

TABLE OF CONTENTS

ABOUT THE CONFERENCE	9
CMES 2023 SCIENTIFIC COMMITTEE	11
CMES 2023 ORGANIZING COMMITTEE	13
ORGANIZER	15
CO-ORGANIZERS	15
CMES 2023 PATRONAGES	15
MEDIA PATRONAGE	16
FUNDING	16
CMES 2023 KEYNOTE SPEAKERS	17
ABSTRACTS	29
ANALYSIS OF ENGINEERING PROCESSES	29
Radostław Kiciński	
Estimating the size of a crater after an underwater explosion	29
Adrian Bochen, Bartłomiej Ambrożkiewicz	
The influence of light Intensity on the operation of vision system in collaborative robot	30
Leszek Łatka, Ewa Jonda, Tomasz Kielczawa	
The influence of the laser cutting process parameters on the quality of the cut edge	31
Klaudia Słomczyńska, Paweł Mirek, Marcin Panowski	
Analysis of the potential for reducing the energy consumption of a vegetable sprouts production using Flownex Simulation Software	32
Magdalena Matysiak, Jarosław Zubrzycki, Magdalena Przybylska-Fronc	
Analysis of the applicability of thermal imaging measurements for early detection of arteriovenous malformations	33
Bartosz Wieczorek, Piotr Kaczmarzyk, Łukasz Warguła, Marcin Giedrowicz, Damian Bąk, Łukasz Gierz, Grigor Stambolov, Boris Kostov	
Research on the distribution of axial excitation of mobile overpressure fans in the aspect of stability safety of the load-bearing frame	34
Aleksandra Szaja, Agnieszka Montusiewicz, Magdalena Lebiocka, Jan Skrzypiec	
An application of orifice hydrodynamic cavitation reactor for tertiary treatment of wastewater treatment plant effluents	35

APPLICATION OF COMPUTER PROGRAMS IN TECHNOLOGY	36
Michał Grabowski, Małgorzata Plechawska-Wójcik Comparison of software development solution implementations in Lightning Flow Builder and Apex programming language in Salesforce technology	36
Ireneusz Dominik, Stanisław Flaga Implementation of Type-2 Fuzzy Controller in Matlab Software	37
Katarzyna Kurek, Maria Skublewska-Paszkowska, Mariusz Dzienkowski, Paweł Powroźnik The impact of applying universal design principles on the usability of online accommodation booking websites	38
Sylwester Korga, Kamil Żyła, Jerzy Józwiak, Jarosław Pytka, Kamil Cybul Prediction tools as an element aiding decision processes at an airport – The case of Facebook Prophet library	39
Kamil Żyła, Kinga Chwaleba, Dominik Choma Accessibility assessment of visual programming tools for novice programmers - The case of App Inventor, Scratch and StarLogo	40
Paweł Kuraś, Dominik Strzałka, Bartosz Kowal REDUCE: A Python module for reducing inconsistency in multiplicative pairwise comparisons	41
ARTIFICIAL AND COMPUTATIONAL INTELLIGENCE	42
Arsen Plaksyvyyi, Maria Skublewska-Paszkowska, Paweł Powroźnik A comparative analysis of image segmentation using classical and deep learning approach	42
Maria Skublewska-Paszkowska, Paweł Powroźnik, Marcin Barszcz, Krzysztof Dziedzic Dual attention graph convolutional neural network to support mocap data animation	43
Edyta Łukasik, Wiktor Flis Efficiency comparison of networks in handwritten Latin characters recognition with diacritics	44
Justyna Kujawska, Monika Kulisz, Zulfiya Aubakirova, Edyta Wojtaś Prediction of river salinity with artificial neural networks	45
Marcin Dziadosz, Dariusz Majerek, Marcin Dudziński, Grzegorz Łagód Application of deep learning neural networks for automatic image analysis in microscopic studies of activated sludge	46

COMPUTATIONAL FLUID DYNAMICS (CFD)	47
Zbigniew Czyż, Paweł Karpiński, Krzysztof Skiba, Szymon Bartkowski	
Numerical calculations of water drop using a firefighting aircraft	47
Konrad Pietrykowski, Paweł Magryta, Idzi Pędzisz	
CFD studies of a wind vertical axis turbine with a variable swept area	48
Zbigniew Czyż	
Aerodynamic performance of the XGyro hybrid unmanned aerial vehicle – a numerical investigation	49
Robert Szczepaniak, Robert Bąbel, Grzegorz Kowaleczko, Wit Stryczniewicz	
Computational fluid dynamics analysis of an influence of icing on airfoil aerodynamic characteristics	50
Paweł Czekalowski, Wit Stryczniewicz	
Computational and Experimental Investigation of Inert Gas Flow Field in DMLM Printer Build Chamber	51
Tomasz Seredyn, Małgorzata Skawińska	
Computational analysis of PEM fuel cell under different operating conditions	52
COMPUTER SIMULATIONS OF PROCESSES AND PHENOMENA	53
Jakub Pizoń, Łukasz Wójcik, Arkadiusz Gola, Łukasz Kański, Izabela Nielsen	
Autonomous mobile robot implementation strategy to support intralogistics auxiliary processes using modern technologies of Logistics 4.0 – case study	53
Tomasz Nowicki, Robert Piekarski	
Investigation on the limits of type 1 diabetes therapy automation using insulin pumps	54
Agnieszka Bojanowska, Monika Kulisz	
Using fuzzy logic to make decisions based on data from Customer Relationship Management systems	55
Tomasz Zientarski, Marek Miłoś, Tomasz Nowicki, Adam Kiersztyn, Piotr Wójcicki, Dariusz Gutek	
Simulation model of a patient with type 1 diabetes using fuzzification	56
Piotr Kościuk, Jacek Zaborko, Magdalena Piłat-Rożek, Grzegorz Łagód	
Application of open source geo-informatics technologies for the analysis of stormwater drainage basin areas	57
Aleksandra Kozłowska, Magdalena Piłat-Rożek, Edyta Wojtaś, Grzegorz Łagód	
Application of Entropy Based Analysis for Evaluation of Algal Community Structure Influenced by Stormwater Systems	58

Izabela Kopeć, Mateusz Kawałko

Analysis of the impact of trailing-edge wing flaps on the aerodynamic characteristics and performance of the Tecnam P-2008JC aircraft 59

Paweł Suchorab, Dariusz Kowalski, Małgorzata Iwanek, Beata Kowalska, Ewa Hołota

Quantitative and qualitative analysis of surface runoff from the exemplary rest area (RA) 60

FINITE ELEMENT METHOD (FEM) 61**Katarzyna Falkowicz**

Failure study of compressed thin-walled plate element with mechanical couplings 61

Bogdan Szturomski, Radosław Kiciński, Stanisław Milewski

Accelerations caused by underwater explosions on the naval gun foundation 62

Quirino Estrada, Jarosław Zubrzycki, Elva Reynoso-Jardón, Dariusz Szwedowicz, Alejandro Rodriguez-Mendez, Magdalena Marchewka, Julio Vergara-Vazquez, Aztlán Bastarrachea, Jesús Silva
Numerical study of the energy absorption performance of 3D printed sandwich structures 63

Robert Szczepaniak, Janusz Terpiłowski, Grzegorz Woroniak

The possibility of using the Finite Element Method for determining thermal diffusivity on the example of nickel using the classic and the modified pulse method 64

Jan Górecki, Tymoteusz Lindner, Krzysztof Walesa

Evaluation of density fields of numerical analysis output of solid carbon dioxide extrusion process 65

Marcin Brzozowski, Jarosław Zubrzycki, Dariusz Wołos

Numerical study of the strength of the pylon designed for the unmanned helicopter 66

MATERIAL PROPERTIES AND STRUCTURE RESEARCH METHODS 67

Mirosław Szala, Mariusz Walczak, Małgorzata Grądzka-Dahlke, Dariusz Perkowski, Marzena Tokarewicz, Wojciech J. Nowak, Tadeusz Kubaszek, Andrzej Gradzik

Cavitation erosion of NiCoCrAlFeTi high-entropy alloys containing different additions of titanium 67

Tomasz Miłek

Experimental determination of material boundary conditions for computer simulation of sheet metal deep drawing processes 69

Ewa Jonda, Dariusz Fydrych, Leszek Łatka

The use of cluster analysis to assess the wear resistance of cermet coatings sprayed by HVOF on magnesium alloy substrates 70

Kazimierz Drozd, Iryna Boretska Tests of the adjustable support system in order to eliminate the causes of operational damage	71
Anna Skic, Paweł Kołodziej, Karolina Beer-Lech, Kamil Drabik, Kamil Skic, Ricardo Branco Analysis of the mechanical properties of quail femur under impact loading condition	72
Karolina Beer-Lech, Paweł Kołodziej, Anna Skic, Ricardo Branco Strength analysis aspects of psyllium husks/thermoplastic starch films under impact loading conditions	73
Łukasz Gierz, Weronika Kruszelnicka, Wiktor Łykowski, Mikołaj Steike Effects of thickness of the corn seed coat on the strength of processed biological materials	74
Michał Bembenek, Volodymyr Tsyganov, Nataliia Sakhniuk, Olha Lazareva, Ryszard Machnik, Liubomyr Ropyak Tribology characteristics of heatproof alloys at a dynamic pin lading in the variable temperature field	75
Łukasz Omen, Robert Szczepaniak, Andrzej J. Panas Investigation of carbon nanotube particles addition effect on the dispersed composite structure thermal diffusivity	76
Joanna Masiewicz, Paweł Przybyłek, Martyna Roszowska – Jarosz, Marcin Kostrzewa, Wojciech Kucharczyk, Mateusz Czyż Impact damage tolerance of multilayer epoxy-glass composites with XPS core and polyurethane prepolymer modified matrix	77
Serhii Kharchenko, Sylwester Samborski, Farida Kharchenko, Jakub Paśnik, Izabela Korzec, Andrzej Mitura, Łukasz Kłoda Numerical study of the natural oscillations of perforated vibrating surfaces with holes of complex geometry	78
Jacek Janiszewski, Andrzej Komorek, Mieczysław Bakula, Rafał Bieńczak, Bartosz Pękala The influence of pressure in the infusion method upon mechanical properties of polymer composites	79
Marek Borowiec, Robert Szczepaniak, José Machado The influence of conditioning on dynamic behaviour of polymer composites	80
Aleksander Świetlicki, Mariusz Walczak, Mirosław Szala Corrosion resistance of heat treated 17-4PH steel fabricated using DMLS technology	81
Weronika Henzler, Natalia Fedec, Julia Wójtowicz, Nikola Woźniak, Klaudia Tarach, Mirosław Szala Influence of deposition parameters on properties of coatings made by plasma-powder PTA method	82

Julia Wójtowicz, Nikola Woźniak, Weronika Henzler, Klaudia Tarach, Mirosław Szala	
Modification of 42CrMo4 steel hardness via heat treatment	84
Mariusz Walczak	
Surface characteristics and corrosion resistance of 316L stainless steel after different shot peening parameters	85
Wojciech Łapa, Marcin Winnicki, Leszek Łatka	
Infrared sintering of various nanosilver inks in aerosol jet printing	86
PRODUCTION ENGINEERING, MANAGEMENT AND QUALITY CONTROL	87
Olga A. Orynycz, Karol Tucki, Antoni Świć, Andrzej Wasiak, Remigiusz Mruk, Akadiusz Gola	
Analysis of the possibility of using neural networks to monitor the technical efficiency of diesel engines during operation	87
TECHNOLOGY MANAGEMENT IN ENERGY ACQUISITION PROCESSES	88
Łukasz Warguła, Dominik Wilczyński, Bartosz Wieczorek, Maciej Sydor, Carla Nati, Teijo Palander, Łukasz Gierz	
Characterizing sawdust fractional composition from oak parquet woodworking for briquette and pellet production	88
Paweł Kołodziej, Zbigniew Stropek, Krzysztof Gołacki	
Stress relaxation in sugar beet root under various mechanical load conditions	89
RELATED TOPICS	90
Stanisław Skulimowski, Jerzy Montusiewicz, Marcin Badurowicz	
Enhancing the efficiency of the Levenshtein distance based heuristic method of arranging 2D apictorial elements for industrial applications	90
Jacek Caban	
Research of electrical parameters of start-up process of single-cylinder diesel engine	91
Maciej Kowal	
Effect of bond end shape on CFRP to steel joint strength under the fatigue load	92
Michał Awtoniuk, Robert Sałat, Miłosz Worwa, Bartosz Klimek, Volodymyr Reshetiuk	
Implementation of PID autotuning procedure based on doublet-pulse method in PLC controller	93
