

## Contents

Preface . . . . .	v
<i>Chapter</i>	
1. An Introduction to Basic Statistical Methods . . . . .	1
2. Probability and its Use in Developing the Binomial and Poisson Distributions . . . . .	13
3. The Normal Distribution . . . . .	27
4. Statistical Quality Control . . . . .	41
5. Correlation and Regression Analysis . . . . .	55
6. The Statistics of Extreme Values—Forecasting Floods, Droughts, etc. . . . .	68
7. Forecasting Techniques . . . . .	77
8. Significance Testing . . . . .	89
9. The Elements of Reliability and the Production of Reliability Curves . . . . .	104
10. Design of Experiments (1) Determination of Sample Sizes . . . . .	115

11. Design of Experiments (2) Analysis of Variance for Interaction Between Properties . . . . .	128
Statistical Tables . . . . .	141
Index . . . . .	147
