## Advanced Machine Learning, CNN, Green IoTs, and Smart Education

|                                                                                                                                                                |    |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| A Comparative Study of Convolutional Neural Network Architectures for Detecting Prostate Cancer .....                                                          | 3  |
| <i>K. M. Safin Kamal, Mysha Maliha Priyanka, Alfe Suny, Maimuna Akter Liza, Sanjeda Sara Jennifer, and Ahmed Wasif Reza</i>                                    |    |
| Detection of Retinal Disease from Optical Coherence Tomography Images Using CNN Models .....                                                                   | 14 |
| <i>Md. Safayet Islam, Sadia Sultana Bristy, Tooba Azam, Md. Hasibur Rahman, Sanjeda Sara Jennifer, and Ahmed Wasif Reza</i>                                    |    |
| Machine Learning Model to Define Water Potability Considering Distinctive Chemical Contaminants .....                                                          | 22 |
| <i>Md. Sultan Moheuddin, Md. Arash Kursy Sourov, Taki Tazwar Ritom, Md. Iftekhar Hossain, Sanjeda Sara Jennifer, Mahbub Hasan Shamim, and Ahmed Wasif Reza</i> |    |
| Detecting Biodegradable and Non-biodegradable Image Using CNN and Deep Learning .....                                                                          | 31 |
| <i>Tanjina Akter Ripa, Mahade Ahmed, Khadija Akter, Md. Shahadat Anik Sheikh, Sanjeda Sara Jennifer, Mahbub Hasan Shamim, and Ahmed Wasif Reza</i>             |    |
| A Transfer Learning Based Approach For American Sign Language Recognition Using Deep Convolutional Neural Network .....                                        | 40 |
| <i>Aminul Islam, Sultana Umme Habiba, Tanjim Mahmud, Habibur Rahman, Mahmuda Akter Sumi, Nanziba Basnin, Mohammad Shahadat Hossain, and Karl Andersson</i>     |    |
| Advancing Safety Through IoT: Gas Detection and Automation Systems .....                                                                                       | 50 |
| <i>Tasmina Akter Rupina, Pusmita Barua, Israt Binteh Habib, Tanjim Mahmud, Lutfun Nahar, Nusrat Zahan, Mohammad Shahadat Hossain, and Karl Andersson</i>       |    |
| Design and Implementation of an IoT Based Biofloc Monitoring System .....                                                                                      | 60 |
| <i>Sajib Tripura, Tanjim Mahmud, Ning Prueaung Marma, Israt Ara, Koushick Barua, Anik Barua, Mohammad Shahadat Hossain, and Karl Andersson</i>                 |    |

|                                                                                                                                                            |     |
|------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Advancing Agriculture with IoT: Precision Irrigation and Monitoring System .....                                                                           | 70  |
| <i>Nishan Barua, Tanjim Mahmud, Mohammad Shahadat Hossain, and Karl Andersson</i>                                                                          |     |
| IoT Overview: Exploring the Adoption and Challenges in the Philippine Landscape .....                                                                      | 80  |
| <i>John Michael B. Reyes, John Iberson T. Roman, Cedrick Nicole H. Sandoval, and Jo-Ann V. Magsumbol</i>                                                   |     |
| Enhancing Skin Cancer Detection Through Automated Classification Using Convolutional Neural Networks .....                                                 | 94  |
| <i>Md Jakir Hossain, M. D. Wahidul Islam Bhuiyan, Sadia Afrin Raisa, Minhazul Amin Tomal, Sanjeda Sara Jennifer, Ahmed Wasif Reza, and Nazmul Siddique</i> |     |
| Enhancing Low-Resource Bangla Fake News Detection through Deep Convolutional Neural Networks .....                                                         | 104 |
| <i>Sultana Umme Habiba, Fatema Tuj Johora, Tanjim Mahmud, Tanpia Tasnim, Farzana Tasnim, Sumaiya Kabir, Mohammad Shahadat Hossain, and Karl Andersson</i>  |     |
| An Integrated CNN with LSTM for Sentiment Analysis to Detect User Emotion from Comments on Social Networks .....                                           | 115 |
| <i>Phong Le Thanh and Tham Vo</i>                                                                                                                          |     |
| Harnessing the Power of the Sun: An IOT-Based Solar Irrigation System .....                                                                                | 125 |
| <i>Rishita Chakma, Tanjim Mahmud, Rahat Akhand, Israt Ara, Koushick Barua, Anik Barua, Mohammad Shahadat Hossain, and Karl Andersson</i>                   |     |
| Implementation of Precision Education System Based on Machine Learning Model .....                                                                         | 135 |
| <i>G. Shanmugasundar, Jasgurpreet Singh Chohan, and Kanak Kalita</i>                                                                                       |     |
| Automated Brain Image Classification Using Nature-Inspired Optimization-Based Machine Learning Algorithm .....                                             | 146 |
| <i>Gurumukh Das, Gurdeep Singh, Divya Zindani, G. Shanmugasundar, Jasgurpreet Singh Chohan, and Kanak Kalita</i>                                           |     |
| Enhancing Web Security with a Blockchain-Powered Machine Learning Model for Predicting Malicious Web Domains .....                                         | 157 |
| <i>Zeng Yanqiu, S. B. Goyal, Anand Singh Rajawat, and Ram Kumar Solanki</i>                                                                                |     |

|                                                                                                                                                                      |     |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Forecasting Donations Through Machine Learning: Exploring Donation-Centric Crowdfunding in Indian Scenario .....                                                     | 167 |
| <i>Seeboli Ghosh Kundu, Shweta Puneet, G. P. Girish, and Rajani Kumari</i>                                                                                           |     |
| Profit and Cost Optimization for Single-Server Markovian Retrial Queue with Server Breakdown, Customer Balking and Feedback .....                                    | 177 |
| <i>Sudeep Singh Sanga</i>                                                                                                                                            |     |
| Study Program Recommendation System Based on the Ability Prediction of Prospective Students .....                                                                    | 188 |
| <i>Rolly Intan and Jerica Amanda Setiawan</i>                                                                                                                        |     |
| Image Captcha Blended with OTP for Secured Authentication .....                                                                                                      | 199 |
| <i>B. Bazeer Ahamed and Murugan Krishnamoorthy</i>                                                                                                                   |     |
| Leveraging Data-Driven Decision Making for E-Commerce Growth: A Machine Learning Framework .....                                                                     | 210 |
| <i>Tanjim Mahmud, Rishita Chakma, Roksana Akther, Mohammad Tarek Aziz, Taohidur Rahman, Mohammad Shahadat Hossain, and Karl Andersson</i>                            |     |
| Personalized Learning Style System Based on Student Activity Segmentation in Learning Management System Using the Felder Silverman Model with Naïve Bayes .....      | 220 |
| <i>Leo Willyanto Santoso, Yulia, and Bryan Fernando Liauwman</i>                                                                                                     |     |
| Automated Detection and Analysis of Retinal Blood Vessels in Retinopathy of Prematurity Using Image Processing Techniques .....                                      | 231 |
| <i>Sajib Tripura, Tanjim Mahmud, Dipu Das, Israt Ara, Koushick Barua, Anik Barua, Mohammad Shahadat Hossain, and Karl Andersson</i>                                  |     |
| Integrating Security in Software Defined Network (SDN) with IoT Enabled Fog Computing: A Paradigm Shift in Edge Computing .....                                      | 241 |
| <i>Ankita Karale, Ram Kumar Solanki, Anand Singh Rajawat, S. B. Goyal, Yao Peiyu, and Weiming Chee</i>                                                               |     |
| Mechanical System Vulnerabilities: Advanced Fusion Machine Learning Model for Detecting Ethereum Attack Patterns in IIoT-5.0 Environments .....                      | 252 |
| <i>Vishal N. Sulakhe, S. B. Goyal, Amit Gaddekar, Manisha Wasnik, Pankaj Agarkar, and Anand Singh Rajawat</i>                                                        |     |
| Advancing Substation Demand Forecasting Efficiency with AI/ML-Powered Solutions: A Comparative Exploration of Nonlinear Techniques Versus Conventional Methods ..... | 263 |
| <i>Avisek Kundu, G. P. Girish, Seeboli Ghosh Kundu, and Anshuman Singh</i>                                                                                           |     |

|                                                                                                                                    |     |
|------------------------------------------------------------------------------------------------------------------------------------|-----|
| Revolutionizing e-Learning: Harnessing the Power of Artificial Neural Networks for Personalized Education and Beyond .....         | 270 |
| <i>Shard, Devesh Kumar, Pankaj Vaidya, and Sapna Koul</i>                                                                          |     |
| Gamification as Online Teaching Strategy: Case Study from Various Subjects .....                                                   | 280 |
| <i>Leo Willyanto Santoso and Gatut Priyowidodo</i>                                                                                 |     |
| Education Certificate Storage and Verification Using Blockchain and Interplanetary File System .....                               | 288 |
| <i>Md. Saiful, Md. Sohel Rana, Nabila Shaeed, Md. Hasanul Ferdous, and Ahmed Wasif Reza</i>                                        |     |
| Optimizing Energy Efficiency in Data Centers Through Machine Learning Model .....                                                  | 297 |
| <i>Md. Shadman Sakib, Md. Shorif Hossain, Ifterkhar Ahmed Shohan, Md. Aahadul Islam Fardin, Ahmed Wasif Reza, and Mehedi Masud</i> |     |
| A Comparative Study of Machine Learning Techniques for Predicting Student Academic Performance .....                               | 307 |
| <i>Shyama Heshini Niranjala, Mustafa Muwafak Alobaedy, and S. B. Goyal</i>                                                         |     |
| Adaptive Quantum Learning Frameworks for Real-Time IIoT Attack Identification .....                                                | 316 |
| <i>Poonam Joshi, S. B. Goyal, Anand Singh Rajawat, Ram Kumar Solanki, and Chuqiao Chen</i>                                         |     |
| Deep Learning Based Driver Warning System Based on Face Features Recognition .....                                                 | 326 |
| <i>Rakibul Huda, Al Azim Islam Khan Iram, Md. Muktadir Mukto, Fahadul Islam, and Ahmed Wasif Reza</i>                              |     |
| Smart University: Solutions, Advantages, Challenges of Utilizing IoT in Smart Education Domain .....                               | 337 |
| <i>Minh Ngo Hong and Tham Vo</i>                                                                                                   |     |
| A Survey Convolutional Neural Networks Using SPSS Statistics .....                                                                 | 348 |
| <i>T. S. Sasikala, E. Rushit Gnana Roy, R. V. Akshera, S. Sivakami, and M. Ramachandran</i>                                        |     |
| IOT Enabled Cloud Based Risk Monitoring System in Food Supply Chain .....                                                          | 356 |
| <i>B. Sathyasri, G. Aloy Anuja Mary, C. Ambika Bhuvaneshwari, K. Aanandha Saravanan, and S. Vishnu Kumar</i>                       |     |

|                                                                                                              |            |
|--------------------------------------------------------------------------------------------------------------|------------|
| Machine Learning in Human Resources Management for Higher Education Institutes .....                         | 365        |
| <i>M. Karthikeyan, M. S. R. Mariyappan, J. Sridevi, and S. Vishnu Kumar</i>                                  |            |
| Constructivist Approaches on Developing 4Cs of 21 Century Skills .....                                       | 374        |
| <i>Prajnya Sarangi and M. Ramachandran</i>                                                                   |            |
| An Empirical Study on Stock Market Prediction by Machine Learning Algorithms .....                           | 384        |
| <i>J. Venkata Ramana, Y. Siva Reddy, D. Hanuma Reddy, J. Thanushmad, N. Kusumanjali, and M. Ramachandran</i> |            |
| A Comparative Study of Accuracy for Novel Bankruptcy Prediction System Using Diverse Algorithms .....        | 395        |
| <i>S. Ramesh Babu, B. Krishnaiah, N. Mohan, P. Narayana Rao, and M. Ramachandran</i>                         |            |
| Convolutional Neural Networks for Image Classification Using the SPSS Method .....                           | 405        |
| <i>D. Chandraprakash, D. R. Pallavi, M. Ramachandran, Chinnasami Sivaji, and M. Amudha</i>                   |            |
| <b>Author Index .....</b>                                                                                    | <b>417</b> |
