

CONTENTS

<i>Preface</i>	vii
<i>Chapter 1</i>	
ABSORPTION AND EMISSION OF LIGHT	1
1.1 Introduction	1
1.2 Principles of Absorption and Emission of Light	1
1.3 Absorption and Emission Properties of Man-made Polymers	10
1.4 Activation Spectra of Polymers	26
<i>Chapter 2</i>	
PHOTODEGRADATION AND PHOTOOXIDATION	
PROCESSES	31
2.1 Introduction	31
2.2 Homochain Polymers	32
2.3 Heterochain Polymers	126
<i>Chapter 3</i>	
PHOTODEGRADABLE PLASTICS	182
3.1 Introduction	182
3.2 Photosensitive Plastics	182
3.3 Photoactive Additives	185
<i>Chapter 4</i>	
PHOTOSENSITISED PROCESSES INVOLVING DYES	
AND PIGMENTS	199
4.1 Introduction	199
4.2 Coloration by Dyes	199
4.3 Coloration by Pigments	205
<i>Chapter 5</i>	
PHOTOSTABILISATION PROCESSES	216
5.1 Introduction	216

5.2 Mechanisms of Photostabilisation	217
5.3 Synergism and Antagonism	247
5.4 Factors Controlling Choice of Stabiliser	250
<i>Chapter 6</i>	
WEATHERING OF PLASTICS	256
6.1 Introduction	256
6.2 Natural Weathering of Plastics	256
6.3 Accelerated Test Sources	261
6.4 Assessment of Weathering	267
6.5 Measurement of Light Intensities	267
<i>Chapter 7</i>	
APPLICATIONS AND MEASUREMENT OF POLYMER LUMINESCENCE	276
7.1 Introduction	276
7.2 Applications of Polymer Luminescence	276
7.3 Measurement of Polymer Luminescence	281
<i>Appendices</i>	
I Luminescence Characteristics of Various Commercial Plastics and Synthetic Fibres	285
II Commercial Antioxidants	288
III Commercial Photostabilisers	293
IV Weather-testing Equipment	298
<i>Index</i>	301
