

## Contents

Preface	VII
Elastic behaviour of textured aggregates of cubic crystals <i>L.J.Walpole</i>	1
Simulation of crystal defects by finite element techniques <i>C.Teodosiu</i>	7
Continuum description of mechanical behaviour for materials with heterogeneous oriented structure <i>A.Litewka</i>	15
On the patterning of microstructures and deformation <i>E.C.Aifantis</i>	21
Fractals <i>D.S.Broomhead</i>	27
The balance equations of continuum mechanics from a corpuscular viewpoint <i>A.I.Murdoch</i>	35
Existence of non-negative entropy production <i>W.Muschik</i>	39
On the continuum mechanics of crystal slip <i>K.S.Havner</i>	47
Coexistent austenitic and martensitic phases in elastic crystals <i>G.P.Parry</i>	61
The stability of plastic flow in crystals <i>M.Boček</i>	67
Crystals as ordered media <i>L.Mistura</i>	77
Some problems associated with some current non-local theories of elasticity <i>C.Atkinson</i>	85
Asymmetric swirling flows and related problems in non-linear elasticity <i>K.R.Rajagopal</i>	89

A virial stochastic solution for a random suspension of spheres <i>K.Z. Markov</i>	97
Hydrostatics of rigid magnetic suspensions <i>R.K.T. Hsieh</i>	107
The maximum entropy principle and the moment truncation procedure <i>Z. Banach</i>	111
Solitons in microstructured elastic media: Physical and mechanical aspects <i>G.A. Maugin &amp; J. Pouget</i>	115
A continuum model for polyelectrolytes in solution <i>A. Morro, R. Drouot &amp; G.A. Maugin</i>	139
Nonlinear diffusion and Schrödinger equation <i>A. Trzesowski &amp; R. Kotowski</i>	145
Jump conditions in magnetodiffusion in solids <i>J. Stefaniak</i>	151
Latent microstructure <i>G. Capriz</i>	159
Graph-theoretical approach to the mechanics of granular materials <i>M. Satake</i>	163
T matrices for elastodynamic scattering by circular discs <i>M.M. Carroll &amp; M.F. McCarthy</i>	175
Incompatibility tensors and compatibility equations in orthogonal curvilinear coordinates <i>Dai Tian-Min</i>	181
Environmentally induced damage in composites <i>Y. Weitsman</i>	187
Possibilities and limits of Nayfeh's equations for heat conduction in laminated composites <i>P. Mazilu</i>	193
Bounds for the effective properties of a nonlinear lossy composite <i>D.R.S. Talbot</i>	199
Dual estimates of overall instantaneous properties of elastic-plastic composites <i>J.L. Teply &amp; G.J. Dvorak</i>	205
Random structure analysis and modelling by mathematical morphology <i>D. Jeulin</i>	217
Direct continuum model of a solid (Abstract) <i>H. Zorski</i>	227
A gauge fields approach to classical and continuum mechanics (Abstract) <i>B. Kunin &amp; I. Kunin</i>	229
Streaming motions in a bed of vibrationally-fluidized dry granular material (Abstract) <i>S.B. Savage</i>	231
List of participants	233
