

Table of contents

Preface	IX
Organization of the symposium	XI
 1 <i>Unbound granular materials</i>	
Summary	3
<i>J.-L. Paute & A.R. Dawson</i>	
Comparison and performance of repeated load triaxial test equipment for unbound granular materials*	7
<i>P.J. Galjaard, J.-L. Paute & A.R. Dawson</i>	
Recommendations for repeated load triaxial test equipment and procedure for unbound granular materials*	23
<i>J.-L. Paute, A.R. Dawson & P.J. Galjaard</i>	
Mechanical characteristics of unbound granular materials as a function of condition*	35
<i>A.R. Dawson, J.-L. Paute & N.H. Thom</i>	
A large triaxial apparatus for the study of granular materials under repeated loading used at LNEC	45
<i>A. Gomes Correia & S. Gillett</i>	
Repeated load triaxial testing of granular materials in the French network of Laboratoires des Ponts et Chaussées	53
<i>J.-L. Paute, P. Hornych & J.P. Benaben</i>	
The permanent deformation of a granular material modelled using hollow cylinder testing	65
<i>N.H. Thom & A.R. Dawson</i>	
 2 <i>Subgrade soils</i>	
Summary	81
<i>A. Gomes Correia & P. Hornych</i>	
Equipment and procedures for triaxial testing of subgrade soils*	85
<i>P. Hornych, A. Gomes Correia & S. Gillett</i>	

Prediction of subgrade moisture conditions for purposes of pavement design*	99
<i>A.Gomes Correia</i>	
Resilient behaviour of soils*	105
<i>A.Gomes Correia & S.Gillett</i>	
The effects of subgrade clay condition on the structural behaviour of road pavements	113
<i>A.R.Dawson & A.Gomes Correia</i>	
Influence of water content on the cyclic behaviour of a silty sand	121
<i>J.-L.Paute & P.Hornych</i>	
Dynamic testing of fine grained subgrade soils	135
<i>M.Arm</i>	
 <i>3 Non linear pavement analysis</i>	
Summary	145
<i>P.Jouve</i>	
Comparison and harmonized development of some finite element programs*	147
<i>P.Jouve & S.Guezouli</i>	
Evolution and recommendations for finite element programs*	165
<i>P.Jouve & S.Guezouli</i>	
Validation of the improved analytical approach*	171
<i>P.Jouve</i>	
Development and validation of a finite element code for pavement analysis	175
<i>J.R.de Almeida</i>	
Modelization of flexible pavements with César-LCPC FEM program	185
<i>J.Balay & H.Kabré</i>	
NOEL: A non linear finite element code for road pavement analysis	193
<i>S.Guezouli, M.Elhannani & P.Jouve</i>	
The non-linear elastic model of Boyce: An evaluation of the model in the FEM-program DIANA	201
<i>W.van Schelt, E.Vos, P.J.Galjaard & M.A.N.Hendriks</i>	
An elastoplastic constitutive law for asphalt-aggregate mixtures	207
<i>S.L.Weissman & J.B.Sousa</i>	
Calculation of the permanent deformation in a flexible pavement	215
<i>P.J.Wright & L.Zheng</i>	
 <i>4 Flexible pavement design</i>	
Summary	225
<i>A.de Boissoudy</i>	
Parametric study – Flexible pavements*	229
<i>A.R.Dawson & L.C.Plaistow</i>	

Introducing the nonlinearity of the granular material in routine analytical pavement design* <i>A.de Boissoudy</i>	239
A review of European pavement design* <i>N.H.Thom</i>	249
Structural analysis of pavements under dynamic loads <i>M.de Lurdes B.C.Antunes & C.A. Brito Pina</i>	257
The bearing characteristics of unbound aggregate subbase courses underneath asphalt pavements <i>H.Beyer, A.Gerlach & J.Hothan</i>	265
Contribution to the mathematical determination of the stress-strain behaviour of unbound structural layers by means of triaxial tests <i>T.Gleitz</i>	273
Pavement modelling based on measured in-depth deflection data <i>H.Jansson & L.G.Wiman</i>	281
Pavement analysis: Case study on the seasonal variation effects <i>N.S.Matter, O.T.Farouki & A.A.Shaat</i>	291
Experiments with three unbound granular materials on the LCPC circular test track <i>H.Odeon, J.P.Kerzreho, R.Kobisch & J.-L.Paute</i>	301
Influence of the stress dependent strain behaviour of unbound road bases on the stress of superpositioned top layers <i>F.Wellner</i>	311
 5 Monitoring and performance of flexible pavements	
Summary <i>P.J.Galjaard & N.H.Thom</i>	321
Measurement of the stress dependent resilient modulus on unbound granular materials in situ <i>I.Dastich</i>	325
Pressuremeter testing for road design <i>A.Derradji, G.Aussedat, P.Jouve & M.Gambin</i>	331
An effective method for ausculting the structure of the roads <i>A.Derradji, B.Heritier, G.Aussedat & P.Jouve</i>	337
Evaluation of in situ soil moduli based on Falling Weight Deflectometer (FWD) loadings <i>L.Djärf</i>	343
Determination of layer moduli from FWD measurements <i>A.Ruotoistenmäki</i>	347
Rational determination of pavements deflection from Lacroix deflectograph measurements <i>J.Martinez & P.Jouve</i>	355

Miscellaneous

Closing remarks <i>A.R. Dawson</i>	365
Final remarks <i>A.Gomes Correia</i>	367
Author index	369
