Preface xiii

The Authors xv

Symbols xvii

1. Fundamental Concepts 1

 Learning Goals 1

 1.1 Introduction 1

 1.2 Thermodynamic Systems 2

 1.2.1 Application of System Concept 3

 1.3 Basic Thermodynamics Concepts and Properties 4

 1.3.1 Temperature 6

 1.4 Force and Mass 19

 1.4.1 English System 19

 1.4.2 SI System 21

 1.5 Elementary Kinetic Theory of Gases 26

 1.6 Pressure 31

 1.6.1 Dead-Weight Piston Gauge 40

 1.6.2 Manometer 42

 1.6.3 Micromanometer 46

 1.6.4 Barometers 48

 1.6.5 McLeod Gauge 48

 1.6.6 Pressure Transducer 52

 1.7 Review 57

 Key Terms 58

 Equations Developed in This Chapter 59

 Questions 59

 Problems 60

2. Work, Energy, and Heat 67

 Learning Goals 67

 2.1 Introduction 67

 2.2 Work 68

 2.3 Energy 71

 2.4 Internal Energy 72

 2.5 Potential Energy 72

 2.6 Kinetic Energy 76

 2.7 Heat 80

 2.8 Flow Work 81

 2.9 Nonflow Work (Moving Boundary Work) 84

 2.10 Cyclic Processes 90

 2.11 Review 90

 Key Terms 91

Equations Developed in This Chapter.....	91
Questions	92
Problems.....	92
3. Properties of Liquids and Vapors	99
Learning Goals	99
3.1 Introduction	99
3.2 Liquids and Vapors.....	100
3.3 Thermodynamic Properties of Steam	105
3.4 Computerized Properties.....	124
3.5 Thermodynamic Diagrams	128
3.6 Review	136
Key Terms	137
Equations Developed in This Chapter.....	137
Questions	138
Problems.....	138
4. First Law of Thermodynamics.....	141
Learning Goals	141
4.1 Introduction	141
4.2 First Law of Thermodynamics.....	142
4.3 Nonflow System (Closed System)	143
4.3.1 Processes of Nonflow System (Closed System)	148
4.4 Steady-Flow (Open) System.....	155
4.4.1 Conservation of Mass—Continuity Equation	155
4.4.2 Steady-Flow Energy Equation.....	160
4.4.3 Bernoulli Equation.....	165
4.4.4 Specific Heat	166
4.5 Applications of First Law of Thermodynamics in Steady-Flow Systems	168
4.5.1 Turbine.....	168
4.5.2 Pipe Flow.....	174
4.5.3 Boiler.....	176
4.5.4 Nozzle.....	178
4.5.5 Throttling Process	181
4.5.6 Heat Exchanger	182
4.5.7 Filling a Tank.....	186
4.6 Review	187
Key Terms	188
Equations Developed in This Chapter.....	188
Questions	189
Problems.....	190
5. Second Law of Thermodynamics.....	201
Learning Goals	201
5.1 Introduction	202
5.2 Reversibility—Second Law of Thermodynamics.....	203
5.3 The Carnot Cycle.....	205
5.4 Entropy	217
5.5 Entropy as Property in the Analysis of Thermodynamic Systems	232

5.5.1	Throttling in Open/Steady-Flow Systems	232
5.5.2	Constant-Volume Process (Isometric Process) in Closed Systems.....	234
5.5.3	Adiabatic Processes in Steady-Flow Open Systems.....	239
5.5.4	Constant-Pressure Process (Isobaric Process) in Steady-Flow Open Systems	244
5.5.5	Constant-Temperature Process (Isothermal Process) in Steady-Flow Open Systems	245
5.6	Review	247
	Key Terms	248
	Equations Developed in This Chapter.....	248
	Questions	249
	Problems.....	250
6.	The Ideal Gas	259
	Learning Goals	259
6.1	Introduction	259
6.2	Basic Considerations.....	260
6.3	Specific Heat.....	267
6.4	Entropy Changes of Ideal Gas.....	278
6.5	Nonflow (Closed System) Gas Processes	283
6.5.1	Constant-Volume Process (Isometric Process).....	284
6.5.2	Constant-Pressure Process (Isobaric Process).....	287
6.5.3	Constant-Temperature Process (Isothermal Process)	289
6.5.4	Constant-Entropy Process (Isentropic Process)	292
6.5.5	Polytropic Process.....	296
6.6	The <i>Gas Tables</i>	303
6.7	Steady-Flow Gas Processes	307
6.7.1	Constant-Specific Volume Process	308
6.7.2	Constant-Pressure Process	309
6.7.3	Constant-Temperature Process	310
6.7.4	Isentropic Process	310
6.7.5	Polytropic Process.....	311
6.8	Real Gases	313
6.9	Frictional Effects.....	314
6.10	Review	316
	Key Terms	317
	Equations Developed in This Chapter.....	317
	Questions	319
	Problems.....	320
7.	Mixtures of Ideal Gases	329
	Learning Goals	329
7.1	Introduction	329
7.2	Pressure of a Mixture	330
7.3	Volume of a Mixture.....	335
7.4	Mixture Composition	339
7.5	Thermodynamic Properties of a Gas Mixture.....	342
7.6	Air–Water Vapor Mixtures	348
7.7	Thermodynamic Properties of Air–Water Vapor Mixtures.....	355

7.8	Psychrometric Chart.....	356
7.9	Air Conditioning.....	371
7.10	Review	376
	Key Terms	377
	Equations Developed in This Chapter.....	378
	Questions	379
	Problems.....	380
8.	Vapor Power Cycles and Alternative Power Systems.....	387
	Learning Goals	387
8.1	Introduction	388
8.2	Carnot Cycle	388
8.3	The Rankine Cycle.....	389
8.3.1	Process 1–2	391
8.3.2	Process 2–3.....	391
8.3.3	Process 2–4.....	391
8.3.4	Process 4–5.....	392
8.3.5	Process 5–1	393
8.4	Rating of Power-Plant Cycles	398
8.5	The Reheat Cycle	401
8.6	The Regenerative Cycle	404
8.7	The Steam Generator	414
8.8	The Steam Turbine	415
8.9	Cogeneration.....	417
8.10	Direct Energy Conversion.....	419
8.10.1	Thermoelectrical Converter.....	420
8.10.2	Fuel Cell.....	421
8.10.3	Thermionic Converter	423
8.10.4	Magnetohydrodynamic Generator.....	424
8.10.5	Solar Energy	425
8.10.6	Wind Power	427
8.10.7	Waste-to-Energy Resource Recovery	429
8.10.8	Geothermal Energy	430
8.10.9	Nuclear Power	430
8.10.10	Motion-Generated Energy	431
8.11	Review	432
	Key Terms	432
	Equations Developed in This Chapter.....	433
	Questions	433
	Problems.....	434
9.	Gas Power Cycles.....	441
	Learning Goals	441
9.1	Introduction	442
9.2	Air-Standard Analysis of the Otto Cycle.....	448
9.3	Diesel Engine (Compression Ignition Engine).....	460
9.4	Air-Standard Analysis of the Diesel Cycle.....	463
9.5	Automotive Engine Analysis	468

9.6	Brayton Cycle.....	471
9.7	Air-Standard Brayton Cycle Analysis.....	473
9.8	The Dual Combustion Cycle (The Dual Cycle).....	484
9.9	Stirling Cycle and Ericsson Cycle (Regeneration)	485
9.10	Review	486
	Key Terms	487
	Equations Developed in This Chapter.....	488
	Questions	489
	Problems.....	490
10.	Refrigeration.....	495
	Learning Goals	495
10.1	Introduction	496
10.2	Reversed Carnot Cycle	496
10.3	Defined Ratings.....	500
10.4	Refrigeration Cycles.....	502
	10.4.1 Vapor-Compression Cycle	503
	10.4.2 Gas-Cycle Refrigeration	516
	10.4.3 Absorption Refrigeration Cycle	520
	10.4.4 Vacuum Refrigeration Cycle.....	522
	10.4.5 Thermoelectric Refrigerator	525
10.5	Compressors	526
	10.5.1 Volumetric Efficiency of Compressor	529
10.6	The Heat Pump.....	531
10.7	Review	535
	Key Terms	536
	Equations Developed in This Chapter.....	537
	Questions	538
	Problems.....	538
11.	Heat Transfer	545
	Learning Goals	545
11.1	Introduction	546
11.2	Conduction.....	547
11.3	Convection	565
	11.3.1 Natural Convection	567
	11.3.2 Forced Convection	574
11.4	Radiation	577
11.5	Heat Exchangers.....	589
11.6	Combined Modes of Heat Transfer	602
11.7	Cooling Electronic Equipment.....	603
11.8	Analysis of Fins	604
11.9	Heat Pipes.....	606
11.10	Review	607
	Key Terms	608
	Equations Developed in This Chapter.....	609
	Questions	611
	Problems.....	612

Appendix 1: Answers to Even-Numbered Problems..... 621

Appendix 2: Supplemental Tables..... 637

Bibliography..... 829

Index 833
