Preface to the 2nd Edition XVII

Preface to the 1st Edition XIX

List of Contributors XXIII

List of Symbols XXVII

Part One Polymers and Fillers 1

1 Polymers and Polymer Composites 3

Marino Xanthos

- 1.1 Thermoplastics and Thermosets 3
- 1.2 Processing of Thermoplastics and Thermosets 4
- 1.3 Polymer Composites 5
 - 1.3.1 Types and Components of Polymer Composites 6
 - 1.3.2 Parameters Affecting Properties of Composites 8
 - 1.3.3 Effects of Fillers/Reinforcements: Functions 9
 - 1.3.4 Rules of Mixtures for Composites 12
 - 1.3.5 Functional Fillers 12
 - 1.3.5.1 Classification and Types 12
 - 1.3.5.2 Applications, Trends, and Challenges 14
- References 17

2 Modification of Polymer Properties with Functional Fillers 19

Marino Xanthos

- 2.1 Introduction 19
- 2.2 The Importance of the Interface 20
- 2.3 Modification of Mechanical Properties 21
 - 2.3.1 General 21
 - 2.3.2 Modulus of Fiber and Lamellar Composites 22
 - 2.3.2.1 Continuous Reinforcements 22
 - 2.3.2.2 Discontinuous Reinforcements 24
 - 2.3.3 Modulus of Composites Incorporating Particulates 28
 - 2.3.4 Strength of Fiber and Lamellar Composites 29

2.3.4.1	Continuous Reinforcements	29
2.3.4.2	Discontinuous Reinforcements	31
2.3.5	Strength of Composites Containing Particulates	33
2.3.6	Toughness Considerations	33
2.3.7	Temperature and Time Effects	35
2.3.8	Other Properties	35
2.3.8.1	Tribological Properties	35
2.3.8.2	Permeability	36
2.4	Effects of Fillers on Processing Characteristics of Polymers	36
2.4.1	General	36
2.4.2	Melt Rheology of Filled Polymers	36
2.4.2.1	Concentration and Shear Rate	37
2.4.2.2	Filler Size and Shape	37
2.4.2.3	Filler Surface Treatments	38
2.4.3	Processing/Structure/Property Relationships	39
	References	41

3 Mixing of Fillers with Plastics 43

David B. Todd

3.1	Introduction	43
3.2	Pretreatment of Fillers	44
3.3	Feeding	45
3.4	Melting	51
3.5	Solids Introduction and Mixing	51
3.6	Venting	55
3.7	Pressure Generation	55
3.8	Process Examples	57
3.9	Further Information	59
	References	59

Part Two Surface Modifiers and Coupling Agents 61

4 Silane Coupling Agents 63

Björn Borup and Kerstin Weissenbach

4.1	Introduction	63
4.2	Production and Structures of Monomeric Silanes	64
4.3	Silane Chemistry	65
4.4	Types of Silanes	66
4.4.1	Waterborne Silane Systems	66
4.4.2	Oligomeric Silanes	66
4.5	Silane Hydrolysis	67
4.6	Reactivity of Silanes Toward the Filler	69
4.7	Combining Silanes and Mineral Fillers	70
4.7.1	Method I	71
4.7.2	Method II	71

4.7.3	Method III	72
4.7.4	Method IV	72
4.8	Insights into the Silylated Filler Surfaces	72
4.8.1	Spectroscopy	72
4.8.1.1	FTIR/Raman Spectroscopy	72
4.8.1.2	MAS-NMR Spectroscopy	73
4.8.1.3	Auger Electron Spectroscopy	73
4.8.2	Pyrolysis-Gas Chromatography	76
4.8.3	Carbon Analysis	77
4.8.4	Colorimetric Tests	77
4.8.5	Acid-Base Titration	77
4.8.6	Analytical Tests for Hydrophobicity	77
4.8.7	Silane/Colorant Combined Surface Modification	77
4.9	Selection of Silanes	78
4.10	Applications of Specific Silanes	80
4.10.1	Vinylsilanes	80
4.10.2	Aminosilanes	81
4.10.2.1	General	81
4.10.2.2	Calcined Clay-Filled Polyamides	82
4.10.2.3	ATH-Filled EVA	83
4.10.2.4	MDH-Filled Polypropylene	83
4.10.3	Methacryloxysilanes	85
4.10.3.1	General	85
4.10.3.2	Filled PMMA Resin Systems	85
4.10.3.3	Silica-Filled UV-Cured Acrylates for Scratch-Resistant Coatings	85
4.10.4	Epoxyxilanes	86
4.10.5	Sulfur-Containing Silanes	87
4.10.6	Alkylsilanes	87
4.10.7	Fluoroalkylfunctional Silanes	87
4.10.8	Polyetherfunctional Silanes	87
4.11	Trends and Developments	88
	References	88

5 Titanate Coupling Agents 91

Salvatore J. Monte

5.1	Introduction	91
5.2	The Six Functions of the Titanate Molecule	92
5.2.1	Effects of Function (1)	95
5.2.1.1	Coupling	95
5.2.1.2	Dispersion	95
5.2.1.3	Adhesion	97
5.2.1.4	Hydrophobicity	98
5.2.1.5	Titanate Application Considerations	98
5.2.2	Effects of Function (2)	99
5.2.3	Effects of Function (3)	101

5.2.4	Effects of Function (4)	102
5.2.4.1	CaCO ₃ -Filled Thermoplastics	103
5.2.4.2	Carbon Black-Filled Polymers	103
5.2.4.3	Other Functional Inorganics/Organics Used in Thermoplastics and Thermosets	105
5.2.5	Effects of Function (5)	107
5.2.6	Effects of Function (6)	107
5.2.7	Dispersion of Nanofillers or "Making Nanofillers Work"	109
5.3	Summary and Conclusions	111
	References	112
6	Functional Polymers and Other Modifiers	115
	<i>Roger N. Rothon</i>	
6.1	Introduction	115
6.2	General Types of Modifiers and Their Principal Effects	116
6.2.1	Noncoupling Modifiers	116
6.2.2	Coupling Modifiers	116
6.2.3	Reinforcement Promoters	117
6.3	Modifiers by Chemical Type	117
6.3.1	Carboxylic Acids and Related Compounds	117
6.3.1.1	General	117
6.3.1.2	Saturated Monocarboxylic Acids (Fatty Acids) and Their Salts	117
6.3.1.3	Unsaturated Carboxylic Acids and Related Compounds	123
6.3.1.4	Carboxylic Acid Anhydrides	128
6.3.1.5	Bismaleimides	129
6.3.1.6	Chlorinated Paraffins	131
6.3.1.7	Chrome Complexes	131
6.3.1.8	Other Carboxylic Acid Derivatives	131
6.3.2	Alkyl Organophosphates	132
6.3.3	Alkyl Borates	132
6.3.4	Alkyl Sulfonates	132
6.3.5	Functionalized Polymers	132
6.3.5.1	Functionalized Polyolefins	132
6.3.5.2	Functionalized Polybutadienes	136
6.3.6	Organic Amines and Their Derivatives	137
	References	138
Part Three	Fillers and Their Functions	141
A	High Aspect Ratio Fillers	141
7	Glass Fibers	143
	<i>Subir K. Dey and Marino Xanthos</i>	
7.1	Background	143
7.2	Production Methods	144
7.3	Structure and Properties	148

7.4	Suppliers	149
7.5	Cost/Availability	149
7.6	Environmental/Toxicity Considerations	152
7.7	Applications	154
7.8	Environmental Impact	158
	References	161
8	Mica Flakes	163
	<i>Marino Xanthos</i>	
8.1	Background	163
8.2	Production Methods	165
8.3	Structure and Properties	166
8.4	Suppliers	170
8.5	Cost/Availability	170
8.6	Environmental/Toxicity Considerations	171
8.7	Applications	171
8.7.1	General	171
8.7.2	Primary Function	172
8.7.3	Other Functions	173
	References	174
9	Nanoclays and Their Emerging Markets	177
	<i>Karl Kamena</i>	
9.1	Introduction	177
9.1.1	Clays, Nanoclays, and Nanocomposites	177
9.1.2	Concept and Technology	177
9.2	Production Methods	178
9.2.1	Raw and Intermediate Materials	178
9.2.2	Purification and Surface Treatment	179
9.2.3	Synthetic Clays	180
9.3	Structure and Properties	181
9.4	Suppliers	183
9.5	Cost/Availability	183
9.6	Environmental/Toxicity Considerations	184
9.7	Applications	184
	References	187
10	Carbon Nanotubes/Nanofibers and Carbon Fibers	189
	<i>Zafar Iqbal and Amit Goyal</i>	
10.1	Introduction	189
10.2	Materials	189
10.2.1	Types of Carbon Nanotubes/Nanofibers and Their Synthesis	189
10.2.2	Types of Carbon Fibers and Their Synthesis	191
10.2.2.1	PAN-Based Carbon Fibers	192
10.2.2.2	Carbon Fibers from Pitch:	193

10.2.2.3	Carbon Fibers from Rayon	194
10.2.2.4	Carbon Fibers from Phenolic Resins	194
10.2.2.5	Vapor-Grown Carbon Fibers	194
10.2.3	Chemical Modification/Derivatization Methods	195
10.2.4	Polymer Matrices	196
10.3	Polymer Matrix Composites	197
10.3.1	Fabrication	197
10.3.2	Mechanical and Electrical Property Modification	198
10.4	Cost/Availability	202
10.5	Environmental/Toxicity Considerations	202
10.6	Applications	205
	References	206

B Low Aspect Ratio Fillers 211

11 Natural Fibers 213

Craig M. Clemons

11.1	Introduction	213
11.2	Structure and Production Methods	214
11.3	Properties	215
11.3.1	Chemical Components	215
11.3.2	Fiber Dimensions, Density, and Mechanical Performance	216
11.3.3	Moisture and Durability	216
11.4	Suppliers	218
11.5	Cost/Availability	219
11.6	Environmental/Toxicity Considerations	219
11.7	Applications (Primary and Secondary Functions)	219
	References	222

12 Talc 225

Vicki Flaris

12.1	Production Methods	225
12.2	Structure and Properties	226
12.3	Suppliers	230
12.4	Cost/Availability	230
12.5	Environmental/Toxicity Considerations	232
12.6	Applications	233
12.6.1	General	233
12.6.2	Applications by Polymer Matrix	234
12.6.2.1	Polyolefins	234
12.6.2.2	Polyvinyl Chloride	237
12.6.2.3	Styrenics and Thermoplastic Elastomers	237
	References	238

13	Kaolin	241
	<i>Joseph Duca</i>	
13.1	Introduction	241
13.2	Production Methods	243
13.2.1	Primary Processing	243
13.2.2	Beneficiation	243
13.2.3	Kaolin Products	246
13.2.4	Calcination	246
13.2.5	Surface Treatment	247
13.3	Properties	247
13.4	Suppliers	248
13.5	Cost/Availability	250
13.6	Environmental/Toxicity Considerations	251
13.7	Applications	251
13.7.1	Primary Function	251
13.7.2	Secondary Functions	254
13.7.2.1	Improvement of Electrical Properties	254
13.7.2.2	TiO ₂ Extension	256
	References	257
14	Wollastonite	259
	<i>Sara M. Robinson and Marino Xanthos</i>	
14.1	Introduction	259
14.2	Production	260
14.3	Structure and Properties	260
14.4	Suppliers/Cost	262
14.5	Environmental/Toxicity Considerations	263
14.6	Applications Involving the Plastics Compounding Industry	264
14.7	Summary	267
14.8	Future Considerations for Use of Wollastonite in Plastics	267
	References	268
15	Wood Flour	269
	<i>Craig M. Clemons</i>	
15.1	Introduction	269
15.2	Production Methods	270
15.3	Structure and Properties	272
15.3.1	Wood Anatomy	272
15.3.2	Chemical Components	274
15.3.3	Density	276
15.3.4	Moisture	276
15.3.5	Durability	278
15.3.6	Thermal Properties	280

- 15.4 Suppliers 281
- 15.5 Cost/Availability 282
- 15.6 Environmental/Toxicity Considerations 282
- 15.7 Applications (Primary and Secondary Functions) 282
- 15.7.1 Thermosets 282
- 15.7.2 Thermoplastics 283
- References 288

16 Calcium Carbonate 291

Yash P. Khanna and Marino Xanthos

- 16.1 Background 291
- 16.2 Production Methods 292
- 16.3 Structure and Properties 294
- 16.4 Suppliers 294
- 16.5 Cost/Availability 295
- 16.6 Environmental, Toxicity, and Sustainability Considerations 295
- 16.7 Applications 296
- 16.7.1 General 296
- 16.7.2 Polyvinyl Chloride 296
- 16.7.3 Glass Fiber-Reinforced Thermosets 298
- 16.7.4 Polyolefin Moldings 298
- 16.7.5 Polyolefin Films 301
- 16.7.6 Polyolefin Microporous Films 302
- 16.7.7 Nonwoven Fabrics 303
- 16.7.8 Bioactive Composites 305
- References 305

C Specialty Fillers 307

17 Fire Retardants 309

Henry C. Ashton

- 17.1 Introduction 309
- 17.2 Combustion of Polymers and the Combustion Cycle 310
- 17.3 Fuel 311
- 17.4 Smoke 311
- 17.4.1 Toxicity 312
- 17.4.2 Visibility 314
- 17.5 Flammability of Polymers 314
- 17.6 Mechanisms of Fire-Retardant Action 315
- 17.6.1 Condensed Phase 315
- 17.6.2 Chemical Effects in the Gas Phase 316
- 17.7 Classification of Flame Retardants 317
- 17.7.1 Metal Hydroxides 317
- 17.7.1.1 Aluminum Trihydrate 318
- 17.7.1.2 Magnesium Hydroxide 324

17.7.1.3	Zinc Stannates	325
17.7.2	Halogenated Fire Retardants	325
17.7.2.1	Mechanism of Action	325
17.7.2.2	Synergy with Antimony Trioxide	326
17.7.2.3	Bromine-Containing Fire Retardants	326
17.7.2.4	Chlorine-Containing Flame Retardants	327
17.7.3	Zinc/Boron Systems	329
17.7.4	Melamines	329
17.7.5	Phosphorus-Containing Flame Retardants	329
17.7.5.1	Mechanism of Action	330
17.7.5.2	Red Phosphorus	331
17.7.5.3	Phosphorus-Containing Organic Compounds	331
17.7.5.4	Ammonium Polyphosphate	331
17.7.6	Low Melting Temperature Glasses	334
17.7.7	Molybdenum-Containing Systems	335
17.7.8	Nanosized Fire Retardants	335
17.8	Tools and Testing	336
17.9	Toxicity	337
17.9.1	Metal Hydroxides	338
17.9.2	Antimony Trioxide	338
17.9.3	Brominated Fire Retardants	338
17.9.4	Chlorinated Fire Retardants	339
17.9.5	Boron-Containing Fire Retardants	340
17.9.6	Phosphorus-Containing Fire Retardants	340
17.9.7	Molybdenum-Containing Fire Retardants	341
17.9.8	Nanosized FRs	341
17.10	Manufacturers of Fire Retardants	343
17.11	Concluding Remarks	343
	References	344

18 Conductive and Magnetic Fillers 351

Theodore Davidson

18.1	Introduction	351
18.2	Carbon Black	352
18.2.1	General	352
18.2.2	Varieties	352
18.2.3	Commercial Sources	353
18.2.4	Safety and Toxicity	355
18.2.5	Surface Chemistry and Physics	355
18.3	Phenomena of Conductivity in Carbon Black-Filled Polymers	355
18.3.1	General	355
18.3.2	Percolation Theories	357
18.3.3	Effects of Carbon Black Type	357
18.3.4	Effects of Polymer Matrix	358
18.3.5	Other Applications	359

18.4	Distribution and Dispersion of Carbon Black in Polymers	360
18.4.1	Microscopy and Morphology	360
18.4.2	Percolation Networks	360
18.4.3	CB in Multiphase Blends	361
18.4.4	Process Effects on Dispersion	361
18.5	Other Carbon-Based Conductive Fillers	362
18.6	Intrinsically Conductive Polymers (ICPs)	362
18.7	Metal Particle Composites	363
18.8	Magnetic Fillers	366
18.9	Concluding Remarks	367
18.10	Appendix: Measurements of Resistivity	367
	References	368

19 Surface Property Modifiers 373

Subhash H. Patel

19.1	Introduction	373
19.2	Solid Lubricants/Tribological Additives	374
19.2.1	General	374
19.2.1.1	Molybdenite	374
19.2.1.2	Graphite	375
19.2.1.3	Polytetrafluoroethylene	375
19.2.1.4	Boron Nitride	375
19.2.2	Production	376
19.2.2.1	Molybdenite	376
19.2.2.2	Graphite	376
19.2.2.3	Polytetrafluoroethylene	377
19.2.2.4	Boron Nitride	377
19.2.3	Structure/Properties	378
19.2.3.1	Molybdenite	378
19.2.3.2	Graphite	379
19.2.3.3	Polytetrafluoroethylene	383
19.2.3.4	Boron Nitride	384
19.2.4	Suppliers/Manufacturers	386
19.2.5	Cost/Availability	386
19.2.6	Environmental/Toxicity Considerations	388
19.2.6.1	Molybdenite	388
19.2.6.2	Graphite	391
19.2.6.3	Polytetrafluoroethylene	392
19.2.6.4	Boron Nitride	392
19.2.7	Applications	392
19.3	Antiblocking Fillers	394
19.3.1	General	394
19.3.2	Silica as Antiblocking Filler	395
19.3.2.1	Production	395

- 19.3.2.2 Structure/Properties 397
- 19.3.2.3 Suppliers/Manufacturers 397
- 19.3.2.4 Environmental/Toxicity Considerations 397
- 19.3.2.5 Applications of Silicas 401
- References 402

20 Processing Aids 407

Subhash H. Patel

- 20.1 Introduction 407
- 20.2 Production 408
 - 20.2.1 Magnesium Oxide 408
 - 20.2.2 Fumed Silica 409
 - 20.2.3 Hydrotalcites 409
- 20.3 Structure/Properties 411
 - 20.3.1 Magnesium Oxide 411
 - 20.3.2 Fumed Silica 412
 - 20.3.3 Hydrotalcites 412
- 20.4 Suppliers/Manufacturers 414
- 20.5 Environmental/Toxicological Considerations 415
 - 20.5.1 Magnesium Oxide 415
 - 20.5.2 Fumed Silica 416
 - 20.5.3 Hydrotalcites 416
- 20.6 Applications 416
 - 20.6.1 Magnesium Oxide 416
 - 20.6.2 Fumed Silica 419
 - 20.6.3 Hydrotalcites 420
- References 421

21 Spherical Fillers 425

Anna Kron and Marino Xanthos

- 21.1 Organic Spherical Fillers 425
 - 21.1.1 General 425
 - 21.1.2 Production and Properties 425
 - 21.1.3 General Functions 427
 - 21.1.4 Applications in Thermoplastics 429
 - 21.1.5 Applications in Thermosets and Rubbers 432
 - 21.1.6 Applications in Coatings 433
 - 21.1.7 Surface Functionalization 433
 - 21.1.8 Cost 434
 - 21.1.9 Suppliers 434
- 21.2 Glass and Ceramic Spheres 434
 - 21.2.1 Introduction 434
 - 21.2.2 Production and Properties 435
 - 21.2.3 Functions 436
 - 21.2.4 Suppliers 438
- References 438

22	Bioactive Fillers	441
	<i>Georgia Chouzouri and Marino Xanthos</i>	
22.1	Introduction	441
22.2	Bone as a Biocomposite	441
22.3	Synthetic Biomedical Composites and Their Bioactivity	442
22.3.1	Bioceramics for Tissue Engineering Applications	442
22.3.2	Mechanisms and Procedure for <i>In Vitro</i> Evaluation of Bioactivity	443
22.4	Bioceramics as Functional Fillers	444
22.4.1	Hydroxyapatite	444
22.4.2	Calcium Phosphate Ceramics	448
22.4.3	Calcium Carbonate	448
22.4.4	Bioactive Glasses	449
22.4.5	Apatite–Wollastonite Glass Ceramic	451
22.4.6	Other Bioactive Fillers	452
22.5	Modification of Bioceramic Fillers	453
22.6	Fillers Formed <i>In Situ</i>	453
22.7	Recent Developments – Nanostructured Bioactive Fillers	454
22.8	Concluding Remarks	455
	References	455
