Preface		ix
PART ONE	GENERAL PRINCIPLES	1
	1. Introduction	3
	<i>David E. Daniel</i>	
	2. Geochemistry	15
	<i>Jim V. Rouse and Roman Z. Pyrih</i>	
	3. Contaminant transport	33
	<i>Charles D. Shackelford</i>	
	4. Hydrogeology	66
	<i>Keros Cartwright and Bruce R. Hensel</i>	
PART TWO	NEW DISPOSAL FACILITIES	95
	5. Landfills and impoundments	97
	<i>David E. Daniel</i>	
	6. Leachate and gas generation	113
	<i>Robert K. Ham and Morton Barlaz</i>	
	7. Clay liners	137
	<i>David E. Daniel</i>	
	8. Geomembrane liners	164
	<i>Robert M. Koerner</i>	
	9. Collection and removal systems	187
	<i>Robert M. Koerner</i>	
	10. Water balance for landfills	214
	<i>R. Lee Peyton and Paul R. Schroeder</i>	
	11. Stability of landfills	244
	<i>Issa S. Oweis</i>	
	12. Mine waste disposal	269
	<i>Dirk Van Zyl</i>	

PART THREE	REMEDIATION TECHNOLOGIES	287
	13. Strategies for remediation <i>Larry A. Holm</i>	289
	14. Geophysical techniques for subsurface site characterization <i>Richard C. Benson</i>	311
	15. Soil exploration at contaminated sites <i>Charles O. Riggs</i>	358
	16. Vapor analysis/extraction <i>Lyle R. Silka and David L. Jordan</i>	379
	17. Vertical cutoff walls <i>Jeffrey C. Evans</i>	430
	18. Cover systems <i>David E. Daniel and Robert M. Koerner</i>	455
	19. Recovery well systems <i>Bob Kent and Perry Mann</i>	497
	20. Bioremediation of soils <i>Raymond C. Loehr</i>	520
	21. <i>In situ</i> bioremediation of groundwater <i>Gaylen R. Brubaker</i>	551
	22. Soil washing <i>Paul B. Trost</i>	585
PART FOUR	MONITORING	605
	23. Monitoring wells <i>Bob Kent and Mark P. Hemingway</i>	607
	24. Vadose zone monitoring <i>Lorne G. Everett</i>	651
