Chapter 1	13
The concept of the monograph	
1.1. Introduction	13
1.2. Main results of the author	15
1.3. Literature of the subject	16
1.4. Plan of work	18
Chapter 2	21
Estimation and verification of relations and trees – the main ideas	
2.1. Introduction	21
2.2. Definitions and notations	21
2.3. Assumptions concerning pairwise comparisons	24
2.4. The main idea of estimation – minimization of absolute differences with comparisons	26
2.5. Properties of estimators - consistency	28
2.6. Verification of estimates and assumptions concerning pairwise comparisons	32
2.7. Solving the optimization problems	33
2.8. Summary	33
Chapter 3	35
Estimation of the equivalence relation - binary comparisons	
3.1. Introduction	35
3.2. Assumptions as to binary comparisons	35
3.3. The form of estimators and their properties	36
3.4. Summary	39
Chapter 4	41
Determining the estimates of the equivalence relation	
4.1. Introduction	41
4.2. Discrete optimization problems for the estimates of the equivalence relation	42
4.3. Heuristic approach for discrete optimization based on test reducing the probabilities of comparison errors	43
4.4. Summary	47

Chapter 5	49
Estimation of the tolerance relation – binary comparisons	
5.1. Introduction	49
5.2. Assumptions as to the distributions of binary comparisons	49
5.3. The form of estimators and their properties	50
5.4. Summary	51
Chapter 6	53
Tests for relation type – equivalence or tolerance – for binary comparisons	
6.1. Introduction	53
6.2. Tests based on the estimator in the form of the absolute sum of inconsistencies	53
6.3. Tests based on the median estimator	56
6.4. Summary	56
Chapter 7	57
Tests for verification of estimate of tolerance relation for binary comparisons	
7.1. Introduction	57
7.2. The form of tests and their properties	57
7.3. Summary	60
Chapter 8	61
Estimation of the tolerance relation - multivalent comparisons	
8.1. Introduction	61
8.2. Assumptions as to multivalent comparisons	61
8.3. The form of the estimators and their properties	62
8.4. Summary	65
Appendix 1. The idea of proofs of relations (8.11)	65
Chapter 9	69
Tests for verification of the estimate of tolerance relation for multivalent comparisons	
9.1. Introduction	69
9.2. Construction of tests and their properties	69
9.3. Summary	75
Chapter 10	77
Estimation of the preference relation – binary comparisons	
10.1. Introduction	77
10.2. Assumptions as to binary comparisons	77
10.3. The form of estimators and their properties	78
10.4. Summary	82

Chapter 11	83
Tests for verification of the estimate of preference relation for binary comparisons	
11.1. Introduction	83
11.2. Tests for the strict form of the preference relation	83
11.3. Tests for the weak form of the preference relation	88
11.4. Tests for detection of the weak or strict form of the preference relation	92
11.5. Summary	94
Chapter 12	95
Estimation of the preference relation – multivalent comparisons	
12.1. Introduction	95
12.2. Assumptions as to multivalent comparisons	95
12.3. The form of estimators and their properties	96
12.4. Summary	99
Chapter 13	101
Tests for verification of estimates of the preference relation for multivalent comparisons	
13.1. Introduction	101
13.2. Tests for the strict form of the relation	101
13.3. Tests for the weak form of the relation	107
13.4. Summary	109
Appendix 2. The test for the mode equal zero in multinomial distribution	109
Chapter 14	111
Estimation of the partial order - comparisons in binary and multivalent form	
14.1. Introduction	111
14.2. Definitions and assumptions as to the comparisons	111
14.3. Estimation problems and properties of estimators	115
14.4. Summary	117
Appendix 3. Proof of properties of estimators	117
Chapter 15	121
Estimation of trees on the basis of binary pairwise comparisons	
15.1. Introduction	121
15.2. Definitions and assumptions as to comparisons	122
15.3. Estimation problems for trees and properties of estimators	124
15.4. Summary	127
Appendix 4. Proof of properties of estimators	127
Chapter 16	129
Properties of estimators of the preference relation based on binary and multivalent comparisons – simulation survey	
16.1. Introduction	129
16.2. Definition of estimation errors	130
16.3. Parameters of simulation survey	130
16.4. Results of the simulation survey	132

16.5. Summary	150
Chapter 17	151
Tests for assumptions concerning comparisons and verification of existence of relation or tree	
17.1. Introduction	151
17.2. Verification of assumptions about comparisons	151
17.3. Verification of existence of relation or tree	153
17.4. Summary	155
Chapter 18	157
Summary and conclusions	
18.1. Introduction	157
18.2. Main results of the work and further research	157
Bibliography	161
Main notations	167
List of tables	169
List of figures	171
