

Table of contents

Preface	xiii
Organization, Acknowledgements & Media Patronage	xv
Committees	xvii
<i>General lectures</i>	
Interactions between mechanical systems and continuum mechanical models in the framework of biomechanics and vehicle dynamics <i>J. Ambrósio</i>	3
Multiscale mechanics of dynamical metamaterials <i>M. Geers, V. Kouznetsova, A. Sridhar & A. Krushynska</i>	11
Consistent plate theories—a matter still not settled? <i>R. Kienzler & P. Schneider</i>	13
Experimental attempts for creep and fatigue damage analysis of materials—state of the art and new challenges <i>Z.L. Kowalewski, P. Grzywna & D. Kukla</i>	17
Micro and nano fluid mechanics <i>T.A. Kowalewski, P. Nakielski, F. Pierini, K. Zembrzycki & S. Pawłowska</i>	27
Shape memory materials and structures: Modelling and computational challenges <i>M. Kuczma</i>	35
Advanced mechanics in High Energy Physics experiments <i>T. Kurtyka</i>	39
Hierarchic isogeometric analyses of beams and shells <i>B. Oesterle, M. Bischoff & E. Ramm</i>	41
Finite Element Method simulations of linear and nonlinear elasticity problems with error control and mesh adaptation <i>W. Rachowicz, A. Zdunek & W. Cecot</i>	47
Physics and computations of turbulent dispersed flows: Macro-consequences from micro-interactions <i>A. Soldati</i>	61
Finite strain analyses of deformations in polymer specimens <i>V. Tvergaard</i>	63
<i>Regular contributions</i>	
Experimental tests for the determination of mechanical properties of PVC foil <i>A. Ambroziak</i>	67

Asymptotic solution for free vibration of weakly nonlinear oscillator with two serially connected springs <i>J. Awrejcewicz, R. Starosta & G. Sypniewska-Kamińska</i>	71
Strain hardening effect on elastic-plastic contact of a rigid sphere against a deformable flat <i>Ł. Bąk, F. Stachowicz, T. Trzepieciński, S. Bosiakov & S. Rogosin</i>	77
Multiscale evolutionary optimization of Functionally Graded Materials <i>W. Beluch & M. Hatlas</i>	83
Optimization of structural topology using unstructured Cellular Automata <i>B. Bochenek & K. Tajs-Zielińska</i>	87
A mesh-free particle model for simulation of trimming of aluminum alloy sheet <i>L. Bohdal & R. Patyk</i>	93
New method of generating Strut and Tie models using truss topology optimization <i>K. Bolbotowski & T. Sokół</i>	97
The influence of imperfect interfaces on the overall mechanical response of metal-matrix composites <i>G. Bolzon & P. Pandi</i>	101
The effect of technological parameters of shot peening on the surface roughness of 51CrV4 steel <i>M. Bucior, L. Gałda, F. Stachowicz & W. Zielecki</i>	105
Analysis approach for diffusor augmented small wind turbine rotor <i>J. Bukala, K. Damaziak, M. Krzeszowiec, J. Malachowski, M. Tomaszewski, K. Kroszczyński & K. Sobczak</i>	109
Geometric analysis of a 1-dof, six-link feeder <i>J. Buśkiewicz</i>	113
Modal approach in the fluid-structure interaction in aerospace <i>W. Chajec & A. Dziubiński</i>	117
Investigations on the chip shape and its upsetting and coverage ratios in partial symmetric face milling process of aluminium alloy AW-7075 and the simulation of the process with the use of FEM <i>J. Chodór & L. Żurawski</i>	121
Sensitivity analysis of behavior of sandwich plate with PU foam core with respect to boundary conditions and material model <i>M. Chuda-Kowalska & M. Malendowski</i>	125
Distribution of damages in unconventionally reinforced concrete slabs subjected to impact loads <i>K. Cichocki & M. Ruchwa</i>	129
Experimental verification of the relationships between Young's modulus and bone density using DIC <i>Ł. Cyganik, M. Binkowski, P. Popik, Z. Wróbel, G. Kokot, A. John, T. Rusin, F. Bolechala & R. Nowak</i>	133
Construction of stress trajectories in optimal, non-homogeneous elastic bodies <i>S. Czarnecki & P. Wawruch</i>	137
Multiobjective optimization of electrothermal microactuators by means of Immune Game Theory Multiobjective Algorithm <i>A. Długosz & P. Jarosz</i>	141
Detection of damages in a riveted plate <i>Ł. Doliński, M. Krawczuk, M. Palacz & A. Żak</i>	147
Nonlinear dynamic response of periodically inhomogeneous Rayleigh beams <i>Ł. Domagalski & J. Jędrusiak</i>	151

Investigation of Turbulent Boundary Layers at moderate Reynolds number in the vicinity of separation <i>A. Drózdź, W. Elsner & A. Kepiński</i>	155
Design of fuzzy logic controller for the unloading system in mechatronic device for gait reeducation <i>S. Duda, D. Gąsior, G. Gembalczuk, S. Kciuk & A. Mężyk</i>	159
The reliability assessment for steel industrial building <i>A. Dudzik & U. Radoń</i>	163
Optimal design of eigenfrequencies for functionally graded piezoelectric plate by two-scale model and harmony search <i>G. Dziatkiewicz</i>	167
Reliability analysis of reinforced concrete components: A comparative study <i>P. Evangeliou, A. Roy, M.A.N. Hendriks, R. Steenbergen & A. de Boer</i>	171
Nonlinear model of spacecraft relative motion in an elliptical orbit <i>P. Felisiak, W. Wróblewski & K. Sibilski</i>	177
Reliable mechanical characterization of layered pavement structures <i>T. Garbowski & A. Venier</i>	183
The impact of fire situation on the static and stability response of the bearing steel structure <i>A. Garstecki, K. Rzeszut, Ł. Polus, M. Klój & M. Terech</i>	187
Form finding of tensegrity structures via Singular Value Decomposition of compatibility matrix <i>W. Gilewski, J. Kłosowska & P. Obara</i>	191
Technical coefficients for continuum models of orthotropic tensegrity modules <i>W. Gilewski & A. Al Sabouni-Zawadzka</i>	197
Truss model of origami inspired folded structures <i>W. Gilewski & J. Pelczyński</i>	201
Parametric analysis of Istanbul's ring road viaduct for three levels of seismic load <i>K. Grębowski, M. Hirs, K. Wilde & A. Nadolny</i>	207
New method of modelling nonlinear multi-bolted systems <i>R. Grzejda</i>	213
Fretting wear simulation in model studies <i>S. Guzowski & M. Michnej</i>	217
Dynamics analysis of the RUSP linkage with joint friction modelled by the Stribeck effect <i>A. Harlecki & A. Urbaś</i>	221
Dynamic response of a sandwich beam with a periodic core due to fuzzy stochastic moving load <i>R. Idzikowski, P. Śniady & K. Misiurek</i>	227
Numerical methods for the assessment of bridge safety barriers <i>K. Jamroz, S. Burzyński, W. Witkowski, K. Wilde & G. Bagiński</i>	231
XFEM analysis of intermediate crack debonding of FRP strengthened RC beams <i>I. Jankowiak</i>	235
Performance of the parallel FEAP in calculations of effective material properties using RVE <i>P. Jarzębski & K. Wiśniewski</i>	241
Receptance coupling for turning with a follower rest <i>M. Jasiewicz & B. Powalka</i>	245
Analysis of the influence of differences in strength parameters of steel S235 on passive safety of lighting columns <i>T.I. Jedliński & J. Buśkiewicz</i>	249

Tolerance modelling of dynamics of microstructured functionally graded plates <i>J. Jędrysiak</i>	253
Tolerance modeling of vibration of visco-elastic thin periodic plates with moderately large deflections <i>J. Jędrysiak</i>	259
Thermoelastic phenomena in functionally graded laminates <i>J. Jędrysiak & E. Pazera</i>	265
Inverted joined-wing multidisciplinary optimization <i>M. Kalinowski</i>	271
Plane anisotropy parameters identification based on Barlat's model <i>P. Kaldunski</i>	275
Reliability of some axisymmetric shell structure by the response function method and the generalized stochastic perturbation technique <i>M. Kamiński & B. Pokusiński</i>	279
A method of estimating the stability coefficient of a considerably degraded cooling tower <i>T. Kasprzak, P. Konderla, R. Kutylowski & G. Waśniewski</i>	283
Numerical analysis of contact between 3-D beams with deformable circular cross-section <i>O. Kawa & P. Litewka</i>	287
Analysis of wave propagation in a bolted steel joint <i>R. Kędra & M. Rucka</i>	293
An application of the Discrete Wavelet Transform to defect localization in plates <i>A. Knitter-Piątkowska & M. Guminiak</i>	297
Optimally tuned fuzzy control for smart, possibly damaged piezocomposites <i>P. Koutsianitis, G.A. Drosopoulos, G.K. Tairidis, G.E. Stavroulakis & G. Foutsitzi</i>	301
Analysis of sloping brace stiffness influence on stability and load bearing capacity of a truss <i>M. Krajewski, P. Iwicki, N. Sałyk & A. Łukowicz</i>	307
Experimental investigation of the innovative flow control blowing devices <i>A. Krzysiak</i>	313
Influence of aluminum layer thickness on the fatigue properties of super-nickel alloy and crack detection by non-destructive techniques <i>D. Kukla & Z.L. Kowalewski</i>	317
Topology optimization as a tool for road pavement structure analysis <i>R. Kutylowski & M. Szwechłowicz</i>	321
GPR simulations for diagnostics of a reinforced concrete beam <i>J. Lachowicz & M. Rucka</i>	327
Application of polymer element in reduction of temporary steel grandstand vibrations <i>N. Lasowicz & R. Jankowski</i>	331
Frequency Response Function of structures with viscoelastic dampers <i>M. Łasecka-Plura & R. Lewandowski</i>	335
Influence of temperature on dynamic characteristics of structures with VE dampers <i>R. Lewandowski, M. Przychodzki & Z. Pawlak</i>	341
Modified Hu-Washizu variational principle as a general basis for FEM plasticity equations <i>J. Lewandowski & K. Myślecki</i>	345
Electro-mechanical multiple-point beam-to-beam contact <i>P. Litewka</i>	349
HSp—an isotropic material interpolation scheme based on Hashin-Shtrikman variational bounds <i>T. Łukasiak</i>	355

Modelling of the vibration reduction system used for protection of working machine operators <i>I. Maciejewski & T. Krzyżyński</i>	361
Modelling of phase changes in thin metal film subjected to ultrafast laser heating using the two-temperature model <i>E. Majchrzak & J. Działkiewicz</i>	367
Sensitivity analysis of temperature field in the heated tissue with respect to the dual-phase-lag model parameters <i>E. Majchrzak, Ł. Turchan & G. Kałuża</i>	371
Multiscale model of the proximal femur with implanted bone scaffold <i>P. Makowski & W. Kuś</i>	377
Reference FEM model for SHM system of cable-stayed bridge in Rzeszów <i>A. Mariak, M. Miśkiewicz, B. Meronk, Ł. Pyrzowski & K. Wilde</i>	383
Numerically-based quantification of internal forces generated in a steel frame structure with flexible joints when exposed to a fire <i>M. Maślak, M. Pazdanowski & M. Snela</i>	389
Numerical modelling of detonation in mining face cut-holes <i>L. Mazurkiewicz, J. Malachowski, P. Baranowski, K. Damaziak, W. Pytel & P. Mertuszka</i>	393
Stress convergence in adaptive resolution of boundary layers in the case of 3D-based first- and higher-order shell models <i>Ł. Miazio & G. Zboiński</i>	397
Experimental tests and numerical simulations of full scale composite sandwich segment of a foot- and cycle-bridge <i>M. Miśkiewicz, K. Daszkiewicz, T. Ferenc, W. Witkowski & J. Chróścielewski</i>	401
Numerical analysis and in situ tests of the Grot-Rowecki Bridge in Warsaw <i>M. Miśkiewicz, Ł. Pyrzowski, K. Wilde & J. Chróścielewski</i>	405
Numerical analysis of the carpentry joints applied in the traditional wooden structures <i>A. Mleczek & P. Kłosowski</i>	409
Numerical modeling of biological tissue freezing process using the Dual-Phase-Lag Equation <i>B. Mochracki & E. Majchrzak</i>	413
Real-time hybrid simulation using materials testing machine and FEM <i>W. Mucha</i>	419
Rolling contact problems for plastically graded materials <i>A. Myśliński & A. Chudzikiewicz</i>	423
Structural optimization of contact problems using piecewise constant level set method <i>A. Myśliński & M. Wróblewski</i>	429
Multiscale analysis of metal matrix composite with ceramic reinforcement using Johnson-Holmquist constitutive model <i>W. Ogierman & G. Kokot</i>	435
Influence of geometrical and physical irregularities on dynamic characteristics of a passively damped structure <i>A. Olszewska & Z. Pawlak</i>	441
Impact of an unsecured excavation on an underground pipeline <i>R. Ossowski & K. Szarf</i>	445
Computable two-sided a posteriori error estimates for h -adaptive Finite Element Method <i>O. Yu. Ostapov, O. V. Vovk & H. A. Shynkarenko</i>	449
Cancer ablation during RF Hyperthermia using internal electrode <i>M. Paruch</i>	455

Self-sustained oscillations of the axisymmetric free jet at low and moderate Reynolds number <i>A. Pawłowska, S. Drobniać & P. Domagała</i>	459
On decreasing the optimization problem size <i>M. Pazdanowski</i>	463
Gum Metal—unique properties and results of initial investigation of a new titanium alloy—extended paper <i>E.A. Pieczyńska, M. Maj, T. Furuta & S. Kuramoto</i>	469
On the resultant six-field linear theory of elastic shells <i>W. Pietraszkiewicz</i>	473
Explanation of the mechanism of destruction of the cylindrical sample in the Brazilian test <i>J. Podgórski & J. Gontarz</i>	479
Stress redistribution at the support of a transversely loaded sandwich panel <i>Z. Pozorski & J. Pozorska</i>	485
Three-point bending test of sandwich beams supporting the GFRP footbridge design process—validation <i>Ł. Pyrzowski, B. Sobczyk, W. Witkowski & J. Chrościelewski</i>	489
An adaptive finite element method for contact problems in finite elasticity <i>W. Rachowicz, W. Cecot & A. Zdunek</i>	493
Vibrations of a double-beam complex system subjected to a moving force <i>J. Rusin</i>	497
Dynamic behavior of Zymne Monastery Cathedral on soil base with consideration of non-linear deformation of materials <i>V.O. Sakharov</i>	503
Loadings in rail vehicle due to bulk material <i>H. Sanecki</i>	507
Dynamics of bodies under symmetric and asymmetric orthotropic friction forces <i>O.A. Silantyeva & N.N. Dmitriev</i>	511
Dynamic and positioning analysis of the feed drive of the rope threading lathe <i>P. Sitarz, B. Powalka & A. Parus</i>	517
Experimental and numerical evaluation of mechanical behaviour of composite structural insulated wall panels under edgewise compression <i>Ł. Smakosz & I. Kreja</i>	521
A new adaptive ground structure method for multi-load spatial Michell structures <i>T. Sokół</i>	525
Stochastic Finite Element Method SORM study of the corrugated web steel plate girder <i>D. Sokołowski & M. Kamiński</i>	529
Influence of separation gap on the response of colliding models of steel structures under seismic and paraseismic excitations <i>B. Soltysik & R. Jankowski</i>	533
Discrete random variables in reliability calculations of a reticulated shell <i>P. Sorn, J. Górski, K. Winkelmann & J. Przewłócki</i>	537
The influence of utilizing different materials and their configurations on ballistic panels blast resistance <i>S. Stanisławek & G. Sławiński</i>	543
Numerical modeling of thermopiezoelectricity steady state forced vibrations problem using adaptive Finite Element Method <i>V.V. Stelmashchuk & H.A. Shynkarenko</i>	547

Wind tunnel tests of the development and demise of Vortex Ring State of the rotor <i>K. Surmacz, P. Ruchala & W. Stryczniewicz</i>	551
Assessment of the biomechanical parameters of the disabled driver during frontal crash <i>K. Sybilski, J. Malachowski, P. Baranowski & P. Platek</i>	555
Dynamic response of the steel chimney by the stochastic perturbation-based Finite Element Method <i>J. Szafran, K. Juszczyk & M. Kamiński</i>	559
Welding deformation in a structure strengthened under load in an empirical-numerical study <i>P. Szewczyk & M. Szumigala</i>	563
An influence of notch type on material behaviour under monotonic tension <i>T. Szymczak, Z.L. Kowalewski & A. Brodecki</i>	567
Fire performance of composite Concrete Filled Tubular columns exposed to localized fire <i>W. Szymkuć, A. Glema & M. Malendowski</i>	573
Topological optimization of formworks' meshes for free-form surfaces <i>R. Tarczewski & M. Święciak</i>	577
A new combined model of dynamic problems for thin uniperiodic cylindrical shells <i>B. Tomczyk</i>	581
Taylor-Couette flow with radial temperature gradient <i>E. Tuliszka-Sznitko & K. Kielczewski</i>	587
Application of artificial neural networks in man's gait recognition <i>T. Walczak, J.K. Grabski, M. Grajewska & M. Michałowska</i>	591
Reliability assessment of truss towers using Monte Carlo Method, PEM and RSM <i>K. Winkelmann, M. Oziębło & K. Rybaczyk</i>	595
The influence of presumed border conditions on FEM thermal analysis results based on the example of an LNG tank support saddle <i>J. Zapłata & M. Pajor</i>	601
Application of the Element Residual Methods to dielectric and piezoelectric problems <i>G. Zboiński</i>	605
Modelling of the viscoelastic properties of the technical fabric VALMEX <i>K. Żerdzicki, P. Kłosowski & K. Woźnica</i>	611
Experimental and numerical analysis of wave propagation in ground anchors <i>B. Zima & M. Rucka</i>	615
Effectiveness of damage detection in 3-D structures using discrete wavelet transformation <i>K. Ziopaja</i>	619
Development of friction constitutive relations for polymers <i>A. Zmitrowicz</i>	623
Investigation of stability and limit load of a truss overhead opened bridge <i>Ł. Żmuda-Trzebiatowski, P. Iwicki & M. Krajewski</i>	627
Author index	631
