

CONTENTS

Preface to English Edition	v
Foreword to Russian Edition	vii
Introduction— <i>A. S. Kuz'minskii</i>	xiii
Chapter 1: The Thermo-oxidative Degradation of Isotactic Polypropylene—<i>V. S. Pudov and M. B. Neiman</i>	1
Kinetics and Mechanism of Hydroperoxide Decomposition in Polypropylene	2
Chapter 2: Concerning the Mechanism of Antioxidant Action—<i>Yu. A. Shlyapnikov and V. B. Miller</i>	34
Fundamental Stages in Inhibited Oxidation	34
Mechanism of Action of Strong Antioxidants	36
Weak Antioxidants	38
Synergism	43
Influence of the Conversion Products of Antioxidants	44
Effect of Carbon Black	45
Structure of Antioxidant and Polyolefin	46
Chapter 3: Mechanochemical Processes in Polymers—<i>A. S. Kuz'minskii</i>	48
Effects of Intensive Mechanical Stresses (Milling)	50
Development of Chemical Reactions during Polymer Fatigue	59
Development of Chemical Processes during the Abrasion (Wear) of Rubber	61

Development of Chemical Processes in Cross-linked Polymers under Static Load	62
Development of Chemical Processes during the Mechanical Destruction of Polymers (Mechanical Rupture)	76
 Chapter 4: The Ageing and Stabilisation of Heterochain Polyesters—	
<i>S. R. Rafikov, V. V. Rode and I. V. Zhuravleva</i>	85
Thermal Ageing of Polyesters	86
Thermo-oxidative Ageing of Polyesters	96
Stabilisation of Polyesters against Thermal and Thermo-oxidative Ageing	99
Ageing of Polyesters in UV Light	102
Stabilisation of Polyesters against UV Light	112
Radiation-Chemical Transformations of Polyesters	116
 Chapter 5: The Stabilisation of Synthetic Rubbers—<i>K. B. Piotrovskii</i>	
Basic Requirements of Stabilisers for Synthetic Rubbers	136
Methods of Evaluating the Stability of Synthetic Rubbers and the Effectiveness of Stabilisers	141
Stabilisation of the Principal Types of Synthetic Rubbers	143
 Chapter 6: The Inhibition of Thermo-oxidative Processes by means of Compounds Containing Conjugated Double Bond Systems—	
<i>A. A. Berlin and S. I. Bass</i>	162
Some Characteristic Properties of Compounds Containing Conjugated Double Bond Systems	162
The Inhibition of Thermo-oxidative Reactions by some Compounds Containing Systems of Conjugation	170
Synergism in the Inhibition of Oxidative Processes by Compounds Containing Conjugated Systems	188
Stabilisation of some Polymers by Compounds with Conjugated Systems	192
 Chapter 7: Phosphor-organic Stabilisers for Polymers—	
<i>P. A. Kirpichnikov and N. A. Mukmeneva</i>	210
Normal Esters of Phosphorous Acid	211

Mixed Esters of Phosphorous Acid	216
Polyphosphites	224
Reactivity of Phosphorous Acid Esters and the Mechanism of their Inhibiting Activity	228
Chapter 8: The Use of Nuclear Magnetic Resonance in the Study of the Ageing and Stabilisation of Polymers—I. Ya. Slonim	244
Investigation of Changes in Structure and Molecular Motion when Polymers Age	246
Investigation of the Low Molecular Products of Polymer Degradation	256
Study of the Relationship between Structure and Efficiency of Stabilisers	259
General References and Abstracts	263
Glossary I	273
Glossary II	275
Index	277
