
Contents

Preface.....	ix
About the Editors	xi
Contributors	xiii
 Chapter 1 Air Force-Related Jet Fuel Toxicology Research (1991–2010)	1
<i>Walter J. Kozumbo</i>	
 Chapter 2 Jet Fuel Composition	21
<i>Tim Edwards</i>	
 Chapter 3 The Toxicity and Underlying Mechanism of Jet Propulsion Fuel-8 on the Respiratory System	27
<i>Simon S. Wong and Mark L. Witten</i>	
 Chapter 4 Neurotoxicological and Neurobehavioral Effects from Exposure to Jet Fuels.....	43
<i>Glenn D. Ritchie</i>	
 Chapter 5 Differential Protein Expression Following JP-8 Jet Fuel Exposure.....	73
<i>Frank A. Witzmann and Mark L. Witten</i>	
 Chapter 6 Immune Modulation by Dermal Exposure to Jet Fuel.....	103
<i>Gerardo Ramos and Stephen E. Ulrich</i>	
 Chapter 7 Absorption, Penetration, and Cutaneous Toxicity of Jet Fuels and Hydrocarbon Components.....	119
<i>James E. Riviere, Alfred O. Inman, and Nancy Monteiro-Riviere</i>	
 Chapter 8 Methods of Assessing Skin Irritation and Sensitization of Jet Fuels	135
<i>R. Jayachandra Babu, Ram Patlolla, and Mandip Singh</i>	

Chapter 9	Understanding Systemic and Local Toxicity of JP-8 after Cutaneous Exposures	149
	<i>James N. McDougal, James V. Rogers, and Richard Simman</i>	
Chapter 10	The Effects of Aerosolized JP-8 Jet Fuel Exposure on the Immune System: A Review	181
	<i>David T. Harris</i>	
Chapter 11	The Involvement of Poly(ADP-ribosylation) in Defense against JP-8 Jet Fuel and Other Chemical Toxicants	201
	<i>Luis A. Espinoza, Aria Attia, Eric M. Brandon, and Mark E. Smulson</i>	
Chapter 12	Evaluation of Methods Used to Generate and Characterize Jet Fuel Vapor and Aerosol for Inhalation Toxicology Studies	219
	<i>Raphaël T. Tremblay, Sheppard A. Martin, and Jeffrey W. Fisher</i>	
Chapter 13	Genetic Damage in the Blood and Bone Marrow of Mice Treated with JP-8 Jet Fuel	239
	<i>Vijayalaxmi</i>	
Chapter 14	Computational Analyses of JP-8 Fuel Droplet and Vapor Depositions in Human Upper Airway Models	247
	<i>Clement Kleinstreuer and Zhe Zhang</i>	
Chapter 15	Human Exposure to Jet Propellant-8.....	287
	<i>Raymond H. Tu and Terence H. Risby</i>	
Index		321
