## **PART I**

### **MANAGEMENT THE LEVEL OF DEVELOPMENT OF THE FINAL PRODUCTS IN THE REGIONS**

#### **Chapter 1**

|                                                                       |           |
|-----------------------------------------------------------------------|-----------|
| <b>Region management.....</b>                                         | <b>15</b> |
| 1.1. Local government reform with the end of communism .....          | 15        |
| 1.2. Definition of the local self-government .....                    | 16        |
| 1.3. Satisfying the needs of residents in the regions .....           | 18        |
| 1.4. Tasks assigned to the voivodeship self-government .....          | 19        |
| 1.5. The local community as a subject of self-government .....        | 21        |
| 1.6. The concept of New Public Management (NPM) .....                 | 24        |
| 1.7. Another model of improving management in the public sphere ..... | 25        |
| 1.8. The basic knowledge to support management in the regions .....   | 28        |
| 1.9. The experiences of developed European regions .....              | 29        |
| 1.10. Regional benchmarking .....                                     | 30        |
| 1.11. The present structures of many countries .....                  | 33        |
| 1.12. Management of the region .....                                  | 34        |

#### **Chapter 2**

|                                                               |           |
|---------------------------------------------------------------|-----------|
| <b>Management of change in the local government unit.....</b> | <b>43</b> |
| 2.1. Case study City Hall office in Dzierżoniów .....         | 43        |
| 2.2. Introducing changes in modern organization .....         | 50        |
| 2.3. The management staff of the office .....                 | 53        |
| 2.4. Implementation of organizational innovation .....        | 54        |
| 2.5. Summary – conclusions .....                              | 59        |

## **Chapter 3**

|                                                                                     |           |
|-------------------------------------------------------------------------------------|-----------|
| <b>Evaluation of promotional activities in the local self-government unit .....</b> | <b>61</b> |
| 3.1. Local governments, as public institutions – Management with 4P .....           | 61        |
| 3.2. The services provided by the commune .....                                     | 63        |
| 3.3. The beginning of territorial marketing in Poland .....                         | 64        |
| 3.4. Promotional campaign .....                                                     | 66        |
| 3.5. The freedom in the execution of activities by local governments .....          | 68        |
| 3.6. Self-promotion as a form of direct contact .....                               | 70        |
| 3.7. Public relation .....                                                          | 72        |
| 3.8. Internet marketing .....                                                       | 73        |
| 3.9. Questionnaire Survey .....                                                     | 74        |
| <b>Bibliography for chapters 1, 2, 3 .....</b>                                      | <b>78</b> |

## **PART II**

### **MEASUREMENT AND ASSESSMENT THE LEVELS OF DEVELOPMENT OF THE FINAL PRODUCTS**

## **Chapter 4**

|                                                                                                                                                              |           |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------|
| <b>Management the development level of health in conditions<br/>of uncertainty .....</b>                                                                     | <b>83</b> |
| 4.1. Managerial of medical treatment .....                                                                                                                   | 83        |
| 4.1.1. Statement the meaning of development level of health<br>in connection with “failure” .....                                                            | 83        |
| 4.1.2. Measurement, evaluation and management<br>of the level of development .....                                                                           | 85        |
| 4.1.3. Medical treatment mix with patient’s state of health<br>– DMT – “M1” .....                                                                            | 86        |
| 4.1.4. Construction of the S Model as a basic mathematical<br>model within the medical treatment mix .....                                                   | 88        |
| 4.2. Level of development .....                                                                                                                              | 89        |
| 4.3. Adaptation of the Characteristics Values “CV” typical to FAM<br>to detect the development .....                                                         | 90        |
| 4.4. The earlier Characteristics Values range of 4M of Management<br>the Manufacturing as extendable of FAM’s 7M to manage the level<br>of development ..... | 90        |

|                                                                                                                                                       |     |
|-------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| 4.5. New changes in recent development with 4D and 4P .....                                                                                           | 91  |
| 4.6. Areas of the Levels authorities and Responsibilities.....                                                                                        | 92  |
| 4.7. Making a decision.....                                                                                                                           | 94  |
| 4.8. Practical side of medical treatment management the development<br>level of health in conditions of uncertainty.....                              | 95  |
| 4.8.1. Aim of the work .....                                                                                                                          | 96  |
| 4.8.2. Management in the somatic sphere treatment basing<br>on Simultaneous Model S with management towards<br>Protection against Failure – MPF ..... | 99  |
| 4.8.3. System TAHL – causal-and-effect level .....                                                                                                    | 100 |

## Chapter 5

### **The problem of of production an advances developmental vegetable oil....103**

|                                                                                                                                                            |     |
|------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| 5.1. Historical evolution of Fail Assessment Method – FAM.....                                                                                             | 103 |
| 5.2. Assessing the development level and making a decision with FAM<br>based on the S Model .....                                                          | 105 |
| 5.3. Development level indicator.....                                                                                                                      | 108 |
| 5.4. Adaptation of the Characteristics Values “CV” typical to FAM<br>to detect the development level .....                                                 | 109 |
| 5.5. The earlier Characteristics Values range of 4M – Management<br>the Manufacturing as extendable of FAM’s 7M to manage<br>the Level of Development..... | 109 |
| 5.6. Extension and modification the characteristics of FAM’s 7M<br>into 4M referring as current practical usage .....                                      | 111 |
| 5.7. Typical characteristics to distinguish the development level<br>– DL with the Marketing Mix .....                                                     | 111 |
| 5.8. Technical and economic level of the developing product.....                                                                                           | 113 |
| 5.9. Characteristics Values “CV” – technical quality & economic<br>state in reality .....                                                                  | 115 |
| 5.10. Indicators of practical confirmation of the development level.....                                                                                   | 118 |
| 5.11. Characteristics Values in the „S Rule” as a basic mathematical<br>model .....                                                                        | 121 |

### **Bibliography for chapters 4 and 5 .....123**

### **About the Authors .....127**
