

# Contents

<b>Introduction</b> .....	13
IAHR Technical Committee on Ice Research and Engineering Leadership Team .....	15
<b>Keynotes</b> .....	17
Shen Hung Tao	
Progress on river ice research.....	19
Ji Shunying, Liu Lu	
Numerical simulation of ice loads on ship hull based on DEM .....	20
Leppäranta Matti	
Lake ice melting, deterioration and break-up.....	21
Majewski Wojciech	
Engineering and research problems connected with ice phenomena in Gdansk Water Node .....	23
Haas Christian	
Recent advances and challenges in hydro-environmental sea ice research .....	25
Oterkus Selda	
Peridynamic modelling of ice-structure interactions .....	26
Kundzewicz Zbigniew W.	
Climate change and its impacts – a perspective from Poland.....	27
<b>Abstracts</b> .....	29
Pan Jiajia, Guo Xinlei, Fu Hui	
Characterization of wintertime ice distribution in Central Route of South-to-North Water Diversion Project in China from 2011 to 2022 .....	31
Pan Jiajia, Guo Xinlei, Wang Tao	
Numerical modeling of wintertime heat loss in Central Route of South-to-North Water Diversion Project in China.....	32
Barrette Paul D., Khan Ali	
A glimpse at 20 different process-based river ice hydraulics models.....	33
Lindenschmidt Karl-Erich, Ghoreishi Mohammad, Barrette Paul D., Khan Ali	
Freeze-up ice-jam flood hazard assessment and mapping.....	34
El Gharamti Iman, Ahmad Waqas, Puolakka Otto, Tuhkuri Jukka	
Fracture of warm columnar freshwater ice: thickness effect.....	35
El Gharamti Iman, Heinonen Jaakko	
Parametric study of ice loads on conical structures using the Croasdale Model.....	36
Saal Stephanie, Turcotte Benoit, Dubnick Ashley	
A logic-driven assessment to refine SAR-based river ice classifications.....	37
Huang Fengbin, Shen Hung Tao, Goebel Howard, Garver John I.	
A Numerical Model Study on Breakup Ice Jam Flooding in the Lower Mohawk River .....	38
Shen Hung Tao, Huang Fengbin	
Forecasting River Ice Breakup and Ice Jam Flooding .....	39
Yan Lingxiao, Zhou Li, Ding Shifeng, Han Sen, Zeng Dinghan	
Research on ship path planning in ice area based on improved particle swarm optimization.....	40
Liu Ke, Liu Chao, Zhou Li, Ding Shifeng, Li Fang	
Numerical Simulation of Ice-Propeller Milling Process with Cohesive Element Method.....	41
Kolerski Tomasz	
Mathematical modeling of ice dynamics in the area of the planned Siarzewo reservoir.....	42
Pliss Alexandra, Fredensborg Hansen Renée Mie, Høyland Knut Vilhelm, Katlein Christian, Veggeland Oskar Gjesdal, Panichi Nabil	
Geometry, morphology and physical properties of sea ice ridges as measured during the GoNorth Expedition 2023.....	43

Jiang Zongyu, Suominen Mikko, Kujala Pentti, Hirdaris Spyros	
A new material for modelling ice in glancing impact test at room temperature .....	44
Liu Tongshuai, Li Zhijun, Wang Qingkai	
Optical properties of shallow lake ice and their impact on primary productivity: a case study of Lake Hanzhang, China .....	45
Yuan Guangyu, Ni Baoyu, Wang Xin, Xue Yanzhuo	
Experimental study on the effect of submergence environment on ice breaking by high-speed water jet.....	46
Wang Shuang	
Sheltering of adjacent ice ridges on the ice–water drag force: implications from laboratory experiments and numerical simulation .....	47
Staroszczyk Ryszard	
On maximum interaction forces between a cylindrical structure and a floating ice sheet heated by solar radiation.....	48
Li Chao	
Ice process numerical simulation and sensitivity analysis in Toudaoguai reach of the Yellow River.....	49
Herrmannsdörfer Lia	
Influence of the choice in atmospheric, ocean and sea ice forcing dataset to the simulation of iceberg drift and deterioration in the Barents Sea .....	50
Heinonen Jaakko	
Numerical modelling of drifting level ice-interaction with an offshore wind turbine .....	51
Fooladimahani Faezeh, Clark Shawn P.	
Investigating boom performance: an experimental study of load dynamics and freeboard influence in highly energetic flows.....	52
Blaskey Dylan, Harlan Merritt, Musselman Keith	
Assessing backscatter from synthetic aperture radar for regional river ice phenology and thickness data.....	53
Kim Hui-Chan, Park Sun-Ho, Ha Seung-Hyun, Jeong Seong-Yeob	
Image processing methods for ice concentration during Chukchi and Beaufort Sea trials .....	54
Iwicki Stefan	
Icebreaking action on the border and lower section of the Odra River.....	55
Gomez Munoz Sergio Alejandro, Lindenschmidt Karl-Erich, Lynch Michael, Nicholson Keenan, Antle Renée	
Correlating Ice Jam Formation with Ice Cover cracks Using SAR Sentinel-1 Imagery for the lower Churchill River (Labrador) .....	56
Kazemian Delaram, Alfredsen Knut	
Modelling ice using the River 1D Ice Model .....	57
Perälä Ilkka, Tikanmäki Maria, El Gharamti Iman	
Ice impact loads on blades of cycloidal propellers .....	58
Blackburn Julia, Kashyap Shalini, She Yuntong, Zhang Wenming	
Enhancing River1D for simulating water quality in ice-affected rivers .....	59
Huang Wenfeng, Zhao Wen, Li Ming, Tolstikov Alexey	
Experimental study on freezing exclusion of inorganic nutrients at the lake ice–water interface.....	60
Suominen Mikko, Puolakka Otto	
A new friction coefficient correction for ship model scale testing in brash ice channel .....	61
Hammer Tim C., Hendrikse Hayo	
Exploring limiting mechanisms for ice-induced vibrations of offshore wind turbines in ice tank data .....	62
Yoshikawa Yasuhiro, Yokoyama Hiroshi, Hirata Tomomichi, Abe Takaaki	
Development of practical river ice break-up period estimation method based on ice sheet thickness calculation formula.....	63
Li Chunjiang, Zhang Baosen, Deng Yu, Li Zhijun	
Study on the influence of sand-dust on the reflectance of the Yellow River ice surface.....	64
Sjölander Andreas, Nordström Erik, Hellgren Rikard, Ansell Anders	
Installation of large scale load panels and measurement of ice load on Swedish dams.....	65
Han Jiale	
A numerical simulation method for the elastic anisotropy of single crystal ice based on peridynamics.....	66

Kim Ekaterina, Cohrs Jan-Christopher, Berkels Benjamin	
Sea-ice states: unsupervised segmentation from multispectral data based on Mumford–Shah functional.....	67
Charbonneau Laurence, Ghobrial Tados	
The effect of tributaries on the risk of ice-jam flooding in urban areas near confluences.....	68
Frederking Robert	
Trends in ice cover thickness in the Canadian Arctic.....	69
Budner Paulina	
Management of winter flood protection in Poland.....	70
Sawamura Junji, Kioka Shinji, Mizushima Hiroto	
Measurement of ice impact force and structural response of flat plate.....	71
Feshalami Behzad Forouzi, Lubbad Raed, Løset Sveinung, Lu Wenjun	
Numerical modeling of iceberg deterioration under forced convection by wind, current and waves.....	72
Petry Alice, Suominen Mikko, Polojärvi Arttu, Puolakka Otto	
Bending failure length of beams in model ice.....	73
van der Stap Florian L.	
A preliminary assessment of frozen-in offshore wind turbines.....	74
Jiaru Zhou	
Improved arctic sea ice surface feature automatic extraction algorithm for ship-based oblique images.....	75
Oksala Sid, Puolakka Otto, Izadi Mohammad, Tuhkuri Jukka	
Production and validation of large-scale laboratory grown saline ice.....	76
Sun Jiangqiao, Huang Yan, Wang Jinyuan, Jiang Hanfeng	
Resistance components of a double-acting ship under stern-first icebreaking: experimental methodology and preliminary results.....	77
Salimi Amirhossein, Ghobrial Tados, Bonakdari Hossein	
Effect of validation and data partitioning on AI modeling of Ice Jam Flood occurrence: A case study on the Chaudière River.....	78
Hornnes Vegard, Hendrikse Hayo, Høyland Knut V.	
Ice load amplification during ice stopping events at the Norströmsgrund lighthouse.....	79
Esfahani Rouzbeh Hoghooghi, Clark Shawn P, Wall Alexander J.	
Comparison between UAV LiDAR and photogrammetry methods for ice jam data processing on Dauphin River, Manitoba.....	80
McFarlane Vincent, Kau Johnson	
Field study of the water surface and riverbed heat exchanges during freeze-up on the Pembina River.....	81
Jasek Martin, Huang Fengbin, Shen Hung Tao	
Enhancement of one-dimensional river ice model to improve forecasting of the start of Peace River ice control flow.....	82
Wang Tao, Guo Xinlei, Pan Jiajia, Fu Hui	
Ice process simulation on hydraulic characteristics in the Yellow River.....	83
Fredensborg Hansen Renée Mie, Høyland Knut Vilhelm, Duncan Kyle, Farrell Sinead, Rinne Eero, Forsberg René, Skourup Henriette	
Sea ice pressure ridge statistics of the Barents Sea and Fram Strait from ICESat-2 laser altimetry observations during 2018–2022.....	84
Uto Shotaro, Otsuka Natsuhiko	
Validation of powering method of ships in ice using Satellite AIS information.....	85
Gong Hanyang, Matala Riikka, Rupasingha Arachhige Malith	
A review of numerical methods of ship resistance in FSICR brash ice channel.....	86
O'Sadnick Megan, Petrich Chris	
Ice Conditions in Holandsfjorden and Nordfjorden, Norway from 1976–1993.....	87
Fu Hui, Su Xia, Gao Sen, Wang Tao, Li Jiazhen	
Ground penetrating radar for measurement of ice regime.....	88
Muchow Marek, Polojärvi Arttu	
Three-dimensional simulations of sea-ice ridging using discrete element methods.....	89

Marchenko Aleksey, Marchenko Nataliya	
Laboratory experiment on iceberg melting in sea water .....	90
Marchenko Aleksey	
Influence of long-term loading on stress relaxation time of fresh and sea ice .....	91
Watanabe Kento, Huang Fengbin	
Ice-jam experiment with real ice under changed air temperatures and discharge conditions.....	92
Pińczyski Krzysztof, Staroszczyk Ryszard, Cuban Zuzanna	
Trends in multi-year evolution of sea ice occurrence in the southern Baltic Sea .....	93
Akita Tomohiro, Yoshikawa Yasuhiro, Inoue Kazuya, Matukawa Yuuichi, Kikuchi Masahiko, Haga Seiiti, Kai Tatuya	
Field survey and calculation model on transportation and deposition of jewelry ice on Otsu coast, Hokkaido .....	94
Ahmad Waqas, El Gharamti Iman, Puolakka Otto, Izadi Mohammad, Bossuyt Sven, Tuhkuri Jukka	
A quantitative method of measuring fracture process zone size in ice using Digital Image Correlation .....	95
Osiński Robert, Masłowski Wiesław	
An assessment of the landfast ice parameterization using the Regional Arctic System Model .....	96
Boyd Sean, Ghobrial Tadros, Loewen Mark	
Forecasting the formation and release of ice blockages of water intakes in rivers using energy budget analysis .....	97
Marchenko Nataliya, Marchenko Aleksey	
Shapes of melting icebergs in laboratory experiments .....	98
Marchenko Nataliya	
Accidents inherent shipping in ice. Collection development – new cases and approaches.....	99
O'Sadnick Megan, Petrich Chris	
Distribution of snow ice and slush on Norwegian fjord ice and implications for oil spill response.....	100
Hirata Tomomichi, Yoshikawa Yasuhiro, Abe Takaaki, Yoshikawa Yasuhiro	
Field survey on the ice jam that occurred in March 2023 and estimation of ice break-up period .....	101
Petrich Chris, Amtsen Bård	
Two years of static ice load reductions at Sirkelvatn overflow dam .....	102
Fu Xiang, Li Zhijun, Li Chunjiang, Chen Shuchao, Zhang Han, Huo Puzhen	
Analysis of ice heat flux variation in Qinghai Lake.....	103
Fisser Henrik	
Iceberg drift trajectories in the Barents Sea, from remote sensing .....	104
de Goede Erik, Laan Stendert, Jagers Bert	
Modelling of ice growth on regional scales, with application to estuaries, lakes and rivers.....	105
Zhang Yuan, Lu Wenjun, Lubbad Raed, Løset Sveinung, Tsarau Andrei	
A peridynamic approach to simulate sea ice fracture with a focus on its temporal behaviour.....	106
Wilson Samantha, Dow Karen, Malenchak Jarrod, Peters Brittany	
Field monitoring of anchor ice formation and release events at Clark Lake in Northern Manitoba, Canada.....	107
Watt Sean, Michael Hulley	
Adapting the RIVICE model to frazil ice formation in a small watershed in eastern Ontario .....	108
Prasanna Malith, Vuollekoski Henri, Polojärvi Arttu, Haapala Jari, Lensu Mikko, Åström Jan	
Multi scale modelling of interaction between pack ice and offshore structures .....	109
Osmond Noah	
Scale-model testing of an air bubbler lubrication system in brash ice.....	110
Granlund Victor, Schümann Björn, Hoek Jeffrey	
Accuracy in sequential ice load simulations: addressing linearisation of offshore wind turbine dynamics .....	111
Gagnon Robert, Quinton Bruce, Andrade Sthéfano Lande	
Large double-pendulum ice impact tests – phase II .....	112

Gagnon Robert, Bugden Austin, Mackay John	
A relatively thin prototype of NRC's pressure-sensing technology .....	113
Chen Ziwan, Di Shaocheng, Ni Baoyu, Zhang Xintian	
Research on the interaction characteristics of plate and crushed ice using a Non-Smooth Discrete Element Method .....	114
Rafat Arash, Pour Homa Kheyrollah, Spence Christopher, Palmer Michael J.	
In-situ thermodynamics of lake ice decay .....	115
Zaré Soheil	
Turbulent dynamics in ice-covered rivers: insights from continuous acoustic profiling in the Nelson River, Canada .....	116
Cuban Zuzanna, Piłczyński Krzysztof, Staroszczyk Ryszard	
Analysis of the ice phenomena in the Vistula Lagoon in connection with the planned deepening of the Elbląg Canal .....	117
Rabatel Matthias, Kerkeni Sofien	
Ice-ice and ice-structure friction in SIBIS: a phenomenological study .....	118
Zaré Soheil	
Analysis of freeze-up ice jam dynamics in the Nechako River: A case study of the 2021 events.....	119
Masłowski Wiesław, Lee Younjoo, Craig Anthony, Seefeldt Mark, Osinski Robert, Casano John, Clement Kinney Jaclyn, Nijssen Bat	
Improving Arctic Sea ice prediction from sub-seasonal to decadal time scales.....	120
Li Jiazhen, Guo Xinlei, Wang Tao, Fu Hui	
A rough method estimating natural runoff: theory, method and application .....	121
Benin Wendkudni Jude, Ghobrial Tadros	
Characterization of ice retention during breakup upstream of an ice control structure .....	122
Petrich Chris, Sæther Irina, O'Sadnick Megan	
Date of ice formation in Norwegian reservoirs .....	123
Wang Jia	
Modeling two-way ice-wave interactions in the Great Lakes using FVCOM_ice+wave model .....	124
Guo Xinlei	
Ice jam flood risk management – a review and some recent works.....	125
Zhao Shuixia	
Progress on ice, sediment and their interactions in the Inner Mongolia reaches of the Yellow River .....	126
Swirad Zuzanna M., Johansson A. Malin, Malnes Eirik	
Seasonal and inter-annual trends in the sea ice cover in Hornsund, Svalbard .....	127
Wang Qingkai, Xu Zhenghong, Li Zhijun, Tan Bing	
Observation on the pore structure of fresh ice using the CT analysis.....	128
Yang Jiaqi, She Yuntong, Loewen Mark	
Laboratory investigation of anchor ice growth under various thermal conditions.....	129
Nakasato Daiki, Sawaki Eiji, Tsuchiya Tomohiro, Takeuchi Takahiro, Kioka Shinji	
Preliminary results on sea ice pile-up height at the front of structure due to tsunami in ice-infested sea .....	130
Kioka Shinji	
Characteristics of abrasive wear on metal material caused by friction of sea ice with interposed sand particles under various conditions .....	131
Lu Peng, Yu Miao, Cheng Bin, Vihma Timo, Li Xuwei, Wang Qingkai, Li Zhijun	
Study on the mechanism and effect in changes of microstructure of Arctic sea ice during climate warming: A project overview .....	132
Gribanov Igor, Taylor Rocky, Fuglem Mark, Derradji-Aouat Ahmed	
Modelling of ice crushing with Material Point Method.....	133
Herman Agnieszka, Bradtke Katarzyna	
Interactions between sea ice and waves in coastal polynyas.....	134
Chen Yuzhuang, Guo Xinlei, Wang Tao, Fu Hui, Guo Yongxin, Li Jiazhen, Pan Jiajia	
Satellite-based estimates of river ice volume for the Inner Mongolia Reach of the Yellow River, China .....	135

Sandeman Alyssa, Connon Ryan, Coles Anna, Kokelj Shawne, Nafziger Jennifer	
The 2022 spring breakup and extreme flooding event on the Hay River, Canada.....	136
Chen Hailiang, Wang Feifei	
Estimation of the suspended sediment concentration in ice-covered channels based on the gravitational theory.....	137
Radan Parisa, Paprota Maciej, Artichowicz Wojciech, Kolerski Tomasz	
Experimental study on ice drift under the wind effect.....	138
Tikanmäki Maria	
Trends in ice conditions in the Bothnian Bay: case study with channel markers.....	139
Owen Cody C., Oksala Sid, Polojärvi Arttu	
Impact of thin section welding on microstructure of saline ice .....	140
Li Xuewei	
Reducing the spring barrier in predicting summer Arctic sea ice concentration by considering ice motion in a linear Markov model.....	141
Ojamaa Marko, Shahrood Abolfazl Jalali, Haghighi Ali Torabi	
The impact of alterations in the operation of the River Kyrönjoki embankment floodgates on water levels in spring break-up.....	142
Shahrood Abolfazl Jalali, Haghighi Ali Torabi	
River ice real-time monitoring system implementation on River Kiiminkijoki.....	143
Shahrood Abolfazl Jalali, Ahrari Amirhossein, Haghighi Ali Torabi	
Utilizing RiTiCE for analyzing river ice break-up patterns in River Kiiminkijoki and River Kemijoki.....	144
Chimedza Mordecai, Browne Thomas, Taylor Rocky	
Towards an augmented reality decision-support tool for ship navigation in ice using ship performance data and ML-classified ice environments .....	145
Pawłowski Bogusław	
February 2021 ice jams in the upper stretch of the Włocławek Reservoir (Poland) .....	146
Fang Heyu, Zhou Linyu, She Yuntong, Loewen Mark, Turcotte Benoit	
Overflow and aufeis processes in a small-steep-regulated river .....	148
Liu Dongang	
Simulation of waves in the Antarctic Ross Sea based on observational data.....	149
Abe Takaaki, Yoshikawa Yasuhiro, Ogushi Hiroya	
Experimental and numerical investigation on horizontal ice drift process induced by tsunami run-up in rivers .....	150
Cheng Sukun	
A numerical study on wave propagation under ice floes using a fluid–solid interaction approach: solids4foam .....	151
Yin Haoyang, Qu Yan, Zheng Renjie	
Study on dynamic analysis process of offshore wind power in ice area .....	152
Yin Haoyang, Zheng Renjie, Qu Yan	
Fatigue analysis of ice-induced vibration in fixed offshore wind turbines.....	153
Zhai Biyao	
River ice dynamic simulation based on discrete element method and its evaluation .....	154
Lensu Mikko	
Northern Baltic ice extremes determined from upward looking sonar data.....	155
Suominen Mikko, Kõrgesaar Mihkel, Taylor Rocky, Bergström Martin	
Impact of speed limitation on probability of operational ice damage for polar class vessels.....	156
Wang Xiang, Ji Shunying	
Discrete element simulation of the resistance of a ship in consolidated ridges .....	157
Barrette Paul D., Swanson Heidi, Smith Rosie	
Influence of river ice on fish habitats and survival strategies: an overview .....	158
Fuglem Mark, Stuckey Paul	
Suggested change of exposure parameter in ISO 19906 local pressure model for iceberg impacts .....	159

Murdza Andrii, Schulson Erland M., Renshaw Carl É.	
Impacts of thermal cracking on flexural strength in freshwater and sea ice: assessing effects in unloaded and cyclic loading conditions .....	160
Li Liang	
Research on the dynamic response of ice zone oil storage tank platform structure under seismic action .....	161
Ladouceur Jean-Robert, Ghobrial Tados	
A sensitivity analysis on the hydrometeorological and ice parameters used for estimating ice forces: A case study of the Sartigan ice control structure.....	162
He Shuaikang	
Identification of ice load patch of ice-going vessels based on the improved influence coefficient matrix method .....	163
Sun Kai, Gu Sainan, Ji Shunying	
Risk assessment method of structural failure for polar ship under ice loads .....	164
Wu Jie, Liu Lu, Ji Shunying	
Powering performance analysis of ships in ice area based on coupled DEM-SPH method .....	165
Baoyu Ni	
Numerical simulation on a breakable large-scale ice floe induced by wave-current .....	166
Perälä Ilkka, Mikkola Eeva, Lensu Mikko, Tikanmäki Maria, Heinonem Jaakko	
Test set-up for measurements of ice loads and ice conditions at a sea channel marker in the Bothnian Bay.....	167
Li Jiabao, Wang Qing, Zhang Yiheng, Jing Chongyang, Yang Xuesong	
Characterization of elastic anisotropy of single ice grain based on peridynamics .....	168
Badarch Ayurzana	
Characteristics of ice fractures and phenology of Lake Khuvsgul.....	169
Cheng Bin	
Impact of sea ice drift speed on thermodynamic snow and ice mass balance along an idealized transpolar drift trajectory: a modelling investigation.....	170
Li Mengmeng	
Inter-comparisons of snow depth products over the Arctic Ocean.....	171
Jing Chongyang, Wang Qing, Xue Yanzhuo, Li Jiabao	
Numerical simulation of ultrasonic deicing based on peridynamics .....	172
Behnen Jonas, Demir Ozgur, von Boch und Polach R.U. Franz, Klein Marco, Gedikli Ersegun Deniz	
Viscoelastic modeling of wave-ice interactions using LS-Dyna.....	173
Hendrikse Hayo	
Ice engineering challenges for offshore wind development in the Baltic Sea.....	174
Soland Amund, Teigen Sigurd H.	
Derivation of sea ice conditions for offshore wind development in the Baltic Sea.....	175
Zhou Zhanyu	
Study on the interaction between waves and single ice floes based on OpenFOAM.....	176
Xiu Yuanren, Wang Yinghui, Tian Yukui, Zu Yongheng, Wang Qingkai, Li Zhijun	
A preliminary study on the spatiotemporal variations of navigability in the summer Arctic waters .....	177
Zu Yongheng, Tian Yukui, Gang Xuhao, Xiu Yuanren, Zhao Qiaosheng	
Experimental investigation on the influence of consolidated layer thickness on the strength of ridged model ice .....	178
Zhao Weihang	
Numerical simulation of the microstructure of model ice in CSSRC ice basin .....	179
Gang Xuhao	
Testing on the model ice in CSSRC with symmetric and antisymmetric four-point loadings .....	180
Pei Chuankang, She Yuntong, Loewen Mark	
Laboratory study of the correlation between frazil ice particle and floe properties .....	181
Tian Yukui, Liu Lu, Li Dianzhe, Wang Yinghui, Ji Shunying	
Numerical study on anisotropy of columnar polycrystalline sea ice based on discrete element method.....	182

Zhijun Wei, Jiahui Tian, Ji Shunying  
Numerical simulation of ice pile-up characteristics in front of the water intake of a nuclear power plant ..... 183  
**Index of authors** ..... 185
