Preface..... XXV

Acknowledgment .....XXix

**Chapter 1** Project Overview and Highway Engineering ..... 1

    1.1 General..... 1

    1.2 Build Operate and Transfer (BOT) Annuity Model ..... 2

        1.2.1 Concessions, Build Operate Transfer (BOT),  
                and Design Build ..... 2

            1.2.1.1 Operate (DBO) Projects..... 2

        1.2.2 Overview of Concessions, BOTs, and DBO Projects..... 2

        1.2.3 Key Features ..... 3

            1.2.3.1 Concessions ..... 3

            1.2.3.2 BOT Projects..... 4

        1.2.4 Contractual Structure ..... 6

    1.3 The Hybrid Annuity Model (HAM)..... 6

        1.3.1 The Importance..... 7

        1.3.2 Why the Project Authority, Developer Builder and  
                Public Should Care ..... 7

    1.4 Feasibility Study ..... 8

        1.4.1 Preparation of Feasibility Studies Report (FSR) ..... 8

    1.5 Detail Project Report (DPR) ..... 9

        1.5.1 Preparing the DPR..... 9

            1.5.1.1 Chapter 1: Introduction..... 9

            1.5.1.2 Chapter 2: Socioeconomic Profile ..... 10

            1.5.1.3 Chapter 3: Traffic Surveys, Analysis, and  
                        Forecast..... 10

            1.5.1.4 Chapter 4: Engineering Surveys and  
                        Investigation Report..... 11

            1.5.1.5 Chapter 5: Improvement Proposals and  
                        Preliminary Design ..... 11

            1.5.1.6 Chapter 6: Cost Estimate ..... 12

            1.5.1.7 Chapter 7: Conclusion ..... 12

    Bibliography ..... 12

**Chapter 2** Design Standards ..... 13

    2.1 General..... 13

    2.2 Highway Detail Engineering..... 13

        2.2.1 Design Criteria..... 13

|        |                                                    |    |
|--------|----------------------------------------------------|----|
| 2.2.2  | Terrain Classification .....                       | 13 |
| 2.2.3  | Lane Requirement .....                             | 14 |
| 2.2.4  | Lane Width .....                                   | 14 |
| 2.2.5  | Shoulders .....                                    | 14 |
| 2.2.6  | Medians .....                                      | 15 |
| 2.2.7  | Side Slopes .....                                  | 15 |
| 2.2.8  | Right of Way (ROW) .....                           | 15 |
| 2.2.9  | Cross Sectional Elements .....                     | 16 |
| 2.2.10 | Super Elevation .....                              | 16 |
| 2.2.11 | Plain and Rolling Terrain .....                    | 16 |
| 2.2.12 | Hilly Terrain .....                                | 16 |
| 2.2.13 | Standards for Interchange Elements .....           | 16 |
| 2.2.14 | Median Openings .....                              | 17 |
| 2.2.15 | Underpasses/Cattle Crossings .....                 | 17 |
| 2.2.16 | Standards for Interchanges .....                   | 18 |
| 2.2.17 | Standards for At-Grade Intersections .....         | 19 |
| 2.2.18 | Subsurface Drainage .....                          | 19 |
| 2.2.19 | Surface Drainage .....                             | 19 |
| 2.2.20 | Design Standards for Bridges/Structures .....      | 19 |
| 2.2.21 | Width of New Bridges .....                         | 20 |
| 2.2.22 | Minor Bridges .....                                | 21 |
| 2.2.23 | Major Bridges .....                                | 21 |
| 2.2.24 | Rail Over Bridges (ROBs) .....                     | 21 |
| 2.2.25 | Underpasses .....                                  | 21 |
| 2.2.26 | Flyovers .....                                     | 22 |
| 2.2.27 | Planning for New Bridges .....                     | 22 |
| 2.2.28 | Planning for New Culverts .....                    | 22 |
| 2.2.29 | Design Loading .....                               | 23 |
| 2.2.30 | Carriageway Live Load .....                        | 23 |
| 2.2.31 | Tractive and Braking Force .....                   | 23 |
| 2.2.32 | Footpath Live Load .....                           | 24 |
| 2.2.33 | Wind Forces .....                                  | 24 |
| 2.2.34 | Seismic Forces .....                               | 24 |
| 2.2.35 | Buoyancy Effects .....                             | 24 |
| 2.2.36 | Codes and Publications .....                       | 24 |
| 2.2.37 | Deck Levels of Structures .....                    | 24 |
| 2.3    | Roadway Capacity and Levels of Service (LOS) ..... | 25 |
| 2.3.1  | Level of Service (LOS) .....                       | 25 |
| 2.3.2  | Design Vehicle .....                               | 25 |
| 2.3.3  | Capacity Analysis .....                            | 25 |
| 2.4    | Design Speed .....                                 | 27 |
| 2.4.1  | Driving Speed .....                                | 27 |
| 2.4.2  | Selecting of Design Speed .....                    | 27 |
| 2.4.3  | Effect of Terrain .....                            | 27 |

|       |                                                                                |    |
|-------|--------------------------------------------------------------------------------|----|
| 2.4.4 | Posted Speed Related to Design Speed .....                                     | 28 |
| 2.4.5 | Existing Roads .....                                                           | 29 |
| 2.4.6 | Locations of Changing Design Speed .....                                       | 29 |
| 2.4.7 | Interchanges.....                                                              | 29 |
| 2.4.8 | Reduction Below Standards.....                                                 | 30 |
| 2.5   | Sight Distance .....                                                           | 30 |
| 2.5.1 | General .....                                                                  | 30 |
| 2.5.2 | Driver's Eye Height and Object Height.....                                     | 30 |
| 2.5.3 | Stopping Sight Distance (SSD) .....                                            | 31 |
| 2.5.4 | Safe Passing Sight Distance (SPSD) or Overtaking<br>Sight Distance (OSD) ..... | 32 |
| 2.5.5 | Decision Sight Distance (DSD).....                                             | 33 |
| 2.5.6 | Maintaining Sight Distances.....                                               | 35 |
| 2.5.7 | Provision of Safe Passing Site Distance .....                                  | 35 |
|       | Bibliography .....                                                             | 35 |

### **Chapter 3** Introduction to Computer Applications .....37

|        |                                                                                            |    |
|--------|--------------------------------------------------------------------------------------------|----|
| 3.1    | General .....                                                                              | 37 |
| 3.2    | Topographical Maps or Aerial Survey Data Processing .....                                  | 37 |
| 3.3    | Processing of Topographic Survey Data by<br>Total Station Instrument.....                  | 38 |
| 3.4    | Processing of Cross Section Survey Data by<br>Autolevel Instrument.....                    | 39 |
| 3.5    | Processing of Bearing Line Survey Data .....                                               | 39 |
| 3.6    | Processing of Ground Elevation Data by<br>Satellite Downloaded from Internet.....          | 40 |
| 3.7    | The Contours are Superimposed on<br>the Satellite Imagery .....                            | 40 |
| 3.8    | Ground Modeling.....                                                                       | 41 |
| 3.9    | Triangulation and Contours .....                                                           | 41 |
| 3.10   | Tutorial Videos .....                                                                      | 42 |
| 3.11   | New Highway or Low-Cost Rural Road Design with<br>Uniform Single or Dual Carriageway ..... | 42 |
| 3.12   | New Highway, Expressway, or Freeway Design with<br>Multiple Sections .....                 | 42 |
| 3.13   | Highway, Expressway, or Freeway Widening with<br>Multiple Sections .....                   | 43 |
| 3.14   | Hill Road Design.....                                                                      | 43 |
| 3.15   | Design of At-Grade Intersections.....                                                      | 43 |
| 3.16   | Design of Multi-Level Grade Separated Interchanges.....                                    | 44 |
| 3.17   | Design of Flexible and Rigid Pavement.....                                                 | 44 |
| 3.18   | Design of Highway Drainage.....                                                            | 44 |
| 3.19   | Modes of Data Processing .....                                                             | 44 |
| 3.19.1 | New/Open Project Workspace .....                                                           | 45 |

|          |                                                                   |    |
|----------|-------------------------------------------------------------------|----|
| 3.19.1.1 | Selecting the Processing Mode as New/Open Project Workspace ..... | 45 |
| 3.19.2   | New/Open a Project Data File .....                                | 46 |
| 3.19.3   | New/Open a Text Data File .....                                   | 46 |
|          | Bibliography .....                                                | 47 |

|                  |                                                                              |           |
|------------------|------------------------------------------------------------------------------|-----------|
| <b>Chapter 4</b> | <b>Topographical Survey and Data Collection .....</b>                        | <b>49</b> |
| 4.1              | General .....                                                                | 49        |
| 4.2              | Topographical Surveys and Investigations .....                               | 49        |
| 4.2.1            | Reconnaissance and Alignment .....                                           | 49        |
| 4.2.2            | Topographic Surveys .....                                                    | 50        |
| 4.2.2.1          | Longitudinal and Cross Sections .....                                        | 51        |
| 4.2.2.2          | Details of Utility Services and Other Physical Features .....                | 51        |
| 4.3              | Traverse Survey and Electronic Distance Measurement (EDM) Applications ..... | 52        |
| 4.3.1            | Correcting a Traverse by Bowditch's Method .....                             | 59        |
| 4.3.2            | Correcting a Traverse by the Transit Rule .....                              | 66        |
| 4.3.3            | Closed Link Traverse .....                                                   | 70        |
| 4.3.4            | Electronic Distance Measurement (EDM) .....                                  | 71        |
| 4.4              | Total Station Survey .....                                                   | 75        |
| 4.5              | Cross Section Survey by Autolevel .....                                      | 77        |
| 4.6              | Geographic Coordinate System Transformations .....                           | 78        |
| 4.6.1            | Geographic Coordinate System Transformation Methods .....                    | 79        |
| 4.6.2            | Geographic Coordinate System Transformation Formulas .....                   | 81        |
| 4.6.2.1          | Geographic/Geocentric Conversions .....                                      | 81        |
| 4.6.2.2          | Offsets .....                                                                | 82        |
| 4.6.2.3          | Geocentric Translations .....                                                | 83        |
| 4.6.2.4          | Abridged Molodenski Transformation .....                                     | 84        |
| 4.6.2.5          | Helmert Transformation .....                                                 | 84        |
| 4.7              | Computer-Aided Design of Processing for Coordinate Conversion .....          | 87        |
| 4.8              | Triangulation .....                                                          | 88        |
| 4.8.1            | Delaunay Triangulation and Algorithm .....                                   | 88        |
| 4.8.1.1          | The Delaunay Triangulation has the Following Interesting Properties .....    | 89        |
| 4.8.1.2          | Developing a Delaunay Triangulation .....                                    | 90        |
| 4.8.1.3          | Degeneracies .....                                                           | 90        |
| 4.8.1.4          | Data Structures .....                                                        | 91        |
| 4.8.1.5          | Shape Refinement .....                                                       | 91        |
| 4.8.1.6          | Complexity .....                                                             | 92        |
| 4.8.1.7          | Environment for Implementation .....                                         | 93        |

|         |                                                                  |    |
|---------|------------------------------------------------------------------|----|
| 4.8.1.8 | Various Modules in the Triangulation Process .....               | 93 |

| 7.15   | Computer-Aided Design of Road Cross Sections..... | 137 |
|        | Bibliography.....                                 | 137 |

## **Chapter 8** Estimation of Earthwork and Pavement Quantities..... 139

|         |                                            |     |
|---------|--------------------------------------------|-----|
| 8.1     | General.....                               | 139 |
| 8.1.1   | Estimation of Areas and Volumes.....       | 139 |
| 8.1.2   | Irregular Shapes.....                      | 139 |
| 8.2     | “Give and Take” Lines.....                 | 139 |
| 8.3     | Counting Squares.....                      | 140 |
| 8.4     | Trapezoidal Rule.....                      | 140 |
| 8.5     | Simpson’s Rule.....                        | 141 |
| 8.6     | Calculations for Earthwork Volumes.....    | 142 |
| 8.6.1   | Volume from Cross Sections.....            | 144 |
| 8.6.1.1 | Sections Level Across.....                 | 144 |
| 8.6.1.2 | Sections with Crossfall.....               | 145 |
| 8.6.1.3 | Sections Part in Cut and Part in Fill..... | 147 |
| 8.6.1.4 | Sections of Variable Level.....            | 149 |
| 8.7     | Computation of Volumes.....                | 151 |
| 8.7.1   | Volumes by Mean Areas.....                 | 151 |
| 8.7.2   | Volumes by End Areas.....                  | 152 |
| 8.7.3   | Volumes by Prismoidal Formula.....         | 154 |

8.8 Computer-Aided Estimation of Earthworks and Pavement Quantities ..... 160

Bibliography ..... 160

**Chapter 9** Design Drawings ..... 161

9.1 General ..... 161

9.2 Drawings Requirement ..... 161

9.3 Sequence and Scales of Drawings ..... 161

9.4 Features of Drawings ..... 162

9.4.1 Cover or Title Page ..... 162

9.4.2 Drawing Index ..... 162

9.5 Key Plan ..... 162

9.6 Location Plan ..... 163

9.7 Abbreviation, Symbol, and Legend Plan ..... 163

9.8 Elements of Curve Plan ..... 163

9.9 Superelevation Details Plan ..... 163

9.10 Typical Road Cross Section and Pavement Details Plan ..... 164

9.11 Alignment Control Plan ..... 164

9.12 Plan Drawing and Longitudinal Profile Drawing ..... 164

9.13 Plan Drawing ..... 165

9.14 Longitudinal Profile Drawing ..... 165

9.15 Cross Section Plan ..... 165

9.16 Junction Details Plans ..... 166

9.17 Junction Details ..... 166

9.18 Traffic Signal Details ..... 166

9.19 Road Marking Plan ..... 166

9.20 Traffic, Guide, and Temporary Sign Plans ..... 167

9.21 Drainage Plans ..... 167

9.22 Structure Plans ..... 167

9.23 Bridge Structural Plans ..... 167

9.23.1 Soil Profile ..... 168

9.23.2 Piles ..... 168

9.23.3 Abutment and Wing Wall Details ..... 168

9.23.4 Piers ..... 168

9.23.5 Beams/Girders ..... 168

9.23.6 Diaphragms ..... 168

9.23.7 Deck Slabs ..... 168

9.23.8 Handrails/Parapet and Expansion Joints ..... 169

9.23.9 Water Main Brackets and Other Miscellaneous Details ..... 169

9.24 Sequence and Scales for Bridge Structures ..... 169

9.25 Requirement for Dimensions ..... 169

9.26 Relocation of Services Plans ..... 170

| 11.2.12 |          | Location of Intersection.....                                    | 221 |
| 11.2.13 |          | Spacing of Intersections.....                                    | 221 |
| 11.2.14 |          | Channelization.....                                              | 222 |
| 11.2.15 |          | Excessive Channelization.....                                    | 222 |
| 11.3    |          | Design Controls.....                                             | 222 |
|         | 11.3.1   | Priority Control.....                                            | 222 |
|         | 11.3.2   | Traffic.....                                                     | 223 |
|         | 11.3.3   | Design Speed.....                                                | 223 |
|         | 11.3.4   | Design Vehicles.....                                             | 223 |
|         | 11.3.4.1 | “P” Design.....                                                  | 223 |
|         | 11.3.4.2 | “SU” Design.....                                                 | 224 |
|         | 11.3.4.3 | “WB-50” Design.....                                              | 224 |
| 11.3.5  |          | Selection of Intersection Type.....                              | 224 |
|         | 11.3.5.1 | Roundabouts.....                                                 | 225 |
|         | 11.3.5.2 | Signal Controlled Intersections.....                             | 226 |
|         | 11.3.5.3 | Grade-Separated Intersections.....                               | 226 |
|         | 11.3.5.4 | Combination and Coordination<br>in Successive Intersections..... | 226 |
| 11.4    |          | Geometric Standards.....                                         | 227 |
|         | 11.4.1   | General Considerations.....                                      | 227 |
|         | 11.4.2   | Horizontal Alignment.....                                        | 227 |
|         | 11.4.3   | Staggered T-Junctions.....                                       | 227 |
|         | 11.4.4   | Vertical Alignment.....                                          | 227 |
|         | 11.4.5   | Sight Distance.....                                              | 228 |
|         | 11.4.5.1 | General.....                                                     | 228 |
|         | 11.4.5.2 | Sight Triangle.....                                              | 229 |
|         | 11.4.5.3 | Sight Distance for Approach.....                                 | 229 |
|         | 11.4.5.4 | Sight Distance for Departure.....                                | 232 |
|         | 11.4.5.5 | Effect of Skew.....                                              | 234 |
|         | 11.4.5.6 | Effect of Grades.....                                            | 235 |

|           |                                              |     |
|-----------|----------------------------------------------|-----|
| 11.4.6    | Right-Turn Lanes .....                       | 236 |
| 11.4.6.1  | General.....                                 | 236 |
| 11.4.6.2  | Design Considerations .....                  | 236 |
| 11.4.6.3  | Length of Right-Turn Lanes .....             | 237 |
| 11.4.6.4  | Width of Right-Turn Lanes.....               | 238 |
| 11.4.6.5  | Seagull Island.....                          | 238 |
| 11.4.6.6  | Opposed Right-Turns.....                     | 238 |
| 11.4.6.7  | Central Island and Median Design .....       | 239 |
| 11.4.7    | Left-Turn Lanes .....                        | 239 |
| 11.4.7.1  | General.....                                 | 239 |
| 11.4.7.2  | Simple Left-Turns.....                       | 239 |
| 11.4.7.3  | Separate Left-Turn Lanes .....               | 240 |
| 11.4.8    | Pavement Tapers .....                        | 244 |
| 11.4.8.1  | General.....                                 | 244 |
| 11.4.8.2  | Design Principles .....                      | 244 |
| 11.4.8.3  | Taper Length.....                            | 245 |
| 11.4.8.4  | Auxiliary Lanes .....                        | 245 |
| 11.4.8.5  | Width of Auxiliary Lanes.....                | 247 |
| 11.4.9    | Island and Openings .....                    | 247 |
| 11.4.9.1  | General.....                                 | 247 |
| 11.4.9.2  | Traffic Islands .....                        | 247 |
| 11.4.9.3  | Median Islands.....                          | 250 |
| 11.4.9.4  | Median Openings.....                         | 254 |
| 11.4.9.5  | Outer Separators .....                       | 255 |
| 11.4.10   | Widening of Major Road .....                 | 255 |
| 11.4.11   | Minor Road Treatment.....                    | 258 |
| 11.4.11.1 | Types of Treatments.....                     | 258 |
| 11.4.11.2 | Guide Islands .....                          | 258 |
| 11.4.11.3 | Widening of the Minor Road .....             | 261 |
| 11.4.11.4 | Left-Turn Lane on Minor Roads.....           | 262 |
| 11.4.12   | Shoulders .....                              | 262 |
| 11.4.13   | Crossfall and Surface Drainage .....         | 262 |
| 11.5      | Capacity of Intersections.....               | 262 |
| 11.5.1    | General.....                                 | 262 |
| 11.5.2    | Level of Service .....                       | 263 |
| 11.5.3    | Capacity of Unsignalized Intersections ..... | 263 |
| 11.5.3.1  | General.....                                 | 263 |
| 11.5.3.2  | Procedure .....                              | 263 |
| 11.5.3.3  | Potential Improvements .....                 | 271 |
| 11.5.4    | Capacity of Signalized Intersections .....   | 271 |
| 11.5.4.1  | General.....                                 | 271 |
| 11.5.4.2  | Warrants .....                               | 271 |
| 11.5.4.3  | Intersection Capacity Characteristics .....  | 271 |

|          |                                                      |     |
|----------|------------------------------------------------------|-----|
| 11.5.4.4 | Computation Analysis.....                            | 272 |
| 11.5.4.5 | Signal Timings.....                                  | 272 |
| 11.5.5   | Capacity of Roundabouts.....                         | 272 |
| 11.5.5.1 | Size of Roundabout.....                              | 272 |
| 11.5.5.2 | Capacity Calculations.....                           | 273 |
| 11.5.5.3 | Reserve Capacity.....                                | 274 |
| 11.6     | Other Related Elements.....                          | 274 |
| 11.6.1   | Pedestrian Facilities.....                           | 274 |
| 11.6.1.1 | General.....                                         | 274 |
| 11.6.1.2 | Pedestrian Crossing.....                             | 274 |
| 11.6.2   | Lighting.....                                        | 275 |
| 11.6.3   | Public Utilities.....                                | 275 |

| 11.6.5   | Traffic Signs and Lane Markings.....                 | 276 |
| 11.6.6   | Drainage.....                                        | 276 |
| 11.6.7   | Landscaping.....                                     | 276 |
| 11.6.8   | Stop Line.....                                       | 276 |
| 11.6.8.1 | General.....                                         | 276 |
| 11.6.8.2 | Stop Line on Minor Road.....                         | 278 |
| 11.7     | General Warrants for Traffic Control Signals.....    | 279 |
| 11.7.1   | General.....                                         | 279 |
| 11.7.2   | Warrant Analysis.....                                | 279 |
| 11.7.2.1 | Warrant 1: Vehicular Operations.....                 | 280 |
| 11.7.2.2 | Warrant 2: Pedestrian Safety.....                    | 282 |
| 11.8     | Computer-Aided Design of At-Grade Intersections..... | 282 |
|          | Bibliography.....                                    | 283 |

## **Chapter 12** Design of Grade-Separated Interchanges ..... 285

|          |                                                           |     |
|----------|-----------------------------------------------------------|-----|
| 12.1     | General.....                                              | 285 |
| 12.2     | General Principles.....                                   | 285 |
| 12.2.1   | Traffic and Operation.....                                | 285 |
| 12.2.2   | Site Conditions.....                                      | 286 |
| 12.2.3   | Type of Highway and Intersecting Facility.....            | 286 |
| 12.2.4   | Safety.....                                               | 286 |
| 12.2.5   | Stage Development.....                                    | 287 |
| 12.2.6   | Economic Factors.....                                     | 287 |
| 12.2.6.1 | Initial Cost.....                                         | 287 |
| 12.2.6.2 | Maintenance Cost.....                                     | 287 |
| 12.2.6.3 | Vehicular Operating Cost.....                             | 287 |
| 12.3     | Justifications for Grade Separation and Interchanges..... | 288 |
| 12.3.1   | Design Designation.....                                   | 288 |
| 12.3.2   | Elimination of Bottlenecks or Stop Congestion.....        | 288 |
| 12.3.3   | Elimination of Hazards.....                               | 288 |

|          |                                                                |     |
|----------|----------------------------------------------------------------|-----|
| 12.3.4   | Site Topography .....                                          | 289 |
| 12.3.5   | Road-User Benefits .....                                       | 289 |
| 12.3.6   | Traffic Volume Warrant .....                                   | 289 |
| 12.3.7   | Other Justifications .....                                     | 289 |
| 12.3.8   | Justification for Class of Road .....                          | 289 |
| 12.4     | Grade Separation Structures .....                              | 290 |
| 12.4.1   | Types of Separation Structures .....                           | 290 |
| 12.4.1.1 | General .....                                                  | 290 |
| 12.4.1.2 | Overpass .....                                                 | 290 |
| 12.4.1.3 | Underpass .....                                                | 290 |
| 12.4.2   | Overpass Versus Underpass .....                                | 291 |
| 12.4.2.1 | General Design Considerations .....                            | 291 |
| 12.4.3   | Cross Section of Structures .....                              | 292 |
| 12.4.3.1 | Structure Widths .....                                         | 292 |
| 12.4.3.2 | Clearances .....                                               | 292 |
| 12.4.3.3 | Barriers .....                                                 | 292 |
| 12.4.4   | Grade-separation Without Ramps .....                           | 292 |
| 12.5     | Interchange Types .....                                        | 293 |
| 12.5.1   | Three Leg Design .....                                         | 293 |
| 12.5.2   | Four Leg Design .....                                          | 293 |
| 12.5.2.1 | General .....                                                  | 293 |
| 12.5.2.2 | Ramps in one Quadrant .....                                    | 294 |
| 12.5.2.3 | Diamond Interchanges .....                                     | 294 |
| 12.5.2.4 | Cloverleaf .....                                               | 297 |
| 12.5.2.5 | Partial Cloverleaf Ramp Arrangements ....                      | 298 |
| 12.5.3   | Directional and Semi-Directional Design .....                  | 298 |
| 12.5.4   | Rotary Design .....                                            | 300 |
| 12.5.5   | Combination Interchanges .....                                 | 301 |

| 13.7.11 | Development of Initial Stage of a Design<br>Alternative.....                 | 405 |
| 13.7.12 | Determination of Structural Layer Thicknesses<br>for Initial Structure ..... | 405 |
| 13.7.13 | Overlay Design .....                                                         | 407 |
| 13.7.14 | Summary of Design Strategy .....                                             | 410 |
| 13.8    | Computer-Aided Design of Flexible Pavement in AASHTO<br>Method .....         | 411 |
|         | Bibliography .....                                                           | 411 |

## **Chapter 14** Design of Rigid Concrete Pavement..... 413

|        |                                                                |     |
|--------|----------------------------------------------------------------|-----|
| 14.1   | General .....                                                  | 413 |
| 14.2   | Types of Rigid Concrete Pavements .....                        | 413 |
| 14.3   | Materials.....                                                 | 413 |
| 14.3.1 | Coarse Aggregate.....                                          | 413 |
| 14.4   | Design Requirements .....                                      | 414 |
| 14.4.1 | Design Inputs .....                                            | 414 |
| 14.4.2 | Effective Modulus of Subgrade Reaction .....                   | 415 |
| 14.4.3 | Pavement Layer Materials Characterization .....                | 415 |
| 14.4.4 | PCC Modulus of Rupture .....                                   | 416 |
| 14.4.5 | Layer Coefficients.....                                        | 417 |
| 14.5   | Pavement Structural Characteristics.....                       | 417 |
| 14.5.1 | Drainage.....                                                  | 417 |
| 14.5.2 | Load Transfer.....                                             | 419 |
| 14.5.3 | Loss of Support.....                                           | 420 |
| 14.6   | Reinforcement Variables .....                                  | 421 |
| 14.6.1 | Jointed Reinforced Concrete Pavements .....                    | 421 |
| 14.6.2 | Continuously Reinforced Concrete Pavements ....                | 422 |
| 14.7   | Rigid Pavement Design.....                                     | 425 |
| 14.7.1 | Determining the Effective Modulus<br>of Subgrade Reaction..... | 425 |
| 14.7.2 | Determine Required Slab Thickness.....                         | 431 |
| 14.7.3 | Stage Construction.....                                        | 434 |
| 14.7.4 | Roadbed Swelling and Frost Heave.....                          | 435 |
| 14.8   | Rigid Pavement Joint Design .....                              | 437 |
| 14.8.1 | Joint Types .....                                              | 437 |
| 14.8.2 | Joint Geometry.....                                            | 438 |
| 14.9   | Rigid Pavement Reinforcement Design .....                      | 438 |
| 14.9.1 | Jointed Reinforced Concrete Pavements .....                    | 439 |
| 14.9.2 | Continuously Reinforced Concrete Pavements ....                | 439 |
| 14.9.3 | Transverse Reinforcement .....                                 | 449 |

|                                                                              |            |
|------------------------------------------------------------------------------|------------|
| 14.10 Computer-Aided Design of Rigid Concrete Pavement in AASHTO Method..... | 452        |
| Bibliography .....                                                           | 452        |
| <b>Chapter 15 Design of Highway Drainage and Drainage Structures.....</b>    | <b>453</b> |
| 15.1 General .....                                                           | 453        |
| 15.2 Surface Drainage.....                                                   | 453        |
| 15.2.1 Pavement and Shoulder Cross-Slopes .....                              | 453        |
| 15.2.2 Side Slopes and Side Ditches .....                                    | 454        |
| 15.3 Design of Surface Drainage Systems.....                                 | 455        |
| 15.3.1 Hydrological Approaches and Concepts .....                            | 455        |
| 15.3.1.1 Flood Hydrograph .....                                              | 456        |
| 15.3.2 Rainfall Intensity .....                                              | 457        |
| 15.3.3 Surface Runoff.....                                                   | 457        |
| 15.3.4 Time of Concentration.....                                            | 458        |
| 15.3.5 The Rational Method.....                                              | 459        |
| 15.3.6 Estimating Runoff from Large Rural Drainage Basins.....               | 459        |
| 15.4 Design of Side Ditches and Other Open Channels .....                    | 460        |
| 15.4.1 The Manning's Formula .....                                           | 460        |
| 15.4.2 Energy or Head of Flow .....                                          | 462        |
| 15.5 Design of Culverts .....                                                | 465        |
| 15.5.1 Guidelines to Decide Culvert Location .....                           | 465        |
| 15.5.2 Hydraulic Design of Culverts .....                                    | 467        |
| 15.5.2.1 Types of Culvert Flow .....                                         | 467        |
| 15.5.2.2 Culverts Flowing with Inlet Control.....                            | 468        |
| 15.5.2.3 Culverts Flowing with Outlet Control.....                           | 468        |
| 15.6 Drainage of City Streets.....                                           | 473        |
| 15.6.1 Pavement Crowns, Curbs and Gutters .....                              | 473        |
| 15.6.2 Inlets .....                                                          | 474        |
| 15.6.3 Catch Basins .....                                                    | 475        |
| 15.6.4 Manholes .....                                                        | 476        |
| 15.7 Computer-Aided Design of Highway Drainage.....                          | 476        |
| 15.7.1 Computer-Aided Design of Highway Surface Drainage .....               | 476        |
| 15.7.2 Computer-Aided Stream Hydrology and Synthetic Unit Hydrograph.....    | 476        |
| Bibliography .....                                                           | 477        |
| Index .....                                                                  | 479        |
