Preface.....xvii

Chapter 1 Introduction: In situ SEM Identification of High-Resolution Crack Tip
Micro-Deformation in Some Polymer Matrix Materials 1

Sri Bandyopadhyay

Chapter 2 Polystyrene-Based Composites and Their Toughening Mechanisms 15

Selvin P. Thomas

Chapter 3 Metal Matrix Composites: An Overview29

B. Sengupta and A. Basu Mallick

Chapter 4 Improvement of Characteristics of Composites Using Natural Fibre as
Reinforcement by Different Pretreatments 39

Sambhu Nath Chattopadhyay and Kartick K. Samanta

Chapter 5 Particulate-Reinforced Composites..... 55

Subhajit Kundu, Debarati Mitra, and Mahuya Das

Chapter 6 Graphene-Reinforced Polymer Composites 69

*Bidita Salahuddin, Shazed Aziz, Md. Mokarrom Hossain, Aziz Ahmed,
Md. Arifur Rahim, Mohammad S. Islam, and Shaikh N. Faisal*

Chapter 7 Matrices for Composite Materials: Polymers, Metals, Ceramics, and Cements..... 81

G.S. Mukherjee

Chapter 8 Metallurgical Failure Analysis of an Excavator Boom Body Comprised of
Several Members Manufactured Out of Welded Composite Structures 101

Tapas Das

Chapter 9 Tribological Behaviour of Polymer Matrix and Metal Matrix Composites 127

*Ch. Sri Chaitanya, Babar Pasha Mahammod, G. Chitti Babu,
and R. Narasimha Rao*

Chapter 10	Carbon Nanotube Hybrid Fabric – Manufacturing and Applications Including Structural and Wearables	135
	<i>V. Ng, D. Chauhan, R. Noga, M. Chitranshi, A. Pujari, A. Kubley, A. Bhattacharya, S. Grinshpun, S. Fialkova, W. J. Williams, S. Kilinc-Balci, J. Campbell, B. J. Jetter, V. N. Shanov, and M. J. Schulz</i>	
Chapter 11	Toughening Mechanisms in Mullite-Based Composites.....	151
	<i>Pramod Koshy, Bernadette Pudadera, Tina Majidi, Vicki Zhong, Vienna C. Wong, Xiaoran Zheng, Naomi Ho, Theodora K.-H. Cheng, and Charles C. Sorrell</i>	
Chapter 12	Generalised Model of Trends in Mechanical Properties of Toughened Sphere-reinforced Polymer Matrix Composites.....	165
	<i>I.I. Kabir, C.C. Sorrell, G.H. Yeoh, and S. Bandyopadhyay</i>	
Chapter 13	Case Studies on Toughened Composites for Structural and Engineering Applications.....	179
	<i>Dheeraj K Gara, Raghavendra Gujjala, Satish Jain, Shakuntala Ojha, and Omprakash</i>	
Chapter 14	Carbon Nanostructure–Based Composite for Energy-Related Applications	191
	<i>Shrabani Ghosh, Supratim Maity, and K. K. Chattopadhyay</i>	
Chapter 15	Self-Healing Composites: Capsule- and Vascular-Based Extrinsic Self-Healing Systems	203
	<i>Bhavya Parameswaran and Nikhil K. Singha</i>	
Chapter 16	Role of Nanoreinforcement onto Intra- and Interlaminar Fracture of Hybrid Laminated Composites	217
	<i>Subhankar Das, Parnab Das, Sudipta Halder, and Pannalal Choudhury</i>	
Chapter 17	Electrochemical and Microscopic Studies on Controlling of Cracking Behavior of SiC _p , Al ₂ O ₃ -Reinforced Aluminum Metal Matrix Composites	231
	<i>Chinmoy Bhattacharya, Biswanath Samanta, Paramita Hajra, Harahari Mandal, Sanjib Shyamal, Debasis Sariket, and Sri Bandyopadhyay</i>	
Chapter 18	Toughening of Polymers.....	247
	<i>M. Sreejith, G. Santhosh, and R. S. Rajeev</i>	

Chapter 19 Free Vibration of Laminated Composite Stiffened Shallow Shells 261
Amar N. Nayak and Janen N. Bandyopadhyay

Chapter 20 Toughening Effect of Aluminium Particles in Conductive Polyester Composites 277
Zahir Bashir, Arfat Anis, and Saeed M. Al-Zahrani

Index..... 295
