Engineering Notes on Concepts of the Finite Element Method for Elliptic Problems	1
Jörg Schröder	
Sensitivity Analysis Based Automation of Computational Problems	41
Jože Korelc and Teja Melink	
Equilibrated Stress Reconstruction and a Posteriori Error Estimation for Linear Elasticity	69
Fleurianne Bertrand, Bernhard Kober, Marcel Moldenhauer and Gerhard Starke	
A Concept for the Extension of the Assumed Stress Finite Element Method to Hyperelasticity	107
Nils Viebahn, Jörg Schröder and Peter Wriggers	
A Fully Nonlinear Beam Model of Bernoulli–Euler Type	127
Paulo de Mattos Pimenta, Sascha Maassen, Cátia da Costa e Silva and Jörg Schröder	
Isogeometric Analysis of Solids in Boundary Representation	153
Sven Klinkel and Margarita Chasapi
