

## CONTENTS

Editorial Note	VII
Introduction	1
CHAPTER I: SOLVENTS AND SOLUTES 9	
I.1. The Different Types of Solvent	9
I.2. Solvation of Substances within a Molecular Solvent	22
I.3. Ionic Associations ('Ion-pairs') in Molecular Solvents of Low Dielectric Constant	30
I.4. State of Substances Dissolved in an Ionized Solvent (Molten Salt)	42
I.5. Presentation of Reactions in Solution	54
CHAPTER II: ACIDITY AND PROTOLYSIS PHENOMENA 59	
II.1. Acidity in a Molecular Solvent of High Dielectric Constant	67
II.2. Acidity of Acceptors of the Anion Given up by an Amphiprotic Solvent	98
II.3. Protopolyisis in Molecular Solvents of Low Dielectric Constant	107

II.4. Protolysis in Ionized Solvents (Molten Salts)	120
 CHAPTER III: OTHER ION EXCHANGE SYSTEMS WITH PARTICIPATION OF SOLVENT	
	130
III.1. General Concepts of Acidity (Non-Prot tonic) in Aprotic Solvents	130
III.2. Examples of Solvoacidity in Aprotic Solvents	139
 CHAPTER IV: OXIDATION-REDUCTION PHENOMENA	
	157
IV.1. Solvent Intervention in Oxidation-Reduction Phenomena	165
IV.2. Influence of Acidity on Oxidation-Reduction Phenomena	173
 CHAPTER V: CORRELATION BETWEEN PROPERTIES IN DIFFERENT SOLVENTS	
	199
V.1. Thermodynamic Aspect of Solvation	199
V.2. Correlation Between Acid-Base Properties in Different Solvents	249
V.3. Correlation Between Other Properties	270
Bibliography	277
