

Table of contents

Introduction. <i>What does smell have to do with social science?</i>	7
1. About the essence of the sense of smell	11
1.1. The anatomy and function of the olfactory organ	13
1.2. Odor sensing functions in everyday life	18
2. Olfactory disorders	23
2.1. Around the concept – olfactory disorders	25
2.2. Diagnosis of olfactory disorders	30
2.3. Hyposmia and selected disorders and disease entities	36
2.4. About olfactory disability	42
3. Therapy of olfactory disorders	45
3.1. Treatment, therapy, or teaching?	47
3.2. A review of existing therapies dedicated to people with hyposmia	48
4. Consequences of hyposmia for daily life in people after a total laryngectomy – pre-implementation stage for a device for diagnosis and stimulation of olfactory disorders	51
4.1. A few words about total laryngectomy	54
4.2. Hyposmia in people after laryngeal loss	67
4.3. Hyposmia therapy used among laryngectomized patients	69
4.4. Consequences of olfactory disorders for daily life in people after a total laryngectomy and the need for a diagnostic and stimulation device – own research	74
4.4.1. Subject, objectives, and research questions	75
4.4.2. Author's Questionnaire: <i>The Consequences of Hyposmia in Daily Life</i>	75

4.4.3. Characteristics of the subjects and organization of the study	77
4.4.4. Results from the ongoing project	77
4.4.5. Research conclusions	80
 5. Olfactor – an innovative olfactory stimulation device dedicated to people after a total laryngectomy – implementation stage	 83
5.1. Design of the device.	85
5.2. The purpose of the creation of the device. <i>To whom is Olfactor dedicated?</i>	86
5.3. Device effectiveness – terminological clarification.	86
5.4. Olfactor – research on the prototype – the manual version (with a nasal pear)	87
5.4.1. Description of the device (manual version)	87
5.4.2. Methodology of own research on the effectiveness of the prototype in the manual version.	88
5.4.3. Results of own research (manual version)	90
5.4.4. Conclusions	91
5.5. Olfactor 1.0. – prototype research – mechanical version	91
5.5.1. Description of the device (mechanical version)	92
5.5.2. Methodology of own research on the effectiveness of the prototype in the mechanical version.	92
5.5.3. Results of own research (mechanical version)	96
5.5.4. Conclusions	101
 6. Summary – next stage of implementation and an idea for further research on the use of Olfactor	 103
 Own reflections about the project as a conclusion	 107
Bibliography	111
