About the Editor..... ix

List of Contributors..... xi

Preface..... xiii

  

**Introduction..... 1**

  

**Chapter 1** Recent Advances in the Synthesis of (Bio)degradable Polymers  
by Traditional Technologies and by Biotechnological Routes ..... 5

*Wanda Sikorska*

  

**Chapter 2** Degradation Principle and Regulations ..... 31

*Wanda Sikorska and Marta Musioł*

  

**Chapter 3** Manufacturing Processes of (Bio)degradable Polymers ..... 47

*Khadar Duale*

  

**Chapter 4** Comprehensive Characterisation of Complex Polymer Systems ..... 97

*Khadar Duale*

  

**Chapter 5** Current Trends in the Area of Blends and Composites ..... 105

*Marta Musioł*

  

**Chapter 6** New Research Strategy in Forecasting Directions  
of (Bio)degradable Polyester Applications..... 141

*Joanna Rydz*

  

**Chapter 7** (Bio)degradable Polymers of Biological and Biomedical Interest... 167

*Barbara Zawidlak-Węgrzyńska*

  

**Chapter 8** (Bio)degradable Polymers in Everyday Life ..... 189

*Barbara Zawidlak-Węgrzyńska*

|                    |                                                                                                                  |     |
|--------------------|------------------------------------------------------------------------------------------------------------------|-----|
| <b>Chapter 9</b>   | Principles Concerning Sustainability: Present and Future of<br>(Bio)degradable Polymers – Final Conclusions..... | 215 |
|                    | <i>Joanna Rydz</i>                                                                                               |     |
| <b>Index</b> ..... |                                                                                                                  | 221 |
