

CONTENTS

1. INTRODUCTION	11
2. SUSTAINABLE SOIL USE AND MANAGEMENT	13
2.1. Soil related legal instruments and soil governance	14
2.2. The multifunctional value of soil. Soil condition and soil quality	15
2.3. Soil quality indicators	16
2.4. Trends in modern agriculture – optimal use of soil resources.....	19
2.4.1. Conservation agriculture.....	19
2.4.2. Precision agriculture	20
2.4.3. Organic farming.....	21
2.4.4. Good agricultural practice	21
2.4.5. Agroforestry (agroforestry system)	22
2.5. Sustainable soil fertilisation.....	23
2.5.1. Sustainable nitrogen fertilisation. The cost of reducing ammonia emissions.....	23
2.5.2. Shaping soil organic carbon levels (sequestration) and climate change	26
2.5.3. Soil pH regulation.....	28
2.5.4. Soil water storage.....	28
2.6. Soil as an environment.....	30
2.6.1. Interdisciplinary perspective of soil research	30
2.6.2. Soil degradation	32
2.6.3. Reducing the negative impact of industry on the soil environment ..	34
2.7. Ecological soil biodiversity	34
Bibliography	36
3. SUSTAINABLE APPROACH TO WATER CONSUMPTION.....	41
3.1. Water scarcity in Europe	41
3.2. Anthropogenic pollution of water resources	44
3.2.1. Inorganic compounds.....	46
3.2.2. Organic micropollutants – contaminants of emerging concern.....	48
3.2.3. Microplastics.....	52

3.3.	Proper water management	54
3.4.	Water supply systems	55
3.5.	Summary.....	57
	Bibliography	58
4.	SUSTAINABLE WASTEWATER TREATMENT AND MANAGEMENT ..	70
4.1.	Introduction/history of the wastewater treatment	70
4.2.	Municipal wastewater characteristics	72
4.3.	Nutrients – from removal to recovery	73
4.3.1.	Nitrogen removal	73
4.3.2.	Phosphorus removal.....	81
4.3.3.	Nutrients recovery.....	85
4.4.	Micropollutants.....	87
4.5.	Future of the Wastewater Treatment Plant – the biorefinery concept.....	88
4.5.1.	Wastewater treatment plant – towards energy neutrality	88
4.5.2.	The Biorefinery concept	90
	Bibliography	91
5.	SUSTAINABLE WASTE MANAGEMENT	96
5.1.	Rational waste management	98
5.1.1.	Waste management hierarchy	100
5.1.2.	Waste processing methods.....	102
5.1.3.	Circular Economy	105
5.2.	Responsible Consumer	107
5.2.1.	Zero Waste Philosophy	108
5.2.2.	Less waste	109
5.2.3.	Environmental education	110
5.3.	Sustainable production.....	111
5.3.1.	Circular business models	112
5.3.2.	Business model divisions in the circular economy	113
5.3.3.	Business model examples in companies	118
5.4.	Summary	122
	Bibliography	123
6.	AMBIENT AIR – POLLUTANTS, EMISSIONS, REGULATIONS, STATE OF QUALITY.....	127
6.1.	Health risks of air pollution	127
6.2.	Human health effect of pollutants.....	131
6.2.1.	Particulate matter	131
6.2.2.	Heavy metals.....	132

6.2.3. Polycyclic aromatic hydrocarbons.....	132
6.2.4. Non-Methane Volatile Organic Compounds	133
6.2.5. Nitrogen oxides.....	133
6.2.6. Sulfur dioxide	134
6.2.7. Carbon monoxide.....	134
6.2.8. Ground-level ozone.....	134
6.3. Sources of air pollution.....	135
6.4. Air quality standards.....	137
6.5. Ambient air quality	137
6.6. Greenhouse gas emissions	138
6.7. Air quality improvement.....	142
6.8. Summary	143
Bibliography	144
7. INDOOR ENVIRONMENT AND SUSTAINABLE BUILDINGS	151
7.1. Sustainable building and IEQ standards	152
7.2. IEQ factors.....	155
7.2.1. Thermal comfort	155
7.2.2. Indoor air quality	156
7.3. Life cycle assessment	157
7.3.1. Environmental life cycle assessment	158
7.3.2. Life cycle costing.....	159
7.3.3. Social life cycle assessment.....	159
7.4. Standard of buildings in Poland.....	160
7.5. Energy demand, global warming potential, and thermal comfort – examples for Polish buildings.....	161
7.5.1. A building compliant with the actual technical requirements vs. a building with an increased standard of the insulation.....	162
7.5.2. A brick building vs. a wooden building.....	163
Bibliography	165
8. PROMISING ENERGY TECHNOLOGIES TOWARDS SUSTAINABLE FUTURE	170
8.1. Public perception of energy transformation in Poland	170
8.2. Large-scale system perspective	173
8.2.1. Hydrogen energy.....	173
8.2.2. Other selected technologies for energy storage	177
8.2.3. Recent studies in large-scale energy storage systems	179
8.3. Prosumer perspective.....	181

8.3.1. Prosumer self-sufficiency	182
8.3.2. Energy storage for prosumers	184
Bibliography	185
List of Tables and Figures.....	189
Abstract.....	196
