Foreword	iv
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Materials, construction and design	4
4.1 Materials	4
4.2 Construction	5
4.3 Design filling height	5
5 Performance	5
5.1 Type-testing	5
5.2 Preparation of FIBC for test	5
5.3 Test requirements	6
6 Certification	6
7 Marking	7
Annex A (normative) UV resistance test	9
Annex B (normative) Cyclic top lift test	10
Annex C (normative) Compression/stacking test	18
Annex D (informative) Guidance on selection and use of FIBCs	19
Annex E (informative) Design of FIBCs	24
Bibliography	28

3 Terms and definitions

For the purposes of this document, the following terms and definitions apply.

3.1 General

3.1.1

flexible intermediate bulk container

FIBC

intermediate bulk container having the body made of flexible material such as woven fabric, plastics film or paper, designed to be in contact with the contents, either directly or through an inner liner, and collapsible when empty

3.1.2

heavy-duty reusable flexible intermediate bulk container

FIBC designed and intended to be used for a multitude of fillings and discharges, and both factory and field repairable in such a way that the tensile strength across a repair is at least as great as that of the original

3.1.3

standard-duty reusable flexible intermediate bulk container

FIBC designed and intended to be used for a limited number of fillings and discharges

NOTE 1 An FIBC of this category cannot be reused if damaged, i.e. it is not repairable.

NOTE 2 The replacement of a removable inner liner is not considered a repair.
