Foreword	v
Introduction	vi
1 Scope	1
2 Normative references	1
3 Terms and definitions	2
4 Principles of the method of measurement and computation	2
5 Classical Venturi tubes	2
5.1 Field of application	2
5.1.1 General	2
5.1.2 Classical Venturi tube with an “as cast” convergent section	3
5.1.3 Classical Venturi tube with a machined convergent section	3
5.1.4 Classical Venturi tube with a fabricated convergent section	3
5.2 General shape	3
5.2.1 General	3
5.2.2 Entrance cylinder	3
5.2.3 Convergent section	4
5.2.4 Throat	4
5.2.5 Divergent section	5
5.2.6 Truncated Venturi tube	5
5.2.7 Roughness	5
5.2.8 Classical Venturi tube with an “as cast” convergent section	5
5.2.9 Classical Venturi tube with a machined convergent section	6
5.2.10 Classical Venturi tube with a fabricated convergent section	6
5.3 Material and manufacture	7
5.4 Pressure tappings	7
5.5 Discharge coefficient, C	8
5.5.1 Limits of use	8
5.5.2 Discharge coefficient of the classical Venturi tube with an “as cast” convergent section	8
5.5.3 Discharge coefficient of the classical Venturi tube with a machined convergent section	9
5.5.4 Discharge coefficient of the classical Venturi tube with a fabricated convergent section	9
5.6 Expansibility [expansion] factor, ϵ	9
5.7 Uncertainty of the discharge coefficient, C	9
5.7.1 Classical Venturi tube with an “as cast” convergent section	9
5.7.2 Classical Venturi tube with a machined convergent section	9
5.7.3 Classical Venturi tube with a fabricated convergent section	10
5.8 Uncertainty of the expansibility [expansion] factor, ϵ	10
5.9 Pressure loss	10
5.9.1 Definition of the pressure loss	10
5.9.2 Relative pressure loss	10
6 Installation requirements	11
6.1 General	11
6.2 Minimum upstream and downstream straight lengths for installation between various fittings and the Venturi tube	12
6.3 Flow conditioners	16
6.4 Additional specific installation requirements for classical Venturi tubes	16
6.4.1 Circularity and cylindricity of the pipe and alignment of the classical Venturi tube	16
6.4.2 Roughness of the upstream pipe	17
7 Flow calibration of Venturi tubes	17

7.1	General	17
7.2	Test facility	17
7.3	Meter installation	18
7.4	Design of the test programme	18
7.5	Reporting the calibration results	18
7.6	Uncertainty analysis of the calibration	18
7.6.1	General	18
7.6.2	Uncertainty of the test facility	18
7.6.3	Uncertainty of the Venturi tube	19
Annex A (informative) Table of expansibility [expansion] factor		20
Annex B (informative) Classical Venturi tubes used outside the scope of ISO 5167-4		21
Annex C (informative) Pressure loss in a classical Venturi tube		24
Bibliography		26
