

TABLE OF CONTENTS

PREFACE	v
LIST OF CONTRIBUTORS	vii
Chapter 1 : On the Selection of Methods for Crystal Growth. The Methods H.C. GATOS	1
Chapter 2 : Phase Equilibria W.B. WHITE	17
Chapter 3 : Role of Materials Properties in Selecting the Best Method R. ROY	67
Chapter 4 : Current Growth Techniques D.T.J. HURLE	91
Chapter 5 : Nucleation and Atomic Kinetics K.A. JACKSON	139
Chapter 6 : Dynamics of Crystal Growth J.R. CARRUTHERS	157
Chapter 7 : Czochralski Growth of Large Oxide Crystals C.D. BRANDLE	189
Chapter 8 : LPE of III/V Semiconductors G.B. STRINGFELLOW	217
Chapter 9 : The Growth of Magnetic Garnets by Liquid Phase Epitaxy S.L. BLANK	241
Chapter 10: Modern Ion Beam and Related Techniques for Materials Characterization R.J. BLATTNER and C.A. EVANS, JR.	269
Chapter 11: X-Ray Topographic Techniques for Electronic Materials Characterization G.A. ROZGONYI and D.C. MILLER	307
Chapter 12: Materials Design for Semiconductor Devices C.J. NUESE	353
AUTHOR INDEX	401
SUBJECT INDEX	403
