

CONTENTS

List of Contributors	7
Preface	9

1. Plenary Lectures

→ Some aspects of modern polymer science and technology—M. GOODMAN and H. F. MARK	11
Some macromolecular horizons—M. L. HUGGINS	27
→ Some problems of emulsion polymerization—S. S. MEDVEDEV	39
New polymer syntheses—G. SMETS	65

2. Main Lectures

Kinetics and mechanism of the formation of polyurethanes—S. G. ENTELIS	89
Synthesis of new aromatic polyesters—Z. JEDLIŃSKI	113
— Syntheses and optical properties of asymmetric polyamides—C. G. OVERBERGER, G. MONTAUDO, Y. NISHIMURA, J. ŠEBENDA and R. A. VENESKI	127
Design of continuous and batch addition polymerization processes—N. PLATZER	155
Some optically active polyesters and polyamides—ROLF C. SCHULZ	185
The mechanism of the polymerization of cyclic formals—P. H. PLESCH	213
States and reactions of the carbanion in the anionic polymerization of styrene—G. V. SCHULZ, L. L. BÖHM, M. CHMELÍŘ, G. LÖHR and B. J. SCHMITT	223
Mechanism and kinetics of anionic polymerization of episulphides—P. SIGWALT	251
The role of the complexing acts in the anionic polymerization processes—B. ERUS-SALIMSKY	281
Constants of elementary steps and mechanism of olefin polymerization in the presence of Ziegler—Natta catalysts—N. M. CHIRKOV	297
Ionic-coordination polymerization of dienes—B. A. DOLGOPLOSK and E. I. TINYAKOVA	321
Alternating copolymers from complexed polar monomers—N. G. GAYLORD	343

End-group determination and number of active centers in heterogeneous ionic coordination polymerization—H. SCHNECKO and W. KERN	365
Polymerization and copolymerization of polar vinyl monomers by modified Ziegler-Natta catalysts—J. ULBRICHT	387
→ Radical polymerization in solution—G. M. BURNETT	403
○ → The structure and reactivity of polymer radicals—A. D. JENKINS	417
→ Effect of formation of complexes on radical polymerization processes—V. A. KABANOV	435
→ Some recent studies on radical polymerization—U. S. NANDI	463
→ Block polymers through radical polymerization—A. V. TOBOLSKY	481
→ Some problems of radical polymerization kinetics—F. TÜDÖS	485
→ Active species and initiation mechanism of radiation-induced ionic polymerization—K. HAYASHI	507
Popcorn polymers and proliferous polymerization—J. W. BREITENBACH	529
Adsorption polymerization—H. K. LIVINGSTON	545
→ Some problems of the kinetics of solid state radiation polymerization—I. M. BARKALOV	555
→ Solid state polymerization in two-component systems—GY. HARDY	571
⊗ → Some problems of radiation chemical grafting of polymers—A. CHAPIRO	593
⊗ → Influence of block and graft copolymers on the properties of polyblends—G. RIESS	607
⊗ → Grafting and crosslinking of macromolecules—KH. U. USMANOV	627
⊗ → Reactivity of macromolecules and problems of chemical modifications related to the polymeric state—N. A. PLATÉ	651
New methods of chemical modification of cellulose—Z. A. ROGOVIN	677
→ Stabilization and modification of polymers by polyconjugated systems—A. A. BERLIN	689
The thermal degradation of copolymers—N. GRASSIE	725
Polymer-gas (air pollutants) reactions—H. H. G. JELLINEK	747
Problems of oxidation and stabilization of polymers—A. S. KUZMINSKY	765
Elucidation of structure—effectiveness relations of phenolic antioxidants in polypropylene—J. POSPIŠIL	789
