Chapter 1 Access control for Internet of Things—enabled assistive technologies: an architecture, challenges and requirements	1
Shantanu Pal, Michael Hitchens and Vijay Varadharajan	
1.1 Introduction	1
1.2 Background	4
1.3 Design of an access control architecture: our approach	14
1.4 Challenges	32
1.5 Conclusion	34
Glossary	35
Acknowledgment	36
References	36
 Chapter 2 An efficient ambient intelligent—assisted people searching for Internet of Things—based health-care system	 45
Dongfei Xue, Yongqiang Cheng and Prosanta Gope	
2.1 Introduction	45
2.2 Social robots	46
2.3 Challenges	48
2.4 Ambient intelligence	52
2.5 System architecture	53
2.6 Ambient intelligent—assisted people searching	55
2.7 Conclusion	57
References	57
 Chapter 3 Securing the elderly in cyberspace with fingerprints	 59
Guanglou Zheng, Wencheng Yang, Mike Johnstone, Rajan Shankaran and Craig Valli	
3.1 Introduction	59
3.2 Elderly health-care system	61

3.3 Password usage for the elderly: key challenges	63
3.4 Fingerprint authentication design	64
3.5 Fingerprint-authentication algorithms	71
3.6 Discussions	77
3.7 Conclusion	78
References	78
Chapter 4 Wearable solution for robust fall detection	81
Poi Voon Er and Kok Kiang Tan	
4.1 Introduction	81
4.2 Hardware development	84
4.3 Algorithms for human fall detection	87
4.4 Experiment and verification	97
4.5 Conclusion	103
References	104
Chapter 5 Heart sound detection, analysis, and assistive technologies for the elderly	107
Joyanta Kumar Roy, Tanmay Sinha Roy and Subhas Chandra Mukhopadhyay	
5.1 Introduction	107
5.2 Machine learning Apps for heart sound diagnosis	153
5.3 Assistive technologies for aging patients in dealing with cardiovascular diseases: medical devices and eHealth solutions.....	158
5.4 Portable ventilator	159
5.5 Portable hemoglobin meter.....	160
5.6 The medical data communication system	162
5.7 Real-time measurement of meteorological events on public health.....	163
5.8 Urine albumin test.....	164
5.9 Sputum mobilization device.....	166
5.10 Interventional cardiovascular lab.....	167
5.11 Mobile ECG with web-based telemedicine	168
5.12 A multiparameter remote diagnostic kit.....	170
5.13 Noninvasive vascular age risk prediction.....	171
5.14 Portable anesthesia machine	173

5.15 Safety choice pill dispenser system—a simple, cost-effective solution to prevent medication mistakes	175
5.16 Smart homes for elderly healthcare: prototypes and commercial solutions	176
5.17 Smart monitoring systems for elderly and people with disability	177
5.18 Vital signs monitoring systems.....	178
5.19 Internet-of-Things and connected homes	179
5.20 Conclusion	181
References	181
Further reading	184

Chapter 6 Assistive sensing technology for the elderly health monitoring.....	185
Tarikul Islam	
6.1 Introduction	185
6.2 Ambient assistive sensors technology	186
6.3 Wearable sensors to monitor physiological parameters of elderly	206
6.4 Conclusion	220
Acknowledgment	222
References	222

Chapter 7 Assistive technology for garments: an all seasons' jacket	225
Shubhajit Roy Chowdhury, Rohan Agrawal, Gaurav Meena, Akul Gupta, Manish Sharma, Vikas Kumar and Shubham Kumar	
7.1 Introduction	225
7.2 Review of cooling techniques used	226
7.3 Implementation of heating/cooling system	227
7.4 Working principle of thermoelectric cooler.....	232
7.5 Impact on society	232
7.6 Conclusion	233
References	233

Chapter 8 Edge computing for visitor identification using eigenfaces in an assisted living environment.....	235
Srinivasa Raju Rudraraju, Nagender Kumar Suryadevara and Atul Negi	
8.1 Introduction	235
8.2 Related work.....	237
8.3 Methodology	238
8.4 Implementation details	242
8.5 Conclusion and future work	246
References	247
 Chapter 9 Toward unsupervised multiresident tracking in ambient assisted living: methods and performance metrics.....	249
Tinghui Wang and Diane J. Cook	
9.1 Introduction	249
9.2 Challenges and related work.....	251
9.3 Smart home for ambient assisted living	254
9.4 Multiresident tracking in smart homes.....	259
9.5 Performance metrics.....	270
9.6 Experiments and discussion	274
9.7 Conclusion	277
Acknowledgments	279
References	279
 Chapter 10 Significance of digital microfluidic techniques in biomedical devices for healthcare.....	281
Yun Hui, Zhiting Peng, Md Eshrat E. Alahi, Boshi Jiang and Tianzhun Wu	
10.1 Introduction	281
10.2 Digital microfluidics techniques.....	283
10.3 Digital microfluidics techniques in biomedical devices for healthcare	286
10.4 Conclusion	298
Acknowledgments	299
References	299

Chapter 11 Assistive devices for elderly mobility and rehabilitation: review and reflection	305
K.M. Goher and S.O. Fadlallah	
11.1 Introduction	305
11.2 Mobility assistive devices	308
11.3 Smart walkers	320
11.4 Reflections and conclusions	330
Acknowledgment	332
Declaration	332
Funding	333
Authors' contributions	333
References	333
Further reading	341
Index	343
