Structural Dynamics – EURODYN'93, Moan et al. (eds) © 1993 Balkema, Rotterdam, ISBN 90 5410 336 1

Table of contents

6 *Computational nonlinear vibrations*

Nonlinear analysis of frames subject to lateral torsional instability 603
B.A.Izzuddin

Earthquake response of space structures with strain-hardening 609
Yong Bai & Hua Peng

The influence of rate-sensitivity on the response of steel frames 617
B.A.Izzuddin & A.S.Elnashai

Sheet metal forming simulation using explicit finite element methods 625
K.B.Nielsen, N.Brännberg & L.Nilsson

Parallel computing for nonlinear dynamic analysis 635
J.D.Wörner & H.-W.Nordhues

Nonlinear instability of structures subjected to impact loading 641
A.N.Kounadis, C.Gantes & G.J.Simitses

Nonlinear steady state vibrations of beams with internal resonances 651
R.Lewandowski

A BEM approach to non-linear vibrations of plates 659
J.T.Katsikadelis, M.S.Nerantzaki & C.B.Kandilas

Boundary element dynamic response analysis of viscoplastic plates 673
C.P.Providakis & D.E.Beskos

7 *Stochastic response*

Nonlinear deterministic and random oscillations of cubic dynamical systems 681
I.Senjanović, Y.Fan & A.Francescutto

Transient chaotic dynamics of nonlinear structures 689
M.S.Soliman

Stochastic stability of systems with random properties 697
C.G.Bucher

Stochastic dynamics of linear structures with random stiffness properties and random lamping subject to random loading 705
I.U.Köylüoğlu & S.R.K.Nielsen

Approximate solution for the response of a layered stochastic linear soil to a dynamic excitation at the surface 713
H.Grundmann & H.Waubke

Spectral moment calculation for random vibration analysis 721
C.Floris

Maximum peak of the response of structures under stochastic loads 729
S.Caddemi, M.Di Paola & M.Vasta

The effect of Coulomb damping on the response statistics of a SDOF oscillator subjected to white noise excitation 735
J.M.Johnsen & A.Næss

Stochastic vibration of a machine foundation with rheological effects 743
P.Śniady, R.Sieniawska, A.Wysocka & S. Żukowski

Methods for reliability assessment of nonlinear systems under stochastic loading – A review 751
G.I.Schuëller, H.J.Pradlwarter & M.D.Pandey

Numerical study of randomly excited response of non-classically damped systems 761
D.Bryja, R.Chrobok & W.Mironowicz

8 *Cyclic behaviour*

Experimental observation on fatigue of steel members and elements under very low load-cycles 771
S.Iwai, T.Nonaka, Yeon-Soo Park & H.Kameda

Modelling of cyclic elastoplastic behaviour of metal structures 779
O.S.Hopperstad & S.Remseth

Buckling/plastic behaviour of plates under inplane cyclic loading 787
T.Yao, M.Fujikubo & Chun Nie

Dynamic creep behaviour of structures 795
D.V.Breslavsky, O.K.Morachkovsky & A.A.Zolochevsky

9 *System identification*

The state of the art of system identification – Emphasizing nonlinear systems and applications 805
H.G.Natke

Multivariate Autoregressive model and its application in modal parameter identification of structures 811
G.De Roeck & Xia He

On the use of reduced models in linear system identification 819
N.Cottin

System identification from earthquake records when base input is unknown 827
D.Benedetti & C.Gentile

System identification of structures exposed to environmental loads 835
C.Hoen, T.Moan & S.Remseth

Dynamic identification of railroad track model parameters 845
J.Langer, M.Klasztorny & P.Ruta

The dynamics of a mediaeval town wall, replaced on a flexible foundation in the station hall of the new railway tunnel in Rotterdam 851
B.de Ruiter & P.J.van Os

10 *Vibration control*

Mitigating structural vibrations with semi-active control 861
W.N.Patten, H.C.Wu, W.Yen, R.L.Sack, C.Mo & A.Ebrahimpour

Predictive control of AMDs 869
R.Andrade, F.López-Almansa & J.Rodellar

11 *Buildings*

On the non-linear dynamic characteristics of structural elements at high amplitudes of vibration 879
B.R.Ellis

Resonant vibrations of a steel industrial building under wind load 887
M.Kasperski

Behavior and modeling of r/c column – Flat slab joints 895
D.N.Farhey, D.Z.Yankelevsky & M.A.Adin

Modelling of shear wall cores under earthquake loading using equivalent frames 901
H.Xenidis, A.Athanatopoulou & I.E.Avramidis

Experimental study on the dynamic behaviour of early unformed reinforced concrete beams 911
F.López Almansa, J.R.Casas, I.Serrà & J.A.Canas

The role of experimental torsional modes in modelling of existing framed structures 919
P.Foraboschi, S.Sorace & A.Vignoli

12 *Traffic on bridges and stadia*

Dynamic calculation of a concrete highway bridge over the Danube in Bratislava 929
J.Melcer & A.Daněk

Investigation of the dynamic behaviour of cable stayed bridges under traffic 937
B.Hoffmeister, J.Lopetegui & G.Sedlacek

Dynamic bridge testing in Quebec 943
J.Proulx, D.Hébert & P.Paultre

Dynamics of bridge-vehicle interaction 951
M.Fafard, Mallikarjuna & M.Savard

Vehicle/bridge dynamic interaction for highway bridges 961
R.Cantieni

European load model for road bridges 969
G.Merzenich & G.Sedlacek

Man induced vibrations of a stand structure 977
M.Kasperski & H.J.Niemann

Spectator-induced vibration of Maracanã football stadium 985
R.C.Batista & C.Magluta

13 *Wind on bridges*

Theoretical and experimental dynamic behaviour of the Alamillo cable-stayed bridge in Sevilla, Spain 995
J.R.Casas & A.C.Aparicio

Vortex-induced response of bridges and control by tuned mass dampers 1003
A.Larsen

Wind tunnel studies for a proposed suspension bridge across the Hardanger fjord 1011
E.Hjorth-Hansen, E.Strømmen, J.Bogunović Jakobsen, H-P.Brathaug & E.Solheim

Rain-wind induced vibration of cables 1019
O.Flamand

Modal coupling effects on cable-stayed bridge flutter 1027
M.S.Pfeil & R.C.Batista

Dynamic response of structures to wind turbulence 1035
M.Attou & G.Grillaud

Simulation of the dynamic behaviour of long span bridges under wind with the method of multibody systems 1043
H.Ruscheweyh, M.Hortmanns & D.Neuenhaus

Reliability updating of a cable-stayed bridge during construction based on measured dynamic response 1051
R.M.Larssen, B.J.Leira & S.N.Remseth

Vibration of slender wood bridges 1059
A.Jutila & A.Tesár

A long span footbridge: Computations and tests 1067
P.Krysl, M.Studničková & J.Král

The dynamic behaviour of mechanical movable bridges 1075
P.H.Waarts

14 *Wind on towers*

Vibrations of a circular cylinder in the wake of a larger cylinder 1083
G.Moe, T.Domben & P.E.Steen

The Frøya data base for gale force maritime wind 1091
O.J.Andersen & J.Løvseth

A comparative analysis of cooling tower response to wind 1099
C.Borri, F.Crocchini, L.Galano & V.Gusella

Wind loading and fatigue of steel framed masts 1107
P.C.van Staalduinen

Computation of artificial stochastic wind loads and interaction forces on oscillating line-like structures 1115
R.Höffer & H.-J.Niemann

Stochastic response of a transmission line tower subjected to dynamic loading 1123
C.E.Brenner, C.G.Bucher & R.C.Ramos de Menezes

Stochastic characteristics of vortex shedding at a 230 m high concrete chimney 1131
R.J.Scherer

15 *Coastal and offshore structures*

A contribution to the numerical simulation of caisson breakwaters 1141
M.Lengnick & E.Stein

Wave-induced resonance of a flap-gate barrier 1149
T.H.G.Jongeling

Dynamic response to breaking wave impacts 1157
G.U.Müller & T.J.T.Whittaker

Stochastic dynamic time domain analysis of drag-dominated offshore platforms 1165
D.Karunakaran, N.Spidsøe, O.T.Gudmestad & T.Moan

Method for determining damping coefficients on an offshore platform 1175
J.L.Black

Dynamic excitation of offshore pipelines resting on very uneven seabeds 1181
L.Vitali, F.Marchesani, G.Curti & R.Bruschi

A simplified method for assessing the 3-D structural behaviour of free spanning sealines exposed to steady currents 1191
F.Tura, L.Ursini & M.B.Bryndum

16 *Dams*

Nonlinear reservoir-dam interaction by way of the hybrid frequency-time domain procedure 1203
G.R.Darbre

Study of the dynamic behaviour of the Alto Lindoso dam 1211
R.C.Câmara, S.B.Oliveira & A.C.Portugal

3D seismic soil-fluid-structure interaction for arch dams including source and site effects 1217
D.Clouteau & D.Aubry

On the effect of water compressibility on the seismic response of realistic gravity dam-reservoir systems 1225
A.Tzamtzis & B.Nath

Author index 1233
