

Table of contents

Preface	XVII
Organisation	XIX

VOLUME 1

1. Constitutive modeling

Filler and binder influence on the linear viscoelastic behavior of mastics <i>B. Delaporte, H. Di Benedetto, P. Chaverot & G. Gauthier</i>	3
Numerical temperature predication model and thermal properties for asphalt pavement <i>L. Jia, L. Sun & L. Huang</i>	15
A theoretical-experimental visco-elastic-plastic analysis of the Mastic Asphalt <i>M. Pasetto & N. Baldo</i>	25
Uniqueness of the viscoelastic time-function for asphalt-aggregate mixes <i>E. Levenberg & J. Uzan</i>	35
Creep and recovery of linear and non-linear rheological bodies <i>T. Pellinen, M. Oeser, A. Scarpas & C. Kasbergen</i>	49
Rheological elements on the basis of fractional derivatives <i>M. Oeser, A. Scarpas, C. Kasbergen & T. Pellinen</i>	59
The displacement discontinuity method for predicting HMA fracture energy in the bending beam test <i>B. Birgisson, A. Montepara, E. Romeo, R. Roque & G. Tebaldi</i>	69
Fracture modeling considered rate-dependency of asphalt concrete using discrete element method <i>H. Kim, M.P. Wagoner & W.G. Buttlar</i>	79
Inverse fitting of a fatigue damage model on structural tests <i>R. Chkir, D. Bodin, G. Gauthier & G. Pijaudier Cabot</i>	93
Nonlinear viscoelastic analysis of asphalt binders <i>E. Masad, C. Huang, G.D. Airey & A. Muliana</i>	103
Determination of the Burgers' parameters by application of the dynamic ITT <i>M. Huurman & M. Poot</i>	111
“Bottom-up” multiscale modeling of viscoelastic properties of asphalt <i>E.G. Aigner, C. Pichler & R. Lackner</i>	123

Rheological study of bituminous mastics for the sealing of cracks of flexible and semi-rigid pavements <i>M. Agostinacchio & S. Olita</i>	137
 <i>2. Experimental laboratory material characterisation</i>	
Laboratory evaluating and comparison of the SCB ¹ Test results with other common tests for HMA mixtures <i>M. Arabani & B. Ferdowsi</i>	151
Fatigue and permanent deformation characteristics of SBS polymer modified asphalt concrete mixture for paving applications <i>S.S. Awanti, M.S. Amarnath & A. Veeraragavan</i>	165
Determination of the fatigue behaviour of asphalt mixes using the results of direct, indirect and triaxial tensile tests <i>C. Weise, F. Wellner & S. Werkmeister</i>	175
Damage characterization of asphalt concrete specimens by ultrasonic P and S-wave propagation in laboratory <i>A. Houel & L. Arnaud</i>	185
The use of the UNIBAS-MPT triaxial press in the definition of the master curves of the complex modulus of asphalt concrete <i>D. Ciampa & S. Olita</i>	195
An experimental analysis of the effects of compaction on asphalt pavement macrotexture <i>M. Crispino, R. Rampini & M. Pozzi</i>	205
Laboratory fatigue characterization of asphalt mixtures using the flexural bending beam fatigue test <i>L.F. Walubita & A.E. Martin</i>	219
Investigation of a surrogate fatigue test protocol for asphalt mix-design and mixture screening <i>L.F. Walubita, A.E. Martin & M.Y. Mikhail</i>	237
Observations on current performance tests and prediction models for asphalt concrete mixes <i>G.B. Way, K.E. Kaloush & J.B. Sousa</i>	255
Characterisation of repeated creep recovery behaviour of asphaltic mixtures <i>H.T. Taherkhani, J.R.A. Grenfell, A.C. Collop, G.D. Airey & A. Scarpas</i>	271
Comparison of direct shear and torque tests for determining viscoelastic shear behavior of tack coats <i>M. Diakhaté, C. Petit, A. Millien, A. Phelipot-Mardelé, B. Pouteau & H. Goacolou</i>	281
Effect of aggregate inhomogeneity on mechanical properties of asphalt mixtures <i>H. Azari</i>	291
Dynamic creep test in several asphalt binders. The role of temperature and stress <i>J. Stastna, L. Zanzotto, T.L.J. Wasage, G. Polacco & M. Cantu</i>	303
Design and construction of the large-scale tri-axial testing apparatus <i>T. Glatz & K.J. Jenkins</i>	317
Characterizing engineering properties of asphalt concrete using UPV test <i>M. Arabani & P.T. Kheiry</i>	327

Study on the steel slag-fly ash-phosphogypsum solidified material <i>W.G. Shen & M.K. Zhou</i>	337
 <i>3. Finite element simulation</i>	
3D FE analysis of accelerated pavement test results from New Zealand's CAPTIF facility <i>S. Werkmeister, A. Gonzalez, B. Hayward & D. Alabaster</i>	347
Modeling test rolling on cohesive subgrades <i>J.P. Hambleton & A. Drescher</i>	359
Aircraft load rating and pavement structural reporting based on analytical models <i>G. Charonitis & A. Loizos</i>	369
Modeling of permanent deformation development in multilayered flexible pavement <i>M. Gajewski, S. Jemioło, M. Maliszewski, R. Mularzuk & D. Sybilski</i>	381
Investigation of pavement foundation behavior using axisymmetric and three-dimensional finite element analyses <i>M. Kim & E. Tutumluer</i>	389
Investigation of semi-rigid airport pavement bearing capacity using computational tools <i>A. Loizos, G. Charonitis & A. Armeni</i>	401
Predicting response and performance of granular pavements with thin bituminous surfaces under heavy vehicles using three-dimensional non-linear Finite Element model <i>B.T. Vuong</i>	411
A modeling to understand where a vertical crack can propagate in pavements <i>A. Chabot, Q.D. Tran & A. Ehrlacher</i>	431
The complex guiding the simple: Enhancement of mechanistic-empirical pavement rutting models using nonlinear finite element analysis <i>C.W. Schwartz & R.L. Carvalho</i>	441
3D finite elements modelling of rut depth evolution of flexible pavements with the shakedown theory <i>F. Allou, C. Chazallon, C. Petit & P. Horny</i>	451
Experimental results and finite element numerical simulation of a wheel tracking asphalt mixture beam fatigue test <i>M.-C. Liao, S. Wang & G.D. Airey</i>	461
 <i>4. Subgrade testing, evaluation and modeling</i>	
Measurement of resilient modulus of unsaturated subgrade soil <i>A. Sawangsuriya, T.B. Edil & C.H. Benson</i>	475
Consolidation of aggregate base and subbase layers under heavy aircraft loading at the National Airport Pavement Test Facility <i>N. Garg & G.F. Hayhoe</i>	485
Optimizing aggregate base gradation for maximum performance <i>N.N. Khoury, M.M. Zaman & J.G. Laguros</i>	495

Evaluation and modelling of subgrade stiffness during the construction phase of asphalt pavements <i>J.M.C. Neves & A.G. Correia</i>	503
Time and temperature dependency of the geomechanical properties of silty soils treated with lime <i>R.D. Bel, Q. Bollens, A.G. Correia, P.H. Duvignaud & J.C. Verbrugge</i>	513
Nonlinear finite element modeling of unbound granular materials <i>A. Gonzalez, M. Saleh, A. Ali & M. Gribble</i>	523
Finite element modeling of vertical drainage systems in wet soft clay <i>X.-Y. Liu, A. Scarpas & C. Kasbergen</i>	533
Modular ratios for unbound granular pavement layers <i>G. Salt & D. Stevens</i>	543
Simulation of the expansive soil behavior using state surfaces <i>X. Zhang & R.L. Lytton</i>	555
Geotechnical characterization of backfill granular materials <i>A. Cividini</i>	563
Modeling of unbound granular material under cyclic loading <i>B. Dongmo-Engeland & I. Hoff</i>	573
Analyzing pavements on lime-stabilized soils with artificial neural networks <i>O. Pekcan, E. Tutumluer & M.R. Thompson</i>	587
Characterization of anisotropic base materials with high fines content <i>D.N. Little, E. Masad & R.S. Ashtiani</i>	597
Characterization of bitumen stabilised granular pavement material properties using tri-axial testing <i>L.J. Ebels & K.J. Jenkins</i>	607
Time dependency behavior of granular materials <i>E. Parhamifar</i>	619
Required thickness of the sub-base layer for flexible pavements on highway embankments constructed of poor materials <i>M. Kavvas, P. Fortsakis, G. Prountzopoulos & A. Papakonstantinou</i>	629
Mechanical behaviour of UGM for Portuguese conditions <i>R.C. Luzia & L.G. Picado-Santos</i>	639
 <i>5. Open graded HMA and asphalt moisture damage</i>	
Impact of lime and liquid antistripping on moisture sensitivity of HMA mixtures <i>P.E. Sebaaly, E.Y. Hajj & E. Berger</i>	651
Analysis of moisture ingress and retention processes in asphalt mixes with nonlinear mixed effects models <i>Q. Lu & J.T. Harvey</i>	663
Influence of air-void and binder contents on moisture sensitivity of hot mix asphalt in flexural beam fatigue test <i>Q. Lu & J.T. Harvey</i>	677

Methods to quantify interfacial adhesion and debonding in bitumen-aggregate systems in dry and wet conditions <i>A. Bhasin & D.N. Little</i>	689
Determination of combined physical-mechanical moisture induced damage in the aggregate-mastic interface <i>A. Copeland, J. Youtcheff, N. Kringos & A. Scarpas</i>	701
Durability related investigation into porous asphalt <i>E.T. Hagos, A.A.A. Molenaar, M.F.C. van de Ven & J.L.M. Voskuilen</i>	713
Assessment of moisture transport in hot mix asphalt using X-ray computed tomography <i>E. Arambula, E. Masad, A. Epps Martin, R.A. Ketcham & A.R. Abbas</i>	729
Asphalt mixture moisture damage assessment combined with surface energy characterization <i>G.D. Airey, E. Masad, A. Bhasin, S. Caro & D.N. Little</i>	739
Determination of volumetric parameters of one and two-layer porous asphalt with X-ray computerised tomography <i>M.F.C. van de Ven, W. Verwaal & J.L.M. Voskuilen</i>	749
Asphalt-moisture testing utilizing a modified dynamic shear rheometer <i>A.N. Kvasnak & R.C. Williams</i>	759
Simulation of mastic transport from open graded asphalt mixes using a hybrid Lagrangian-Eulerian finite element approach <i>N. Kringos, A. Scarpas & A.P.S. Selvadurai</i>	767
Simulation of combined physical-mechanical moisture induced damage in asphaltic mixes <i>N. Kringos & A. Scarpas</i>	779
Microstructural characterization of porous pavements <i>C.B. Nielsen, J. Raaberg & D. van Vliet</i>	791
Modifying HMA stone aggregates prone to stripping with lime-based additives <i>A. Khoshghalb, M. Elshafey & A.O. Abd El Halim</i>	803
Effect of compaction method on bituminous mixtures voids distribution and magnitude <i>S. Abo-Qudais & M. Qudah</i>	817
 <i>6. Field measurement and in-situ characterisation</i>	
Utilization of embedded pavement instrumentation to validate material characterization in backcalculation <i>D.H. Timm & A.L. Priest</i>	833
Design optimization of foamed asphalt – Czech experience <i>J. Valentin, P. Mondschein, O. Vacín & V. Neuvirt</i>	843
In-situ shear stiffness of asphalt concrete mixtures <i>W. Bekheet, A.O. Abd El Halim & S. Easa</i>	853
Mechanical behaviour of hot mix recycled asphalt concrete in plant <i>A.M.C. Baptista & L.G. Picado-Santos</i>	865

In situ characterization of pavement materials stabilized with foamed asphalt and cement <i>A. Loizos & V. Papavasiliou</i>	875
Monitoring mechanical response of in service pavements using retrofitted fibre optic sensors <i>G. Doré, G. Duplain & P. Pierre</i>	883
 <i>7. Nondestructive measurement techniques and analysis tools</i>	
Development of V_S -CBR-DCP empirical model for determining dynamic stiffness of pavement base layer using SASW <i>S.A. Rosyidi, M.R. Taha, K.A.M. Nayan, Z. Chik, A. Ismail & M. Siegfried</i>	895
Estimating resilient modulus of Florida granular subgrade materials <i>W. V. Ping, C.C. Ling, B. Dietrich & D. Horhota</i>	903
The stiffness of pavements and subgrades at small strains – geotechnical aspects <i>M.S. Kovačević, A. Ivanković & D. Jurić-Kačunić</i>	915
Backcalculation of subgrade stiffness under rubblized PCC slabs using multi-level FWD loads <i>S. Mun & Y.R. Kim</i>	925
A new dynamic method for FWD inverse analysis and its application in CRCP pavement <i>Chun-Ying Wu, X.-Y. Liu, A. Scarpas & X.-R. Ge</i>	939
Shortcut techniques for backcalculation of pavement moduli <i>C.A. Lenngren</i>	949
Use of stiffness in pavement-foundation design as measured with LDW Testing <i>M. Livneh</i>	959
GPR investigations on degraded road pavements built on embankments <i>S. Colagrande, D. Ranalli, M. Scozzafava & M. Tallini</i>	971
Variation in information obtained from interpretation of ground penetrating radar (GPR) pavement investigation data <i>R.D. Evans, M.W. Frost, M. Stonecliffe-Jones & N. Dixon</i>	983
Assessment of asphalt pavement remaining life using artificial neural network modelling <i>A. Loizos, P. Georgiou & C. Plati</i>	993
Practical application of GPR in transport infrastructure survey <i>S. Fontul, M.L. Antunes, E. Fortunato & M. Oliveira</i>	1003
Author index	1015

VOLUME 2

8. Accelerated testing

Forensic investigation of a rich-bottom pavement under accelerated loading <i>J.R. Willis & D.H. Timm</i>	1021
Strain responses and fatigue performances from the FHWA ALF modified binder pavements <i>X. Qi, N. Gibson & J. Youtcheff</i>	1031

9. Hot-mix asphalt design

- "State of the art" volumetric mix design Stone Mastic Asphalt (SMA) 1045
M.F.C. van de Ven & M.M.J. Jacobs
- The volumetric mix-design of porous asphalt: An Italian study
of N_{design} determination 1055
G. Di Mino & M. Giunta
- Influence of asphalt mixture compaction method and specimen size on internal structure and
mechanical properties 1063
M. Iwama, G.D. Airey & A.E. Hunter
- Towards a better understanding of the three points bending test performed on bituminous
binders 1075
E. Chailleux, L. Gaillet, D. Hamon & V. Mouillet
- The heterogeneity of air void distribution in HMA *Superpave* gyratory specimens 1085
S. Thyagarajan, L. Tashman & K. Nam
- Comparison of engineering characteristics of sixteen asphalt mixtures 1095
J.E. Crinice & G.Y. Baladi
- Influence of mix parameters on fuel resistance of porous and dense-graded HMAs 1105
F.G. Praticò, R. Ammendola & A. Moro

10. Pavement management and design

- Distress points, distress index, and remaining service life and asset values 1117
G.Y. Baladi
- Functional requirements for integrated infrastructure management systems 1125
O.M. Salem
- Limit-analysis based upscaling of strength properties of matrix-inclusion materials 1133
J. Füssl & R. Lackner
- Rock failure risk assessment in highway maintenance management 1145
A. Mouratidis & L. Pantelidis
- Austroroads asphalt overlay fatigue life prediction 1155
G. Jameson

11. Measurement and modeling of pavement cracking

- Thermal reflective crack propagation 1173
S. Hu, F. Zhou & T. Scullion
- Effect of specimen geometry and loading rate on the fracture properties of
bituminous materials 1183
I. Artamendi & H.A. Khalid
- Enhancing crack resistance of SMA mixtures through the use of higher amounts of newly
developed cellulose fibers 1193
A.A. Selim, R. Muniandy & H. Mahgoub

Asphalt pavements in cold climates – a systematic approach for the assessment of cracking resistance <i>M. Wistuba & M. Spiegel</i>	1199
A Bayesian duration estimation of crack initiation prediction in in-service pavements <i>M.G. Karlaftis & A. Loizos</i>	1209
Development of viscoelastic mechanistic response model for crack sealant at low temperature <i>S. Dessouky & I.L. Al-Qadi</i>	1221
Evaluation of fracture resistance of hot-mix-asphalt <i>F.M. Bayomy, A.M. Abu Abdo, M.A. Mull & M.J. Santi</i>	1231
Reflective and thermal cracking modeling of asphalt concrete overlays <i>E.V. Dave, S.H. Song, W.G. Buttlar & G.H. Paulino</i>	1241
Prediction of bituminous sealant-aggregate bond strength and curing time using a newly developed blister test <i>I.L. Al-Qadi, E.H. Fini & J-F. Masson</i>	1253
Low temperature behaviour of bituminous mixes: TSRS tests and acoustic emission <i>C. Sauzéat, H. Di Benedetto, P. Chaverot & G. Gauthier</i>	1263
<i>12. Permanent deformation</i>	
Influence of progressive plastic deformation of the subgrade on rutting on lightly trafficked asphalt pavements <i>Y. Takeuchi, T. Nishizawa, Y. Hachiya & K. Himeno</i>	1275
Effects on rutting and stiffness by varying coarse and fine aggregates <i>M.A. Kamal & M.J.M. Niazi</i>	1285
Assessment of pavement rutting due to asphalt flow <i>A. Mouratidis & A.R. Freitas</i>	1297
A laboratory investigation of the effect of multiple axle and truck configurations on HMA mixture rutting <i>H.K. Salama & K. Chatti</i>	1305
<i>13. Pavement interface characteristics</i>	
Main types and features of Brazilian pavements over bridges and viaducts <i>C.E.L. de Paiva & C.F. Peixoto</i>	1317
Laboratory measurement of shear interface strength beneath a thin asphalt layer <i>M.H. Sutanto, A.C. Collop, G.D. Airey & R.C. Elliott</i>	1327
Describing the behaviour of a bitumen-based membrane for orthotropic steel deck bridges <i>T.O. Medani, X.-Y. Liu, A. Scarpas, M. Huurman & A.A.A. Molenaar</i>	1337
Describing the behaviour of two asphaltic surfacing materials for orthotropic steel deck bridges <i>T.O. Medani, M. Huurman, X.-Y. Liu, A. Scarpas & A.A.A. Molenaar</i>	1351

14. Innovative pavement materials and interface systems

- LEA.[®] (Low Energy Asphalt: A new generation of half-warm asphalt mixtures) 1371
F. Olard, J.-P. Antoine, B. Héritier, A. Romier & Y. Martineau
- Dynamic effects of waste tire thread mesh reinforcement on the asphaltic pavement characters 1383
M. Arabani, A.K. Haghi, S.M. Mirabdolazimi & M. Haghgoo
- A finite element model to evaluate the role of interlayer fiberglass geogrids in retarding reflective cracking in flexible pavements 1393
M. Agostinacchio & F. Fiori
- Evaluation of the damage and implementation of separation function of geotextiles in road structure 1403
A. Vaitkus, D. Čygas & A. Laurinavičius
- Influence of reinforcement geosynthetics on flexion behaviour of double-layer bituminous systems 1415
M. Bocci, A. Grilli, F.A. Santagata & A. Virgili
- Lessons learned from modelling and laboratory experiences on reinforcement of asphalt pavements with double twist steel wire mesh 1425
M. Vicari
- Responses of geogrid-reinforced flexible pavement to accelerated loading 1437
I.L. Al-Qadi, E. Tutumluer, S. Dessouky & J. Kwon
- Evaluation of the fracture behavior of asphalt road surface with a geosynthetic overlay system 1447
R.G. Lugmayr & Th. Hasslacher
- Influence of interface condition on concrete pavement response – an experimental evaluation 1455
S.R. Maitra, K.S. Reddy & L.S. Ramachandra
- A pavement response model for base-reinforced flexible pavements 1463
S.W. Perkins & E.V. Cuelho

15. Surface characterisation and tire-surface interaction

- Effects of aircraft tire pressures on flexible pavements 1473
M.J. Roginski
- Laboratory evaluation of road surface macrotexture durability 1483
M. Ech, S. Morel, S. Yotte, D. Breyse & B. Pouteau
- Development of a general 3D contact algorithm to model tire-pavement interaction 1495
C. Kasbergen & A. Scarpas
- Development of a pavement roughness index using power spectral density analysis 1505
A. Loizos, C. Plati, E. Teroviti & G. Kanellaidis
- Interpreting vehicle-pavement interaction through wavelets 1515
A.T. Papagiannakis, H.M. Zelelew & B. Muhunthan

16. Concrete pavements

- Prediction of early-age strength development of ultra fast-track concrete for pavement rehabilitation 1525
B. Anckaert, L. Vandewalle, A. Beeldens & L. Rens
- Sensitivity analysis of the MEPDG to the coefficient of thermal expansion test variability 1535
J. Tanesi, R. Meininger, M. Nicolaescu, E. Kutay & A.R. Abbas
- An innovative rehabilitation technique for airport concrete pavements 1545
M. Crispino & E. Toraldo
- EAF slag aggregate behavior in antiskid course in road construction industry 1555
I. Liapis
- A micromechanical approach to computing linear and nonlinear moisture and temperature stresses in concrete pavements 1563
R.A. Rodden, J.R. Roesler & D.A. Lange
- Simulation of early-age jointed plain concrete pavement deformation under environmental loading using the finite element method 1571
S. Kim, H. Ceylan & K. Gopalakrishnan

17. Chemo-physical processes

- Surface chemistry at the bitumen-aggregate interface 1589
M.E. Labib, A.W. Hefer & D.N. Little
- Effect of sulfate on chemically treated expansive clay 1601
Z. Nalbantoglu
- Advances using surface chemistry relations to quantify bitumen-aggregate stripping 1607
A.W. Hefer, D.N. Little & M.E. Labib
- Influence of material factors on surface free energy and performance related parameters 1621
J.E. Howson, A. Bhasin, E. Masad, D.N. Little, R.L. Lytton & H. Claros
- Ageing of bitumen in bulk versus the ageing of bitumen in an asphalt mixture 1631
J. Wu, E. Lepercq & G.D. Airey

18. Environmental issues related to pavements

- Mechanical characterization of environmentally friendly mixtures 1643
F. Canestrari, M. Bocci, G. Ferrotti & E. Pasquini
- Laboratory evaluation of blending RAP with virgin aggregates 1653
B. Huang, X. Chen & Q. Dong
- Aspects concerning the design and performance of recycled bases courses 1661
D. Stehlik & P. Hyzl
- Effects of environment on the long-term performance of flexible and rigid pavements in the LTPP SPS-8 experiment 1667
S.W. Haider, K. Chatti, N. Buch & A.S. Pulipaka

19. Case studies

- Investigation and analysis of hot mix asphalt mixtures at Nevada's intersections 1679
E.Y. Hajj, P.E. Sebaaly, R.V. Siddharthan & D. Weitzel
- Investigating long life pavements. A case study 1691
M. Gorski, R. Benetti, M. Garozzo & M. Mori
- The utilisation of pavement performance data in the Hungarian road management 1699
L. Gáspár
- Comprehensive evaluation approach of flexible MEPDG for Minnesota conditions 1709
R.A. Velasquez, M.O. Marasteanu, L. Khazanovich & M. Jensen
- Perpetual pavements: applying the approach to very heavy loads 1723
G.A. Huber, D.H. Timm, Y. Yang & X. Gao

20. Rail-track assessment and rehabilitation

- A FEM model of rail track-ground system to calculate the ground borne vibrations: A case of rail track with wooden sleepers and k-fastenings at Castelvetro 1737
G. Di Mino, C.M. Di Liberto & J. Nigrelli
- Influence of high-resilient fastenings on the track mass participating in the motion of unsprung masses 1753
K. Giannakos
- Loads on railway superstructure – influence of high-resilient fastenings on sleepers loading 1765
K. Giannakos & A. Loizos
- Application of spectral analysis of surface waves (SASW) in the characterisation of railway platforms 1777
E. Fortunato, J. Bilé Serra & J. Marcelino
- Distribution of stresses under the sleepers of a railway line: A theoretical analysis and application 1787
K. Lympiris
- Ladder sleeper behavior analysis 1799
F.M. Nejad & M.H.M. Moghadam

21. Railroad ballast characterisation

- Angularity assessment of several railroad ballast sources using image processing 1809
Y. Descantes, F. Russo & J.M. Balabaud
- Railway trackbed assessment using the GPR technique 1817
A. Loizos, M. Silvestri & S. Dimitrellou
- An experimental research on the properties of Sicilian railroad ballast aggregates to the EN 13450:2002 1827
G. Di Mino, C.M. Di Liberto & J. Nigrelli

Imaging aided discrete element modeling of railroad ballast <i>H. Huang, E. Tutumluer, Y.M.A. Hashash & J. Ghaboussi</i>	1837
Mechanical behavior of ballast under monotonic and cyclic loading <i>K. Karraz, G. Bonnet, J.C. Dupla & J. Canou</i>	1847
Author index	1857
