

TABLE OF CONTENTS

EDITORIAL INTRODUCTION	xi
PREFACE	xiii
CHAPTER I	
<i>Introduction and Background</i>	
A. General and Historical	1
B. Inorganic Chemistry of Palladium	2
1. Pd(0)	2
2. Pd(I)	5
3. Pd(II)	6
a. Stable Compounds	6
b. Equilibrium in Solution	11
(i) Aqueous Solution	11
(ii) Acetic Acid	13
(iii) Acetonitrile	14
(iv) Methanol and other Solvents	15
4. Pd(IV)	16
C. Organometallic Chemistry of Palladium	16
1. Alkyls, Vinyls and Aryls	16
2. Compounds of Palladium with Unsaturated Carbon Contain- ing Ligands	17
a. General	17
b. Pd(0)	20
c. Pd(I)	21
d. Pd(II)	21
(i) Olefin π -Complexes	21
(ii) π -Acetylene Complexes	25
(iii) π -Allyl Complexes	25
(iv) Cyclobutadiene and other C_4 Systems	28
(v) Cyclopentadienyl Complexes	29
D. The Two Basic Reactions of Catalysis and Examples of Each in Stable Palladium Organometallic Chemistry	29
1. General	29
2. The Oxidative Addition Reaction	30
3. The Insertion Reaction	36

CHAPTER II

Oxidation of Monoolefins

A. General	41
B. Formation of Aldehydes and Ketones	41
1. Reaction Schemes	41
2. Mechanism	52
a. Effect of Ionic Strength	58
b. Deuterium Labeling Experiments	58
c. Kinetic Isotope Effects	58
d. Ionic Strength Effects	68
e. Exchange Studies	68
f. Oxidation by Pd(II) Complexed to Di- and Triamines	69
C. Production of Esters	84
1. Introduction	84
2. Oxidation in the Absence of Added Oxidants	85
3. Oxidation in the Presence of other Oxidants	92
4. Mechanism	103
a. Unsaturated Ester Formation	104
b. Saturated Ester Formation	127
D. Production of Ethers and Acetals in Alcohols	133
1. Reaction Schemes	133
2. Mechanism	140
E. Formation of Carbon—Carbon Bonds	147
1. Introduction	147
2. Olefin Arylation Reaction	147
a. Reaction Schemes	147
b. Mechanism	161
3. Aliphatic and Olefinic Carbon—Carbon Bond Formation	178
a. Addition of Pd(II)—Carbon Bonds across Olefinic Substrates	178
b. Olefin Coupling Reaction	184
c. Nonoxidative Dimerization	191
4. Carbonylation Reaction with CO	193
F. Formation of Carbon—Nitrogen Bonds	212
G. Formation of Carbon—Halogen Bonds	220
H. Formation of Carbon—Sulfur Bonds	222
I. Formation of Carbon—Silicon Bonds	222
J. Reaction of Monoolefins with $(\text{Ph}_3\text{P})_2\text{PdO}_2$	222
K. Formation of Nitrates	223

CHAPTER III

Reaction of Dienes and Polyenes

A. Nonconjugated Dienes	224
1. Stable Adducts	224
2. Catalytic Reactions	234
B. Conjugated Diolefins	243
1. 1,3-Diene Reactions	243
a. Oxidation without Oligomerization	243
b. Addition with Telomerization	246
c. Cocyclization Reactions with Heteropolar Double Bonds	247
d. Dimerization and Polymerization of 1,3-Dienes without Addition of Nucleophile	249
e. Mechanisms of 1,3-Diene Reactions	252
2. Reactions of 1,2-Dienes	262

CHAPTER IV

 π -Allyl Complexes

A. General	268
B. Formation and Structure	268
C. Reactions of π -Allyl Complexes	275
1. Aqueous Solutions	275
2. Acetic Acid Solvent	277
3. Formation of Carbon—Carbon Bonds	279
4. Other Decomposition Reactions	282

CHAPTER V

Reactions of Acetylenes

A. General	284
B. Oxidative Reactions	284
C. Nonoxidative Reactions	290

CHAPTER VI

Reactions of Aromatic Compounds

A. Stable Palladium(II) Aryls	306
B. Formation of Carbon—Oxygen Bonds: Aromatic Acetoxylation	310
C. Formation of Carbon—Carbon Bonds	312
1. Aromatic Coupling	312
2. Carbonylation Reactions	322
3. Miscellaneous Aromatic Carbon—Carbon Formation Reac- tions	326

D. Formation of other Aromatic Bonds	328
E. Mechanism of Aromatic Substitution Reactions	330

CHAPTER VII

Miscellaneous Reactions

A. Benzylic Oxidation	339
B. Oxidative Dehydrogenation	342
C. Reactions of Carbonyl-Containing Compounds	348
1. Aldehydes and Ketones	348
2. Quinone	351
3. Carboxylic Acids and Acid Chlorides	352
D. Reaction of C—O Bonds	353
1. Alcohols	353
2. Oxazines	354
3. Hydroperoxides	354
4. Lactones	354
5. CO ₂	355
E. Nitrogen-Containing Functional Groups	355
1. Amines	355
2. Nitro Compounds	358
3. Reaction of Groups Containing —C=N—	361
4. Reactions of —C≡N Groups	363
5. Miscellaneous N-Containing Groups	367
F. Oxidation of Cyclopropanes	368
G. Miscellaneous CO Reactions	369
H. S and Si Containing Reactants	371

BIBLIOGRAPHY	372
