<i>Preface</i>	<i>v</i>
<i>Contributors to This Volume</i>	<i>vii</i>

1. Introduction	1
ERIC JUNGERMANN	

I.

ORGANIC CHEMISTRY OF CATIONIC SURFACTANTS

2. Straight-Chain Alkylammonium Compounds	9
W. M. LINFIELD	

I. Introduction	10
II. Nomenclature of Alkylamines	11
III. Preparation of Primary Amines	20
IV. Preparation of Secondary Amines	22
V. Preparation of Tertiary Amines	23
VI. Synthesis of Bridged Amines	25
VII. Preparation of Quaternary Ammonium Compounds	28
VIII. Preparation of Amphoteric Surfactants	31
IX. Physical Properties of Fatty Amines, Amine Salts, and Quaternary Ammonium Compounds	32
X. Reactions of Fatty Amines and Quaternary Ammonium Compounds	43

XI. Applications of Amines, Amine Salts, and Quaternary Ammonium Compounds	48
XII. Conclusion	64
References	65
3. Cyclical Alkylammonium Compounds	71
ALLEN J. WYSOCKI AND DAVID TABER	
I. Introduction	72
A. Scope	72
B. Uses of Surface-Active Heterocyclic Ammonium Compounds	73
C. General Synthetic Methods	73
D. Organization of the Chapter	75
II. Unsaturated Heterocyclic Compounds	75
A. Pyridinium Derivatives	75
B. Quinolinium Derivatives	105
C. Isoquinolinium Derivatives	111
D. Phthalzinium Derivatives	112
E. Benzimidazolium Derivatives	112
F. Benzothiazolium Derivatives	113
G. Benzotriazolium Derivatives	113
H. Pyrrolidinium Derivatives	114
I. Imidazolinium Derivatives	115
III. Saturated Rings	116
A. Piperidinium Derivatives	116
B. Morpholinium Derivatives	125
C. Thiamorpholinium Derivatives	135
D. Piperazinium Derivatives	138
E. 1,3-Benzoxazinium Derivatives	140
F. 1,3,5-Trialkylhexahydro-1,3,5-triazinium Derivatives	141
G. <i>N</i> -Hexahydroazepinium Derivatives	141
References	142
4. Petroleum Derived Cationics	147
H. E. TIEFENTHAL, E. J. MILLER, JR., AND P. L. DU BROW	
I. Introduction	148
II. Synthesis of Amines and Derivatives from Olefins	149
III. Synthesis of Amines and Derivatives from Paraffins	155
IV. Synthesis of Amines and Derivatives from Aromatic Hydrocarbons	157
V. Analysis of Petroleum-Derived Cationic Surfactants	159
VI. Physical Properties, Toxicity, and Applications	163
References	173

5. Polymeric Cationic Surfactants 179

KERMIT LONGLEY

I. Introduction	179
II. Polycations	180
III. Applications	186
IV. Summary	187
References	188

6. Miscellaneous Non-Nitrogen-Containing Cationic Surfactants 191

W. M. LINFIELD AND B. E. EDWARDS

I. Introduction	191
II. General Synthesis	192
III. Sulfoxonium and Sulfonium Compounds	193
IV. Phosphonium Compounds	197
V. Iodonium Compounds	197
VI. Summary	198
References	199

II.

PHYSICAL CHEMISTRY OF CATIONIC SURFACTANTS**7. Micelle Formation of Cationic Surfactants in Aqueous Media 203**

E. W. ANACKER

I. Introduction	203
II. The Energetics of Micellization	207
A. Phase Separation Approach	208
B. Mass Action Approach	210
C. Standard Free Energy of Micellization	215
D. Enthalpy and Entropy Effects	221
III. Size and Shape	224
A. Light Scattering	225
B. Ultracentrifugation	240
C. Diffusion	247

D. Viscosity	253
E. Flow Birefringence	262
F. X-Ray Diffraction	266
G. Dye Solubilization	269
IV. Charge	272
A. Charge from Colligative Properties	273
B. Charge from the Law of Mass Action	274
C. Charge from Electromotive Force	275
D. Charge from Electrophoretic Mobility and Conductivity	276
References	281
 8. Micelle Formation of Cationic Surfactants in Nonaqueous Media	 289
AYAO KITAHARA	
I. Introduction	289
II. Micelle Formation	290
III. Micelle Formation and Solubilization	304
References	309
 9. Absorption of Cationic Surfactants by Cellulosic Substrates	 311
HOWARD J. WHITE, JR.	
I. Introduction	311
II. Experimental Results	312
III. Discussion	329
References	339
 10. Adsorption of Cationic Surfactants on Mineral Substrates	 341
MARTIN E. GINN	
I. Introduction	341
II. Nature of Mineral Substrates	343
III. Adsorption Isotherms	348
IV. Contact Angle	352
V. Electrokinetic Data	356
References	366

11. Adsorption of Cationic Surfactants on Miscellaneous Solid Substrates 369

MARTIN E. GINN

I. Introduction	369
II. Carbon and Hydrocarbon	370
III. Polymers, Fibers, and Textiles	372
IV. Biological Substrates	377
References	385

12. Coacervation in Cationic Surfactant Solutions 387

ANTHONY E. VASSILIADES

I. Introduction	387
II. Description and Classification of Coacervation	388
III. Coacervates of Cationic Surfactants	392
IV. Conclusions	413
References	415

III.

ANALYTICAL CHEMISTRY OF CATIONIC SURFACTANTS**13. A Critical Review of Techniques for the Identification and Determination of Cationic Surfactants 419**

J. T. CROSS

I. Qualitative Analysis	420
A. Isolation of Cationic Surfactants	420
B. Characterization of Cationic Surfactants	422
C. Length of the Alkyl Chain(s)	430
D. Treatment of Mixtures	439
II. Quantitative Analysis	440
A. Absorptiometric Methods	440
B. Volumetric Methods	452
C. Gravimetric Methods	476
D. Miscellaneous Methods	480
III. Cations Other Than Quaternary and Nonquaternary Ammonium	481
References	483

IV.

BIOLOGY OF CATIONIC SURFACTANTS

14. Germicidal Properties of Cationic Surfactants 491

CARL A. LAWRENCE

I. Introduction	492
II. History	493
III. Mode of Antimicrobial Action	493
IV. Test Methods	495
V. Effects of Germicidal Activity	496
VI. Practical Applications—Surgical	510
VII. Practical Applications—Miscellaneous	519
VIII. Summary and Conclusions	521
References	521

15. Toxicology of Cationic Surfactants 527

R. A. CUTLER AND H. P. DROBECK

I. Introduction	527
II. Toxicology of Surfactant Quaternary Ammonium Compounds	528
III. Toxicology of Amines	546
IV. Miscellaneous Activities of Cationic Surfactants Relating to	
Toxicity	558
Appendixes	561
References	613
