Introduction.....	9
1 A Power Company in a Competitive Electricity Market – Investment Context.....	18
1.1. A power company in the current design of the national electricity sector.....	18
1.2. Investment incentives in the generation sector	32
1.3. Sources of uncertainty and investment risk in the operation of a power company	35
2. A Centralised Capacity Market in the Structure of Capacity Remuneration Mechanisms – Theoretical Essentials.....	45
2.1. The origin of capacity remuneration mechanisms – the missing money problem	45
2.2. Definition and taxonomy of capacity remuneration mechanisms	52
2.3. Selected capacity remuneration mechanisms	56
2.3.1. Capacity payment	56
2.3.2. Strategic reserve (cold contingency reserve)	58
2.3.3. A decentralised capacity market	62
2.3.4. Reliability options.....	65
2.3.5. A centralised capacity market	68
3. Identification of Key Drivers Affecting the Economic Efficiency of a Power Company After the Implementation of a Centralised Capacity Market.....	77
3.1. Revenue drivers	78
3.1.1. The capacity market demand curve	78
3.1.1.1. Shape and elasticity of the capacity demand curve	79
3.1.1.2. Peak load demand.....	82
3.1.1.3. Economically justifiable reserve margin above peak demand	84
3.1.1.4. Cost of New Entry	87
3.1.1.5. Price cap – the maximum price	90

3.1.2.	Capacity reserve supply curve	91
3.1.2.1.	Rules for determining the amount of available capacity in sell offers	92
3.1.2.2.	Pricing rules for bidding in the capacity auction	94
3.1.2.3.	Share of RES and DSR in the capacity market in the context of conventional generating units.....	95
3.2.	Cost drivers	98
4.	Developing a Methodology for Assessing the Economic Efficiency of a Power Company After the Implementation of the Capacity Market	100
4.1.	Traditional methodology for economic efficiency assessment and risk analysis of investment projects.....	101
4.1.1.	Time, risk and return.....	102
4.1.2.	Discount rate	102
4.1.2.1.	Types of discount factors	104
4.1.3.	Variants of discounted cash flow analysis	105
4.1.3.1.	Free Cash Flow to Firm Approach	105
4.1.3.2.	Free Cash Flow to Equity Approach	107
4.1.4.	Metrics of the project economic efficiency in the discounted cash flow analysis.....	108
4.1.4.1.	Net Present Value.....	108
4.1.4.2.	Internal Rate of Return	109
4.1.4.3.	Discounted Payback Period	109
4.1.5.	Practical application of the DCF analysis and its methodological shortcomings	109
4.1.5.1.	Selection of discount rates	109
4.1.5.2.	Inflation in cash flow calculation	117
4.1.5.3.	Risk analysis in the DCF model	117
4.2.	Real Options Analysis.....	123
4.2.1.	Real options	123
4.2.2.	Real options valuation	129
4.2.2.1.	Geometric Brownian motion	130
4.2.2.2.	Conventional algorithm for option valuation of projects with flexibility	135
4.2.2.3.	Modified valuation model	140
4.2.2.4.	Payoff formulae when exercising the most important options.....	144

4.3. Method for determining the level of revenues and costs associated with the introduction of a centralised capacity market	145
4.3.1. A company's revenues from the capacity market	146
4.3.2. Costs associated with participation in the scheme	147
5. Application of the Methodology for Assessing the Economic Efficiency of a Power Company After the Implementation of the Capacity Market	149
5.1. Calculation of the net present value	153
5.1.1. Investment outlays and depreciation	153
5.1.2. Electricity generation and sales proceeds	154
5.1.3. Operating costs	154
5.1.4. Gross present value, net present value and the decision criterion	155
5.2. Estimation of annual revenues and costs resulting from the company's operation in the capacity market	157
5.2.1. Revenues from the capacity market	157
5.2.2. Costs associated with the company's operation in the capacity market	162
5.3. Calculation of a company's strategic value using real options analysis	163
5.3.1. Construction of a volatility tree for gross present value	164
5.3.2. Calculation of the strategic value	169
5.3.3. Discussion of research findings	171
Conclusions and summary	173
Bibliography	178
