

Mechanistic Studies of Rearrangements and Exchange Reactions by Dynamic NMR Spectroscopy

Alois Steigel

Institut für Organische Chemie der Universität Düsseldorf, D-4000 Düsseldorf

Contents

1.	Introduction	2
2.	General Comments on Band Shape Analyses	3
2.1.	Experimental Requirements	3
2.2.	Mathematical Procedure	4
3.	Formulation of the Exchange Problem	6
4.	Classical Multi-Site Exchange Analysis	9
5.	Use of Prochiral CX ₂ Y Groups as Mechanistic Probes	14
6.	Permutational Approach to Polytopal Rearrangements	19
7.	Split Modes of Rearrangement	25
8.	Site Exchange in First-Order Spin Systems	29
8.1.	Sites Determined by Spin-Spin Couplings	29
8.2.	Sites Determined by Spin-Spin Couplings and Chemical Shifts	32
9.	Site Exchange in Non-First-Order Spin Systems	35
9.1.	Mutual Exchange in a Two-Spin System	35
9.2.	Mechanistic Studies of Non-First-Order Spin Systems	40
10.	Intermolecular Exchange Reactions	48
11.	References	51
