European foreword.....	4
1 Scope.....	5
2 Normative references.....	5
3 Terms and definitions.....	5
4 Symbols and abbreviations.....	14
5 Requirements.....	14
5.1 Dimensions.....	14
5.2 Mechanical properties.....	14
5.2.1 Resistance to pressure, leak-tightness of the valve body assembly.....	14
5.2.2 Leak-tightness of the stem seal.....	14
5.2.3 Resistance of the valve body assembly to a bending moment.....	14
5.2.4 Resistance of the temperature selector to a torque.....	15
5.2.5 Resistance of the temperature selector to a bending moment.....	15
5.2.6 Exchange of the stem seal.....	15
5.3 Operating characteristics.....	15
5.3.1 Nominal flow rate and flow rate at S-1 K.....	15
5.3.2 Characteristic flow rate at the minimum and maximum setting of the temperature selector.....	15
5.3.3 Characteristic flow rate for thermostatic valves having a pre-setting facility.....	15
5.3.4 Sensor temperature at the minimum and maximum setting of the temperature selector.....	15
5.3.5 Hysteresis at the nominal flow rate.....	15
5.3.6 Differential pressure influence.....	15
5.3.7 Influence of the static pressure.....	16
5.3.8 Temperature difference between temperature point S and the closing and opening temperature respectively.....	16
5.3.9 Influence of ambient temperature on thermostatic valves with transmission elements.....	16
5.3.10 Water temperature effect.....	16
5.3.11 Response time.....	16
5.4 Endurance and temperature resistance.....	16
5.4.1 Mechanical endurance.....	16
5.4.2 Thermal endurance.....	16
5.4.3 Temperature resistance.....	16
6 Test apparatus and methods.....	17
6.1 Test apparatus.....	17
6.1.1 Apparatus to obtain the hydraulic data.....	17
6.1.2 Apparatus for testing the thermostatic valve and the integrated thermostatic valve in the water bath.....	18
6.1.3 Apparatus for testing the thermostatic valve in the air stream.....	19
6.2 Characteristic curves of thermostatic valves.....	20
6.2.1 Determination of the characteristic curves.....	20
6.2.2 Plotting of the theoretical curve.....	23
6.3 Testing of mechanical properties.....	24
6.3.1 Resistance to pressure, leak-tightness of the valve body assembly.....	24

6.3.2	Leak-tightness of the valve closed mechanically by means of the protection cap	24
6.3.3	Leak-tightness of the stem seal.....	25
6.3.4	Resistance of the valve body assembly to a bending moment	25
6.3.5	Resistance of the temperature selector to a torque.....	26
6.3.6	Resistance of the temperature selector to a bending moment	27
6.4	Testing of operating characteristics	28
6.4.1	Characteristic data	28
6.4.2	Endurance tests and temperature resistance test.....	31
6.5	Test schedule.....	32
7	Technical information to be published by the manufacturer	33
Annex A (normative) Thermostatic Radiator Valves — Dimensions and details on connection.....		36
A.1	General	36
A.2	Dimensions	36
A.3	Connection details.....	39
A.4	Materials for body, tailpiece and nut.....	40
A.5	Designation	40
A.6	Marking	40
A.7	Calculation of Control Accuracy — CA value	40
Annex B (informative) Degree of turbulence of the air current in a room		42
Annex C (informative) Test block for thermostatic integrated valves		43
Bibliography		44
