

Contents

Chapter 1. GENERAL CONCEPTS

1.1.	History of "Coupling Agents"	1
1.2.	Definitions	4
1.3.	Evaluation	5
1.4.	Nonsilane Coupling Agents	14
1.5.	Theories of Bonding Through Coupling Agents.....	16
	References	27

Chapter 2. CHEMISTRY OF SILANE COUPLING AGENTS

2.1.	Introduction	29
2.2.	Formation of the Si-C Bond	30
2.3.	Reactions of Hydrolyzable Groups on Silicon	31
2.4.	Organofunctional Groups on Silicon	33
	References	45

Chapter 3. AQUEOUS SOLUTIONS OF SILANE COUPLING AGENTS

3.1.	Introduction	49
3.2.	Alkoxysilanes with Neutral Organofunctional Groups	49
3.3.	Cationic-Organofunctional Silanes	58
3.4.	Anionic-Organofunctional Silanes	65
3.5.	Zwitterion-Organofunctional Silanes	65
3.6.	Stabilization of Aqueous Silicate Solutions	66
	References	72

Chapter 4. SURFACE CHEMISTRY OF SILANES AT THE INTERFACE

4.1.	Introduction	75
4.2.	Instrumental Techniques	76
4.3.	Identifying Silanes at the Interface	78
4.4.	Thickness of Silane Layers	82
4.5.	Orientation of Layers	90
4.6.	Chemical Reactions at the Interface	97
	References	108

Chapter 5. NATURE OF ADHESION THROUGH SILANE COUPLING AGENTS

5.1.	Problems in Organic-Inorganic Composites	111
5.2.	Silanol Bonds with Mineral Surfaces	116
5.3.	Silane Bonds with Polymers	128
5.4.	Other Effects at the Interface	136
	References	138

Chapter 6. PERFORMANCE OF SILANE COUPLING AGENTS

6.1.	General	141
6.2.	Unsaturated Polyesters	142
6.3.	Epoxy Resins	146
6.4.	Phenolic Resins	153
6.5.	High-Temperature Resins	154
6.6.	Specific Primers	157
	References	164

Chapter 7. PARTICULATE-FILLED COMPOSITES

7.1.	The Total Picture	167
7.2.	Fracture	169
7.3.	Effects of Filler Surfaces on Polymer Properties	178
7.4.	Rheology	182
7.5.	Coupling and Adhesion	188
7.6.	Methods of Applying Silanes	200
	References	204

Chapter 8. OTHER APPLICATIONS OF SILANE COUPLING *AGENTS

8.1.	General	207
8.2.	Alkyl-Silylated Surfaces	208
8.3.	Charge Transfer Chromatography	212
8.4.	Bound Chelate-Functional Silanes	214
8.5.	Antimicrobials	224
8.6.	Polypeptide Synthesis and Analysis	224
8.7.	Immobilized Enzymes	225
8.8.	Coated Metal Oxide Electrodes	230
8.9.	Liquid Crystals	231
	References	231

Index	233
