1 A Comprehensive Study on Cloud Computing and its Security Protocols and Performance Enhancement Using Artificial Intelligence

1

Srinivasa Rao Gundu, Charanarur Panem and J. Vijaylaxmi

1.1	Introduction	2
1.2	Aim of the Study	2
1.3	Architecture of Cloud Computing	3
1.4	The Impact of Cloud Computing on Business	4
1.5	The Benefits of Cloud Computing on Business	5
1.6	Generic Security Protocol Features	5
1.7	Cloud Computing Security Protocol Design	6
1.7.1	Protocol for File Transfer (FTP)	6
1.7.2	Local User Authentication Protocol (LUAP)	7
1.7.3	Protocol for Consumption	7
1.7.4	Remote User Authentication Protocol	7
1.7.5	Secure Cloud Transmission Protocol	8
1.7.6	Protocol for Cloud Trust	8
1.7.7	Protocol for Secure Single-Sign-On	9
1.7.8	Secure Session Protocol (SSP)	9
1.7.9	Protocol for Authorization	10
1.7.10	Protocol for Key Management	10
1.8	AI Based Cloud Security	12
1.8.1	Event Detection and Prevention	13
1.8.2	Delegate to Automated Technology	13
1.8.3	Machine Learning Algorithms in Cloud Computing	14
1.9	Various Neuronal Network Architectures and Their Types	14
1.10	Conclusion	15
	Acknowledgement	15
	References	15

2	The Role of Machine Learning and Artificial Intelligence in Detecting the Malicious Use of Cyber Space	19
	<i>Charanarur Panem, Srinivasa Rao Gundu and J. Vijaylaxmi</i>	
2.1	Introduction	20
2.2	Aim of the Study	21
2.3	Motivation for the Study	21
2.4	Detecting the Dark Web	23
2.5	Preventing the Dark Web	24
2.6	Recommendations	28
2.7	Conclusion	30
	Acknowledgement	31
	References	31
3	Advanced Rival Combatant LIDAR-Guided Directed Energy Weapon Application System Using Hybrid Machine Learning	33
	<i>Srinivasa Rao Gundu, Charanarur Panem, J. Vijaylaxmi and Aishvarya Dave</i>	
3.1	Introduction	34
3.2	Aim of the Study	35
3.3	Motivation for the Study	35
3.4	Nature of LASERS	37
3.5	Ongoing Laser Weapon Projects	38
3.6	Directed Energy Weapons (DEWs)	39
3.7	LIDAR Guided LASER Weapon System (LaWS)	
	Requirements	41
3.8	Methodology	41
3.9	Conclusion	44
	Acknowledgement	44
	References	44
4	An Impact on Strategic Advancement and Its Analysis of Training the Autonomous Unmanned Aerial Vehicles in Warfare [Theme - RPA and Machine Learning]	47
	<i>Srinivasa Rao Gundu, Charanarur Panem and J. Vijaylaxmi</i>	
4.1	Introduction	48
4.2	Aim of the Study	49
4.3	Motivation for the Study	50
4.4	Supervised and Unsupervised Machine Learning for UAVs	50
4.4.1	Supervised Learning Overview	51
4.4.2	Overview of Unsupervised Learning	52

4.4.3	Supervised and Unsupervised UAV-Based Solution Problems	53
4.5	Unsupervised Solution	54
4.5.1	Estimation of Channel	54
4.5.2	Detection of UAVs	55
4.5.3	Imaging for Unmanned Aerial Vehicles	56
4.6	Conclusion	57
4.7	Scope for the Future Work	58
	Acknowledgement	58
	References	58
5	FLASH: Web-Form's Logical Analysis & Session Handling Automatic Form Classification and Filling on Surface and Dark Web	61
	<i>Ashwini Dalvi, Viraj Thakkar, Smit Moradiya, Aditya Vedpathak, Irfan Siddavatam, Fark Kazi and S.G. Bhirud</i>	
5.1	Introduction	62
5.2	Literature Review	63
5.2.1	Notable Approaches	64
5.2.1.1	Crawling the Hidden Web	64
5.2.1.2	Google's Deep Web Crawl	64
5.2.1.3	Other Approaches	65
5.3	How FLASH Offers Better Results	75
5.4	Methodology	75
5.4.1	Form Identification and Field Extraction	78
5.4.1.1	Form Identification	78
5.4.1.2	Extraction of Fields	79
5.4.2	Form HTML Tag Interpretation	79
5.4.2.1	Identification of Form Type	79
5.4.2.2	Identification of Request Method	80
5.4.3	Interpretation of Form Fields	80
5.4.4	Form Classification	81
5.4.5	Generation and Sending of Request with Appropriate Data	83
5.4.5.1	Generation of the Request	83
5.4.5.2	Sending the Request	83
5.5	Results	84
5.5.1	Classification of Forms	84
5.5.2	Dataset	84

5.5.2.1	Manual	84
5.5.2.2	Automated	85
5.5.3	Accuracy Measures	85
5.5.4	Manual Dataset	86
5.5.4.1	Form Classification	87
5.5.4.2	Form Filling	91
5.5.5	Automated Datasets	92
5.5.5.1	Form Classification	93
5.5.5.2	Form Input-Tag Inference	93
5.6	Limitations and Future Work	96
5.6.1	Limitations	96
5.6.2	Future Work	96
5.7	Conclusion	97
	References	97
6	Performance Analysis of Terahertz Microstrip Antenna Designs: A Review	101
	<i>Ram Krishan</i>	
6.1	Introduction	101
6.2	Microstrip Antenna Design	103
6.2.1	Feeding Methods	104
6.3	Challenges of Terahertz Antenna Development	105
6.4	Antenna Performance Attributes	106
6.5	Comparative Analysis of Microstrip THZ Antennas	107
6.6	Conclusion	109
	References	109
7	Smart Antenna for Home Automation Systems	113
	<i>Manish Varun Yadav and Swati Varun Yadav</i>	
7.1	Introduction	114
7.2	Home Automation Antenna Geometry and Robotics Process Automation	115
7.3	Results for Home Automation Smart Antenna	118
7.4	Conclusion	121
	References	122
8	Special Military Application Antenna for Robotics Process Automation	125
	<i>Manish Varun Yadav and Swati Varun Yadav</i>	
8.1	Introduction	126
8.2	Special Military Application Antenna for Robotics Process Automation	127

8.3	Results for Special Military Application Antenna	130
8.4	Conclusion	136
	References	136
9	Blockchain Based Humans-Agents Interactions/Human-Robot Interactions: A Systematic Literature Review and Research Agenda	139
	<i>Faizal Kureshi, Dhaval Makwana, Umesh Bodkhe, Sudeep Tanwar and Pooja Chaturvedi</i>	
9.1	Introduction	139
9.2	Conceptual Foundation	143
9.2.1	Blockchains	143
9.2.2	Cryptocurrencies	145
9.2.3	Smart Contracts	146
9.2.4	Decentralized Identity	146
9.3	Motivation	147
9.4	Blockchain and Robotics Overview	148
9.5	Human-Robot Interaction	149
9.5.1	Games	149
9.5.2	Commitment Strategies and Conditioning	152
9.6	Applications of HRI	153
9.6.1	HRI Application in Industry	153
9.6.2	HRI in Rehabilitation and Medical	153
9.6.3	HRI in Agriculture	155
9.6.4	Robochains	155
9.7	Transactions between Robots and Human Beings	156
9.7.1	A Ledger that is Decentralized, Immutable, and Publicly Verifiable	156
9.7.2	Contracts	156
9.8	Escrow Services	158
9.9	Challenges for HRI	159
9.9.1	Task Dynamic Analysis	159
9.9.2	Teaching a Robot and Avoiding Unintended Consequences	159
9.9.3	Connecting Mutual "Mental" Models to Prevent Working in Conflict	160
9.9.4	Role of Robots in Education	160
9.9.5	Lifestyle, Fears, and Human Values	161
9.10	Discussion and Future Work	161
9.11	Conclusion	163
	References	164

10 Secured Automation in Business Processes	167
<i>Ambika N.</i>	
10.1 Introduction	168
10.2 Literature Survey	169
10.3 Background	174
10.4 Proposed Model	175
10.4.1 Disadvantages of Previous System	176
10.5 Analysis of the Work	177
10.6 Conclusion	178
References	179
11 Future of Business Organizations Based on Robotic Process Automation: A Review	181
<i>P. William, Sonal C. Bhangale, Harshal P. Varade and Santosh Kumar Sharma</i>	
11.1 Introduction	182
11.2 Literature Review	182
11.3 Technology: A Need of Robotic Process Automation	185
11.3.1 Benefits of Robotic Process Automation	185
11.3.2 Drawbacks of Robotic Process Automation	186
11.4 Business Enterprise	186
11.5 Conclusion and Future Scope	186
References	187
12 Comparative Overview of FER Methods for Human-Robot Interaction Using Review Analysis	189
<i>Jitendra Sheetlani, Mohit Kadwal, Sumanshu Sharma, Sanat Jain and Shrikant Telang</i>	
12.1 Introduction	190
12.2 FER Method Review Based Analysis	191
12.2.1 AdaBoost Method	191
12.3 Feature Extraction Techniques	191
12.3.1 Haar Classifier Method	192
12.3.2 Geometric-Based Method	192
12.3.3 Appearance-Based Method	193
12.4 Conclusion	194
References	195
13 Impact of Artificial Intelligence on Medical Science Post Covid 19 Pandemic	197
<i>Yash Aryaman and Amit Kumar Tyagi</i>	
13.1 Introduction	198

13.2	Types of AI Relevant to Healthcare	198
13.2.1	Machine Learning - Neural Networks and Deep Learning	198
13.2.2	Natural Language Processing	199
13.2.3	Rule-Based Expert System	200
13.2.4	Physical Robots	200
13.2.5	Robotic Process Automation	201
13.3	Diagnosis and Treatment Application	201
13.4	Limitation of Artificial Intelligence in Medical Science	203
13.4.1	Data Availability	203
13.4.2	One-Sided Data	204
13.4.3	Data Preprocessing	204
13.4.4	Selection of Model	204
13.4.5	Presenting Biased Model	205
13.4.6	Fragmented Data	205
13.4.7	Black Boxes	205
13.5	The Future of AI in Healthcare	205
13.6	Conclusion	206
	References	207
14	Revolutionizing Modern Automated Technology with WEB 3.0	211
	<i>Shishir Shrivastava and Amit Kumar Tyagi</i>	
14.1	Introduction	211
14.2	What is WEB 3.0: Definitions	212
14.3	Features & Characteristics	213
14.3.1	Rewarding Cryptocurrency	213
14.3.2	Interconnection-Exchange & Use of Info	214
14.3.3	Metaverse	214
14.3.4	Personalization	214
14.3.5	Semantic Web	215
14.4	Implementation	215
14.4.1	The Three Dimensional Web	215
14.4.2	Decentralized Technology	216
14.4.3	The Social Web	216
14.4.4	Prevalent and Omnipresent WEB	217
14.4.5	Multi-Media Web	217
14.5	Inventions around Modern Technology	218
14.5.1	A.I. Powered Search Engine	218
14.5.2	Touring and Travelling	219
14.5.3	Gaming Advancements	219
14.5.4	E-Learning with Virtual Documentary	220

14.6	Conclusion	221
	Acknowledgement	221
	References	221
15	The Role of Artificial Intelligence, Blockchain, and Internet of Things in Next Generation Machine Based Communication	225
	<i>R. Harish, Sanjana Chelat Menon and Amit Kumar Tyagi</i>	
15.1	Introduction	226
15.2	Blockchain	227
15.3	Internet of Things	229
15.4	Convergence of Blockchain, Internet of Things, and Artificial Intelligence	231
15.5	Block Chain for Vehicular IoT	235
15.6	Convergence of IoT with Cyber-Physical Systems	236
15.7	Conclusion	238
	References	239
16	Robots, Cyborgs, and Modern Society: Future of Society 5.0	243
	<i>Shashank Sharma, Sanjana Chelat Menon and Amit Kumar Tyagi</i>	
16.1	Introduction	244
16.2	Comparing Humans, Cyborgs, and Robots	244
16.3	Some Philosophical Aspects	246
16.4	Reproduction or Replication	246
16.5	Future of our Society	247
	16.5.1 Eugenics or Genetic Engineered Humans	249
	16.5.2 Why Do We Need Cyborgs?	250
16.6	Implications	252
	16.6.1 Opportunity vs Exploitation	252
	16.6.2 Utopia vs Dystopia	253
	16.6.3 Emancipation vs Extermination	253
16.7	Conclusion	254
	References	256
17	Security and Privacy of Blockchain-Based Robotics System	259
	<i>Pratham Jaiswal and Amit Kumar Tyagi</i>	
17.1	Introduction	260
17.2	Security and Privacy Concerns	262
	17.2.1 Double Spending	262
	17.2.2 Vulnerable Wallets	262
	17.2.3 Cyber-Attacks	262
	17.2.4 Sybil Attack	263

17.2.5	Selfish Mining	263
17.2.6	51 Percent Attacks	263
17.3	Security and Privacy Requirements	263
17.3.1	Integrity of Data	263
17.3.2	Tamper-Resistant Data	264
17.3.3	Preventing Double-Spending	264
17.3.4	Anonymous User Identities	264
17.3.5	Transaction Unlinkability	264
17.3.6	Transaction Confidentiality	264
17.3.7	DDoS Attack Resistant	264
17.3.8	51% Attack Resistant	265
17.4	Consensus Algorithms	265
17.4.1	Proof of Work (PoW)	265
17.4.2	Practical Byzantine Fault Tolerance (pBFT)	266
17.4.3	Proof of Stake (PoS)	266
17.4.4	Proof of Burn (PoB)	267
17.4.5	Proof of Capacity (PoC)	267
17.5	Privacy and Security Techniques	270
17.5.1	Change Addresses	270
17.5.2	Coin Mixing	270
17.5.3	Ring Signatures	271
17.5.4	Homomorphic Encryption	271
17.5.5	Zero-Knowledge Proofs (zk-Proofs)	271
17.6	Conclusion	272
	References	272
18	Digital Footprints: Opportunities and Challenges for Online Robotic Technologies	275
