

Table of Contents

<i>Foreword by Frédérick Bordry</i>	xi
A welcome at CERN's entrance	1
Interview with Bernard Pellequer: Presentation of CERN	6
The exhibition "Universe of Particles"	10
A brief history of CERN	19
Interview with Arnaud Marsollier: CERN Funding	22
Entering CERN	27
LINAC 2 and LEIR	31
The antimatter factory	33
The cryomagnets test facility	36
Interview with Elias Métral: Beam instabilities	39
Interview with Django Manglunki: CERN Control Centre	45
A brief overview of the research conducted by ATLAS	50
Arrival at building 40	51
Description of the ATLAS detector	54
Building 40	57
Interview with Isabelle Wingerter: ATLAS France	64
The ATLAS Weekly meeting	68
The trigger system	71

Interview with Laurent Serin: Test beam in Prévessin	73
The AMS, Alpha Magnetic Spectrometer.....	87
The self-service meal.....	91
Standard Model and Higgs boson.....	95
The Auditorium	100
The panoramic terrace of building 500	104
Visit of buildings 1, 4, 5, 52 and 53	106
CERN clubs and cordiality of coffee.....	111
A brief history of the search for the Higgs boson.....	114
Interview with Mélissa Gaillard: The Worldwide LHC Computing Grid.....	118
The Computing Centre	122
Interview with David Rousseau: Machine learning and particle physics.....	126
Interview with Alvaro Lopez Solis: Shifts on the ATLAS detector.....	131
The ATLAS control room.....	135
The ATLAS detector	138
Prospects for the future.....	144
