

Contents: volume 2

2. Foundations

Uncertainties in settlement prediction: KIA offshore airport K. Akai and Y. Tanaka	679
Wall installation effects - preliminary findings from a field study at the CTRL, Ashford J. Clark, D. Richards and W. Powrie	691
Response of a pile group in clay to first-time one-way cyclic tension loading B. M. Lehane, R. J. Jardine and B. A. McCabe	700
The Chicago Auditorium re-visited A. J. Powderham and R. B. Peck	710
Observed behaviour of bored piles in stiff clay S. Rampello, L. Callisto and G. Calabresi	724
A case history of damages caused to buildings by piping and remedial works J. P. P. Rémy	738
Numerical model validation for independent check of Rion-Antirion Bridge D. Yang and R. B. Peck	750
Field monitoring for silence piling construction in deep soft soil foundation X.-Y. Xie, K.- F. Liu and X.-R. Zhu	764

3. Slopes and embankments

A flow failure in a municipal solid waste landfill - the failure at Bulbul, South Africa G. E. Blight	777
Three-dimensional limit equilibrium analysis of the Taren landslide E. N. Bromhead and P. L. Martin	789
Reflections on C. H. Gregory's New Cross landslide of 1841 E. N. Bromhead	803
Reliability updating and geotechnical back-analysis R. Chowdhury, S. Zhang and P. Flentje	815

Observations and analyses of the 1994 submarine landslide at Skagway, Alaska	
D. H. Cornforth	822
Long-term stability of tertiary clay slopes in the Polish Carpathian Foredeep	
R. Kaczyński	834
Temporary slope stability in London Clay - back analyses of two case histories	
N. Kovacevic, D. W. Hight and D. M. Potts	842
Risk assesement in geotechnical engineering: the importance of engineering judgement	
S. Lacasse, F. Nadim, K. Høeg and O. Gregersen	856
Cut slope failure of mudstone formations in southern Taiwan	
H. J. Liao and H. M. Chen	868
Reappraising historical coincidences that radically misled slope destabilization analyses of homogeneous earth dams	
V. F. B. de Mello, E. S. Larocca, R. Quintanilha and E. de. B. Meireles	881
The influence of permeability on the stability of embankments experiencing seasonal cyclic pore water pressure changes	
V. P. Nyambayo, D. M. Potts and T. I. Addenbrooke	898
Old railway embankment clay fill - laboratory experiments, numerical modelling and field behaviour	
A. S. O'Brien, E. A. Ellis and D. Russell	911
Pore pressure measurements in infrastructure embankments	
A. M. Ridley, P. R. Vaughan, B. McGinnity and K. Brady	922
Application of three-dimensional finite element method in parametric and geometric studies of slope stability analysis	
A. N. Sainak	933
Geological evolution and landslide mechanisms along the central Adriatic coastal slopes	
F. Santaloia, V. Cotecchia and L. Monterisi	943
Critical slip surface in slope stability analysis	
S. K. Sarma	955
Deep-seated movements in stiff jointed clays: the role of structural discontinuities	
A. Sciotti and G. Calabresi	967
Shear strength framework for design of dumped spoil slopes for open pit coal mines	
J. V. Simmons and D. A. McManus	981

Identification of seasonal slope behaviour mechanisms from centrifuge case studies	
W. A. Take and M. D. Bolton	992
The shear strength mobilised in first-time slides in highly overconsolidated clays	
G. Urciuoli and L. Picarelli	1005
4. Ground performance	
Improvement of physical and mechanical properties of fine sand with one-shot and two-shot process grouting	
C. C. Anagnostopoulos, I. N. Grammatikopoulos and E. I. Stavridakis	1019
Load plate test with the light falling weight device	
H. Brandl and D. Adam	1032
Use of the observational method for the construction of a road cutting in glacial till	
T. J. P. Chapman, S. J. Deeble and D. P. Nicholson	1044
Tunnelling effects on pile groups in sand	
S. W. Jacobsz, J. R. Standing and R. J. Mair	1056
Some historical examples of underexcavation	
G. Johnston and J. Burland	1068
Centrifuge model loading tests on slope stabilizing micro-piles	
J. Kuwano, A. Takahashi, T. Nakada, A. Yano and M. Kido	1080
Trial excavation for cut and cover tunnel construction in glacial till – a case study from Dublin	
C. O. Menkiti, M. Long, N. Kovacevic, H. E. Edmonds, G. W. E. Milligan and D. M. Potts	1090
Stress paths and failure stress of reinforced decomposed granite by numerical approach	
S. A. Mofiz and M. R. Taha	1105
Induced subsidence on a multi-storey car park	
A. Powderham, M. Huggins and J. Burland	1117
The increasing importance of monitoring the field performance of foundations to validate numerical analysis	
G. Price, I. F. Wardle and N. G. Price	1131
Piles as settlement reducers: a case history	
G. Russo, C. Viggiani and L. de Sanctis	1143
Geotechnical considerations for hardening the subsoil in Mexico City's Metropolitan Cathedral	
E. Santoya and E. Ovando-Shelley	1155

Pore water compressibility and soil behaviour – excavations, slopes and draining effects	
R. Schwab, H.-J. Köhler and R. Schulze	1169
Microscopic evaluation of 1-D compression for air-form treated lightweight geo-material	
Y. Watabe, Y. Itou, .M.-S. Kang and T. Tsuchida	1183
Dynamic replacement ground improvement - field performance versus design predictions for the Alexandria City Centre Project in Egypt	
P. K. Wong and M. Lacazedieu	1193
Stiffness anisotropy of London clay and its modelling: laboratory and field	
J. Wongsaroj, K. Soga, S. Yimsiri and R. J. Mair	1205
5. The influence of geology on civil engineering	
The interplay between geological history and the geotechnical properties of overconsolidated Mio-Pliocene clays	
M. P. Barański	1219
On subsidence and eustacy in relation to Venice	
R. Butterfield	1231
Geological evidence for widespread faulting and fracturing of clay-rich sediments during initial consolidation	
J. A. Cartwright	1243
Modern reconnaissance methods for geohazard detection and monitoring in site investigation	
M. G. Culshaw, D. M. McCann and F. G. Bell	1255
In-situ investigation of problematical soils	
R. D. Evans, I. Jefferson, K. J. Northmore and P. Jackson	1269
Engineering geology of glaciated soils	
L. F. Gareau, F. Molenkamp, J. Sharma and B. M. H. Hegtermans	1280
Construction design data provided by the investigation of geomorphological processes and landforms	
J. S. Griffiths, A. E. Mather and M. Stokes	1292
Site investigation and site conceptual models. The link between geology and engineering	
C. Harding	1304
The role of geology in landslide risk assessment for civil engineering purposes	
G. J. Hearn	1316

Geotechnics in south-east Hampshire: geology and geotechnical properties

W. G. H. Hodges, M. Woodruff and G. R. J. Browning 1330

The origin and shear strength of kaolin-rich zones in Hong Kong and their implications for slope stability

S. Parry, S. D. G. Campbell and G. J. Churchman 1342

Appendix :

Bibliography of A. W. Skempton's published works 1355
