

Table of Content

Preface	7
Introduction: Safety in the Laboratory	9
A – General Safety Rules	9
B – How to Use a Bunsen Burner Safely	10
1. Chemical Reactions of Electrolytes in Aqueous Solutions	
1.1. Dissociation Reactions	15
1.1.1. Dissociation of Acids	15
1.1.2. Dissociation of Hydroxides	15
1.1.3. Dissociation of Salts	16
1.1.4. Dissociation of Water	16
1.2. Neutralisation Reactions	16
1.3. Hydrolysis Reactions	18
1.4. Precipitation Reactions	19
1.5. Amphoteric Hydroxides Reactions with Strong Acids or Bases	21
2. Reduction – Oxidation (Redox) Reactions	
2.1. Redox Reactions	23
2.2. Oxidation Number (State)	23
2.3. Manganate(VII) – Permanganate – in Redox Reactions	24
2.4. Balancing Redox Reaction Equations	24
3. Analysis of Cations	27
4. Analysis of Anions	31
5. Introduction to Quantitative Analysis (Fundamentals)	
5.1. Quantitative Analysis Definition. Divisions	39
5.2. Laboratory Glassware	40
5.2.1. Volumetric Flask	41
5.2.2. Pipette	41
5.2.3. Burette	41
5.2.4. Scales	42
5.3. Basic Definitions and Procedures	42
6. Complexometry	47
7. Manganometry	53
8. Acid-Base Titration	59

9. Recrystallisation of Organic Compounds

9.1. Process Fundamentals	73
9.2. Choosing the Appropriate Solvent	74
9.3. General Steps	75
9.4. Heating the Suspension	76
9.5. Use of Decolourising Carbon	77
9.6. Cooling the Solution	77
9.7. Filtering and Drying the Product	77
9.8. Melting Point as the Criterion of Purity	78
9.9. Percent Recovery	78

10. Distillation

10.1. Distillation Fundamentals	81
10.2. Simple Distillation	82
10.3. Fractional Distillation	85
10.4. Vacuum Distillation	86
10.5. Steam Distillation	88
10.6. Hydrodistillation	89

11. Isolation of Essential Oils from Biological Samples

by Hydrodistillation	93
----------------------------	----

12. Extraction 97

12.1. Extraction Fundamentals	97
12.2. Liquid-Liquid Extraction	97
12.2.1. Choosing a Solvent System	99
12.2.2. Identifying the Layers	99
12.2.3. Separating the Layers	100
12.2.4. Drying Agents (Desiccants)	100
12.2.5. Extraction of Essential Oils from Distillates	102
12.2.6. Isolation of Lycopene from Tomato Paste	103
12.3. Acid-Base Extraction	104
12.3.1. Separation of Benzoic Acid and Toluene	105
12.4. Solid-Liquid Extraction (Leaching)	106
12.4.1. Isolation of Sunflower Oil from Sunflower Seeds	106
12.4.2. Isolation of Caffeine from Tea Leaves	107

13. Chromatography

13.1. General Principles	111
13.2. Chromatographic Techniques	112
13.2.1. Column Chromatography	112
13.2.2. Thin Layer Chromatography (TLC)	113

13.3. Analysis of Nitroaniline Isomers by Thin Layer Chromatography	118
13.4. Analysis of Green Pigments in Plants	119
14. Qualitative Analysis of Organic Compounds	
14.1. Introduction to Qualitative Analysis	121
14.2. Determination of Solubility Group	121
14.3. Chemical (Classification) Tests	124
15. Organic Syntheses	
15.1. Introduction to Organic Synthesis	139
15.2. Synthesis of Aspirin (Acetylsalicylic Acid)	140
15.3. Synthesis of <i>n</i> -Butyl Acetate	140
15.4. Synthesis of Dibenzylideneacetone	141
15.5. Synthesis of Methyl <i>m</i> -Nitrobenzoate	142
15.6. Synthesis of <i>para</i> -Red	143
15.7. Synthesis of Soap	145
16. Calculation Problems	
16.1. Concentration	147
16.2. Complexometry	150
16.3. Manganometry	151
16.4. pH	152
16.5. Acid-Base Titration	154
16.6. Recrystallisation	155
16.7. Extraction	156
16.8. Reaction Yield	156
References	159
Appendix	160
Answers to Calculation Problems	165
