Preface xvi

Introduction 1

AI and architecture 2
Beyond technophobia 5
The prosthetic imagination 6
Cyborg culture 7
Extended intelligence 9
An introduction to AI 10
Intended audience 13

1 What is AI? 15

The different forms of AI 16
Training techniques 19
AI tribes 20
Neural networks 21
Backpropagation 23
Convolutional neural networks 24
DeepDream 25
Generative adversarial networks 26
From 2D to 3D 32
ArchiGAN 34
Beyond representation 36

- 2 The history of AI 41**
 - Alan Turing 41
 - The birth of AI 44
 - AI winters 45
 - Deep Blue 48
 - Jeopardy! 50
 - AlphaGo 52
 - Sputnik moment 56
 - AI and visibility 58
- 3 AI, art and creativity 61**
 - A brief history of AI art 62
 - Who needs Gauguin? 66
 - But who is the author? 67
 - Rethinking creativity 71
 - In the mirror of AI 74
- 4 AI, media art and neuroscience 77**
 - Dreaming machines 78
 - Dreaming buildings 79
 - Machine hallucinations 85
 - Architecturalisations 90
 - Can machines dream? 92
- 5 AI and architecture 97**
 - Coop Himmelb(l)au 101
 - Morphosis 105
 - Zaha Hadid Architects 108
 - AI fabrication 111
- 6 The future of the architectural office 115**
 - Superusers 116
 - Autodesk v the Superuser 118
 - Developer AI 118

Spacemaker AI	119
XKool Technology	125
Spacemaker v Xkool	130
Redesigning design	132

7 AI and the city of the future 137

'iPhone City'	139
The information architect	140
The informational city	142
Ambient intelligence	145
Swarm intelligence	147
The self-regulating city	151
'City Brain'	154
Internet-city-brain	155

8 The future of AI 159

Kurzweil's predictions	163
The 'Singularity'	165
AGI and beyond	167
Prediction errors	169
The future of intelligence	171
Architectural intelligence	173
AI and the future of architecture	175

Notes	177
