Preface

xi

1 *Introduction to Engineering Calculations*

1

- 1.1 Units and dimensions 3
- 1.2 The mole unit 13
- 1.3 Conventions in methods of analysis and measurement 15
- 1.4 Temperature 23
- 1.5 Pressure 28
- 1.6 Physical and chemical properties of compounds and mixtures 37
- 1.7 Technique of solving problems 40
- 1.8 The chemical equation and stoichiometry 42
- 1.9 Digital computers in solving problems 50

2 *Material Balances*

71

- 2.1 Material balance 73
- 2.2 Program of analysis of material balance problems 81
- 2.3 Problems with direct solutions 86
- 2.4 Material balances using algebraic techniques 95
- 2.5 Problems involving tie components (elements) 102
- 2.6 Recycle, bypass, and purge calculations 114

3 Gases, Vapors, Liquids, and Solids 146

- 3.1 Ideal gas laws 148
- 3.2 Real gas relationships 162
- 3.3 Vapor pressure 191
- 3.4 Saturation 199
- 3.5 Partial saturation and humidity 206
- 3.6 Material balances involving condensation and vaporization 211
- 3.7 Phase phenomena 217

4 Energy Balances 253

- 4.1 Concepts and units 255
- 4.2 Heat capacity 264
- 4.3 Calculation of enthalpy changes without change of phase 272
- 4.4 Enthalpy changes for phase transitions 282
- 4.5 The general energy balance 288
- 4.6 Reversible processes and the mechanical energy balance 303
- 4.7 Heat of reaction 308
- 4.8 Heats of solution and mixing 331

5 Combined Material and Energy Balances 362

- 5.1 Simultaneous use of material and energy balances for the steady state 363
- 5.2 Enthalpy-concentration charts 374
- 5.3 Humidity charts and their use 392
- 5.4 Complex problems 404

6 Unsteady-State Material and Energy Balances 444**Appendices 469**

- A. Conversion factors 469
- B. Atomic weights and numbers 471
- C. Steam tables 472
- D. Physical properties of various organic and inorganic substances 482
- E. Heat capacity information 493

F. Heats of formation and combustion	499
G. Vapor pressures	505
H. Heats of solution and dilution	506
I. Enthalpy-concentration data	508
J. Thermodynamic charts	514
K. Physical properties of petroleum fractions	517
L. Solution of sets of equations	523
M. Answers to selected problems	528

<i>Nomenclature</i>	531
