|--|------|--|-----|
| How to use this series | vi | 6 Electrochemistry | 124 |
| How to use this book | viii | 6.1 Types of electrical conductivity | 126 |
| Introduction | x | 6.2 Products of electrolysis | 130 |
| 1 States of matter | 1 | 6.3 Hydrogen as a fuel | 139 |
| 1.1 States of matter | 3 | 7 Chemical energetics | 148 |
| 1.2 Kinetic particle theory of matter | 11 | 7.1 Physical and chemical changes | 150 |
| 1.3 Mixtures of substances and diffusion | 14 | 7.2 Exothermic and endothermic reactions | 151 |
| 2 Atomic structure | 28 | 8 Rates of reaction | 163 |
| 2.1 Atoms and elements | 30 | 8.1 Factors affecting the rate of reaction | 165 |
| 2.2 Isotopes | 34 | 8.2 Collision theory of reaction rate | 174 |
| 2.3 Electronic configuration of elements | 38 | 9 Reversible reactions and equilibrium | 183 |
| 3 Chemical bonding | 47 | 9.1 Reversible reactions | 185 |
| 3.1 Non-metallic substances and covalent bonding | 49 | 9.2 Haber process and Contact process | 190 |
| 3.2 Ions and ionic bonding | 57 | 9.3 Fertilisers | 197 |
| 3.3 Giant structures | 62 | 10 Redox reactions | 203 |
| 4 Chemical formulae and equations | 73 | 10.1 Combustion, oxidation and reduction | 205 |
| 4.1 Chemical names and formulae | 75 | 10.2 Redox reactions | 207 |
| 4.2 Chemical equations for reactions | 83 | 11 Acids and bases | 219 |
| 4.3 Relative masses of atoms and molecules | 87 | 11.1 The nature of acids and bases | 221 |
| 5 Chemical calculations | 99 | 11.2 Characteristic reactions of acids | 230 |
| 5.1 The mole and Avogadro's constant | 101 | 12 Preparation of salts | 242 |
| 5.2 The mole and chemical equations | 108 | 12.1 The importance of salts – an introduction | 244 |
| 5.3 Moles and solution chemistry | 115 | 12.2 Preparation of salts | 248 |

| | | | |
|---|------------|--|------------|
| 13 The Periodic Table | 259 | 19 Reactions of organic compounds | 362 |
| 13.1 Classifying the elements | 261 | 19.1 Characteristic reactions of different homologous series | 364 |
| 13.2 Trends in groups | 265 | 19.2 Chemistry of ethanol | 371 |
| 13.3 Trends across a period | 270 | 19.3 Carboxylic acids and esters | 373 |
| 14 Metallic elements and alloys | 277 | 20 Petrochemicals and polymers | 380 |
| 14.1 The properties of metals | 279 | 20.1 Petroleum and its products | 382 |
| 14.2 Uses of metals | 284 | 20.2 Polymers | 387 |
| 14.3 Alloys | 286 | 20.3 Plastics | 395 |
| 15 Reactivity of metals | 295 | 21 Experimental design and separation techniques | 404 |
| 15.1 The metal reactivity series | 297 | 21.1 Experimental design | 406 |
| 15.2 Metal displacement reactions | 301 | 21.2 Separation and purification | 410 |
| 16 Extraction and corrosion of metals | 309 | 21.3 Chromatography | 417 |
| 16.1 Metal extraction and the reactivity series | 311 | 22 Chemical analysis | 426 |
| 16.2 Corrosion of metals | 317 | 22.1 Tests to identify common cations | 428 |
| 17 Chemistry of our environment | 325 | 22.2 Tests to identify common anions | 435 |
| 17.1 Air quality | 327 | 22.3 Tests to identify common gases | 438 |
| 17.2 Carbon dioxide, methane and climate change | 331 | 22.4 Quantitative analysis: acid–base titrations | 440 |
| 17.3 Water | 334 | Glossary | 447 |
| 18 Introduction to organic chemistry | 344 | Appendix: Periodic Table | 458 |
| 18.1 Names and formulae of organic compounds | 346 | Index | 459 |
| 18.2 Structural formulae, homologous series and isomerism | 353 | Acknowledgements | 467 |
