To the Student *ix*

Preface *xi*

About the Companion Website *xiii*

1 Introduction and Approach *1*

1.1 Introduction *1*

1.2 Necessary Assumptions *2*

1.3 Units *2*

1.4 Equation of State and Fluid Properties *4*

1.5 Other Concepts *10*

Review Questions *11*

Problems *13*

Glossary of Terms and Symbols *14*

2 Fluid Dynamic Fundamentals *17*

2.1 Introduction *17*

2.2 Objectives *17*

2.3 Control Volume Approach *18*

2.4 Lift, Drag, and Pitching Moment *22*

2.5 Dimensional Analysis *22*

2.6 Small Perturbation Theory in Steady Compressible Flows *29*

2.7 Summary *31*

Problems *32*

Check Test *33*

3 Dynamics of Incompressible Flows *35*

3.1 Introduction *35*

3.2 Objectives *35*

3.3 Elementary Flows *36*

3.4 Circulation *39*

3.5 Superposition of Elementary Flows *41*

3.6 Theorems of Helmholtz and Kelvin *42*

3.7 Real Flows *43*

3.8 Summary *44*

Problems *45*

Check Test *45*

4	Mass, Momentum, and Energy Principles	47
4.1	Introduction	47
4.2	Objectives	47
4.3	Bernoulli's Equation	47
4.4	Airspeed Indicator	49
4.5	Kutta–Joukowski Theorem	50
4.6	Pressure–Energy Equation	52
4.7	Enrichment Topics	53
4.8	Summary	56
	Problems	57
	Check Test	58
5	Thin Airfoils in Two-Dimensional Incompressible Flow	59
5.1	Introduction	59
5.2	Objectives	60
5.3	The Vortex Filament	60
5.4	Thin Airfoil Theory in Incompressible Flow	60
5.5	Symmetric Contribution at Angle of Attack	62
5.6	Camber Contribution at Zero Angle of Attack	66
5.7	Flapped Symmetric Airfoil at Zero Angle of Attack	68
5.8	Enrichment Topics	70
5.9	Summary	71
	Problems	71
	Check Test	73
6	Thin Wings of Finite Span in Incompressible Flow	75
6.1	Introduction	75
6.2	Objectives	75
6.3	Lifting Line Theory	76
6.4	Downwash Velocity and Elliptic Spanwise Lift Distribution	76
6.5	Experimental Verification Using Drag Polars	80
6.6	Non-elliptic Planforms and Twist	81
6.7	Effects of Lifting Line Theory on Airplane Performance	82
6.8	Enrichment Topics	84
6.9	Summary	86
	Problems	87
	Check Test	88
7	Viscous Boundary Layers	89
7.1	Introduction	89
7.2	Objectives	89
7.3	The Boundary Layer Concept	90
7.4	Contributions to Drag	91
7.5	Skin-Friction Drag on Airfoils	92
7.6	Approximate Viscous Boundary Layer Profiles	96
7.7	Enrichment Topics	99

7.8	Summary	100
	Problems	101
	Check Test	102
8	Fundamentals of Compressible Flow	103
8.1	Introduction	103
8.2	Objectives	103
8.3	Speed of Sound and Mach Waves	104
8.4	Steady-State Isentropic Flow	105
8.5	Supersonic Flows	106
8.6	Critical Mach Number	112
8.7	Supersonic Flat-plate Airfoils	114
8.8	Enrichment Topic	116
8.9	Summary	117
	Problems	118
	Check Test	119
9	Thin Airfoils in Compressible Flow	121
9.1	Introduction	121
9.2	Objectives	121
9.3	Two-Dimensional Compressible Flow Around Thin Airfoils	122
9.4	The Mach Number Dependence	125
9.5	Supersonic Airfoils	129
9.6	Aircraft Wings in Compressible Flow	132
9.7	Enrichment Topic	134
9.8	Summary	135
	Problems	136
	Check Test	138
10	Transonic and Hypersonic Aerodynamics	139
10.1	Introduction	139
10.2	Objectives	139
10.3	Transonic Flow	140
10.4	Thick Airfoils for High Subsonic and Transonic Flight	144
10.5	Hypersonic Flow	145
10.6	Enrichment Topics	150
10.7	Summary	152
	Problems	152
	Check Test	153
11	High-Lift Airfoils in Incompressible Flow	155
11.1	Introduction and Approach	155
11.2	Objectives	156
11.3	Nonlinear Thin Airfoil Theory	156
11.4	Pitching Moment at $c/4$ and the Aerodynamic Center	162
11.5	High-Lift Wing Mechanisms	163

11.6	Finite Wings	166
11.7	Enrichment Topics	166
11.8	Recapitulation	170
	Problems	171
	Check Test	172

Appendix A	Standard Atmosphere SI Units	173
Appendix B	Software	175
Appendix C	Equations for Chapters 5 and 6	179
	Selected References	181
	Answers to Selected Problems	183
	Index	187
