

# Contents

|   |     |
|---|-----|
| Foreword<br><i>Aomar Serir</i>  | v   |
| Preface<br><i>Leopold Kruszka and Djalel Eddine Tria</i>  | vii |
| NATO Advanced Training Course Photos  | ix  |
| Introduction to Critical Energy Infrastructure Protection: Risks and Vulnerabilities<br><i>Leopold Kruszka and Paweł Muzolf</i>                                   | 1   |
| Industrial Risks and Domino Effects: Resilience, Risks and Optimal Layouts<br><i>Ahmed Mebarki</i>  | 15  |
| Critical Infrastructure: Design and Behavior of Materials Under Impact and Explosion Loads<br><i>Ahmed Brara</i>  | 24  |
| An Overview of Theoretical and Experimental Techniques for Material Behavior Characterization in Shock Physics<br><i>Jérôme Mespoulet and Pierre Louis Hereil</i> | 50  |
| Blast Mitigation Using Crushable Core Systems<br><i>Hamza Ousji, Bachir Belkassem, Lincy Pyl and David Lecompte</i>   | 72  |
| Round-Robin Exercise for Compression Testing of Steel Alloy of Pressure Tank at High Strain Rate<br><i>Leopold Kruszka and Kamil Sobczyk</i>                      | 81  |
| On the Behavior of Composite Structures at High Strain Rates<br><i>Mohamed Abderraouf Louar</i>   | 96  |
| Advanced Multi-Layered Protective Systems for Defeating High Energy Projectiles<br><i>Djalel Eddine Tria</i>  | 105 |
| New Technique to Protect RC Slabs Against Explosions Using CFRP as Externally Bonded Reinforcement<br><i>Azer Maazoun</i>   | 125 |
| Subject Index   | 135 |
| Author Index  | 137 |
