Preface.....	vii
About the Editors	ix
Chapter 1 Additive Manufacturing Techniques: Fundamentals, Technological Developments, and Practical Applications	1
<i>Jasvinder Singh, Ravinder Pal Singh, and Pulak Mohan Pandey</i>	
Chapter 2 An Overview of Post-Processing Technologies in General Practice	35
<i>Haitao Zhu, Allan E.W. Rennie, and Yingtao Tian</i>	
Chapter 3 Economic and Environmental Aspects of Post-Processing Technologies in Additive Manufacturing	49
<i>Balwant Singh, Jasgurpreet Singh Chohan, and Raman Kumar</i>	
Chapter 4 Post-Processing in Additive Manufacturing: Requirements, Theories, and Methods	63
<i>Hamaid Mahmood Khan, Gökhan Özer, and Mustafa Safa Yilmaz</i>	
Chapter 5 Thermal Post-Processing Techniques for Additive Manufacturing	87
<i>Muhammad Arif Mahmood, Abid Ullah, Mussadiq Shah, Asif Ur Rehman, Metin Uymaz Salamci, and Marwan Khraisheh</i>	
Chapter 6 Chemical-Based Post-Processing in Additive Manufacturing Processes	111
<i>Iliyas Melnikov, Baltej Singh Rupal, and Hamid Rajani</i>	

Chapter 7	Coating/Cladding Based Post-Processing in Additive Manufacturing	127
	<i>Rashi Tyagi and Ashutosh Tripathi</i>	
Chapter 8	Post-Processing for Metal-Based Additive Manufacturing Techniques	143
	<i>Dhirenkumar Patel and Akash Pandey</i>	
Chapter 9	Post-Processing of Additive Manufactured Components Through Abrasive Flow Machining Process	169
	<i>Sahil Sharma, Tarlochan Singh, and Akshay Dvivedi</i>	
Chapter 10	An Overview of the Quality Characteristics Challenges in Additive Manufacturing	181
	<i>B. Özbay Kısasöz and A. Kısasöz</i>	
Chapter 11	Innovative and Hybrid Post Processes for Additively Manufactured Parts.....	193
	<i>Shahbaz Juneja, Jasgurpreet Singh Chohan, Raman Kumar, Arun Kumar, and Sushant Kumar</i>	
Index		203
