I.	What Is Chemical Reactor Analysis?	1
1.1.	<i>Introductory perspective, 1. 1.2. A note on problems and prerequisites, 4. References, 5.</i>	
2.	Stoichiometry	7
2.1.	<i>What it is and why we need it, 7. 2.2. Entire reactions and reaction mechanisms, 8. 2.3. Independence of reactions, 10. 2.4. Measurement of quantity and its change due to reaction, 14. 2.5. Measures of concentration, 19. 2.6. Concentration changes with a single reaction, 20. 2.7. Concentration changes with several reactions, 22. 2.8. Invariants of a system of reactions, 24. 2.9. Rate of reaction, 25. Additional problems, 28. References, 29. Nomenclature, 30.</i>	
3.	Thermodynamics	33
3.1.	<i>Introduction, 33. 3.2. Heat of formation, 33. 3.3. Heat of reaction, 35. 3.4. Variation of the heat of reaction, 39. 3.5. Rate of generation of heat by reaction, 40. 3.6. Chemical equilibrium, 41. 3.7. The calculation of homogeneous equilibrium compositions, 44. 3.8. Equilibrium of simultaneous and heterogeneous reactions, 51. 3.9. Entropy production, 53. References, 54. Nomenclature, 55.</i>	
4.	Reaction Rates	57
4.1.	<i>What is needed and what can be obtained, 57. 4.2. Homogeneous reaction rates, 58. 4.3. Variation of reaction rate with extent and temperature, 62. 4.4. A portrait of the second order reversible reaction, 67. 4.5. Reaction</i>	

rates near equilibrium, 71. 4.6. Reaction mechanisms, 73. 4.7. Heterogeneous reaction rate expressions, 74. 4.8. Reaction rates in other concentration measures, 76. 4.9. Classification of reactions by their rate expressions, 77. References, 79. Nomenclature, 80.	
<b>5. The Progress of the Reaction in Time</b>	<b>82</b>
5.1. Introduction, 82. 5.2. The first order reaction, 85. 5.3. The general irreversible reaction, 89. 5.4. The general homogeneous reaction, 90. 5.5. Concurrent reactions of low order, 94. 5.6. Consecutive first order reactions, 97. 5.7. Systems of first order reactions, 102. 5.8. Polymerization reactions, 106. 5.9. Numerical methods, 109. References, 113. Nomenclature, 114.	
<b>6. The Interaction of Chemical and Physical Rate Processes</b>	<b>115</b>
6.1. Pseudo-homogeneous reaction rate expressions, 116. 6.2. The concept of a rate determining step, 118. 6.3. External mass transfer, 123. 6.4. Diffusion within the catalyst particle, 126. 6.5. The combination of different rate processes, 135. 6.6. The effect of temperature variations, 137. References, 140. Nomenclature, 142.	
<b>7. The Continuous Flow Stirred Tank Reactor</b>	<b>145</b>
7.1. The basic mass balances, 145. 7.2. The energy balance, 152. 7.3. The design of a single reactor, 154. 7.4. Some considerations in detailed design, 166. 7.5. The stability of the steady state, 173. 7.6. Control of the steady state, 184. 7.7. Sequences of stirred reactors, 191. 7.8. Optimal sequences of stirred reactors, 196. 7.9. The nature of mixing in the reactor, 203. 7.10. Reactions in two phases, 212. References, 216. Nomenclature, 218.	
<b>8. Adiabatic Reactors</b>	<b>221</b>
8.1. General principles, 221. 8.2. Adiabatic stirred tank reactors, 223. 8.3. General design of adiabatic tubular or batch reactors, 230. 8.4. Analytical results for irreversible reactions, 234. 8.5. Optimal adiabatic bed reactors with interchanger cooling, 236. 8.6. Optimal adiabatic bed reactors with cold shot cooling, 247. 8.7. The combination of different types of adiabatic reactor, 252. 8.8. Stability and control, 253. References, 255. Nomenclature, 256.	
<b>9. The Tubular Reactor</b>	<b>259</b>
9.1. Types of tubular reactor, 259. 9.2. The mass balance, 262. 9.3. The momentum balance, 264. 9.4. The energy balance, 265. 9.5. Design principles,	

266. 9.6. <i>Optimal design</i> , 270. 9.7. <i>Tubular reactors cooled from the wall</i> , 276. 9.8. <i>Sensitivity, autothermicity and stability</i> , 286. 9.9. <i>The effects of flow profile</i> , 294. 9.10. <i>Axial dispersion in tubular reactors</i> , 297. <i>References</i> , 304. <i>Nomenclature</i> , 310.	
10. The Batch Reactor	314
10.1. <i>The equations for batch reaction</i> , 314. 10.2. <i>Intermittent operation</i> , 316. 10.3. <i>Optimal control</i> , 319. <i>References</i> , 323. <i>Nomenclature</i> , 323.	
Appendix. Problems Using the Digital Computer	325
