implications: mental workload and performance</i>	97
<i>Implications: malleable attentional resources theory</i>	98
<i>Conclusions</i>	101
<i>Key points</i>	102
5 When is ACC not ACC?	103
<i>Overview</i>	103
<i>Introduction</i>	103
<i>Experiment 1: straight roads</i>	106
<i>Method</i>	106
<i>Results</i>	107
<i>Discussion</i>	108
<i>Experiment 2: variable-speed lead vehicle</i>	110
<i>Method</i>	110
<i>Results</i>	110
<i>Discussion</i>	111
<i>General discussion</i>	113
<i>Summary of results</i>	113
<i>Implications: mental workload and adaptive cruise control</i>	114
<i>Conclusions</i>	114
<i>Key points</i>	115
6 What's skill got to do with it?	117
<i>Overview</i>	117
<i>Introduction</i>	117
<i>Method</i>	121
<i>Design</i>	121
<i>Procedure</i>	121
<i>Results</i>	122
<i>Driving performance data</i>	122
<i>Mental workload data</i>	124
<i>Attention ratio data</i>	124
<i>Discussion</i>	126
<i>Implications: mental workload and performance</i>	126
<i>Implications: malleable attentional resources theory and skill</i>	126

<i>Conclusions</i>	128
<i>Key points</i>	129
7 I thought you were driving!	131
<i>Overview</i>	131
<i>Introduction</i>	131
<i>Responses to automation failure</i>	132
<i>Reaction times to automation failure</i>	134
<i>The experiment</i>	136
<i>Method</i>	138
<i>Design</i>	138
<i>Procedure</i>	141
<i>Results</i>	142
<i>Reaction frequencies</i>	142
<i>Reaction time data</i>	143
<i>Physiological arousal</i>	144
<i>Subjective mental workload</i>	145
<i>Discussion</i>	147
<i>Implications: malleable attentional resources theory and automaticity</i>	147
<i>Implications: automation and driver skill</i>	151
<i>Brake reaction times</i>	152
<i>Conclusions</i>	153
<i>Key points</i>	155
STAGE 3	
Human-centred automation	157
8 What can automation do for us?	159
<i>Overview</i>	159
<i>Introduction</i>	159
<i>Transient impairment: distraction</i>	160
<i>In-car distractors</i>	161
<i>External distractors</i>	165
<i>Automation-related distractors</i>	166
<i>Perceptual impairment: eyesight</i>	167
<i>Cognitive impairment: ageing</i>	170
<i>Automation lends a hand</i>	174
<i>Key points</i>	179

9 How do we get along?	181
<i>Overview</i> 181	
<i>Introduction</i> 181	
<i>In-vehicle interface design</i> 182	
<i>Ecological interface design</i> 185	
<i>EID for eco-driving</i> 186	
<i>Development of the Foot-LITE EID</i> 187	
<i>Evaluation</i> 190	
<i>Adaptive interfaces</i> 192	
<i>Adaptive automation</i> 196	
<i>Driver monitoring</i> 198	
<i>Conclusions</i> 200	
<i>Key points</i> 201	
 STAGE 4	
Letting George do it	203
 10 An autopian future?	205
<i>Overview</i> 205	
<i>Introduction</i> 205	
<i>What was the problem with automation again?</i> 206	
<i>How to design an automated driving system</i>	
<i>(from a human factors perspective)</i> 209	
<i>Design philosophies for human-centred automation</i> 211	
<i>Hard or soft, vehicle or driving?</i> 211	
<i>Problem-driven automation</i> 213	
<i>‘Cliff-edge’ automation</i> 214	
<i>Human-automation teaming</i> 216	
<i>Driver training</i> 223	
<i>Which way now?</i> 225	
<i>Key points</i> 228	
<i>References</i>	231
<i>Index</i>	271
