

TABLE OF CONTENTS

FOREWORD	ix
PARTICIPANTS	xiii
I. STEREOREGULAR POLYMERS SYNTHESIS AND POLYMERIZATION MECHANISM	
1. Stereoregular Polymers: Stereochemical Aspects and Synthetic Approaches. P. PINO and G. P. LORENZI	1
2. Recent Developments in Stereoregulation by Ziegler-Natta Polymerization of α -Olefins. F. CIARDELLI and A. ZAMBELLI	73
3. Kinetic Considerations and Active Centre Determinations in Ziegler-Natta Polymerization. P. J. T. TAIT	85
4. New Supported Catalysts for Stereoregular Polymerization of α -Olefins. J. C. W. CHIEN	113
5. The Control of Diolefins Selective Polymerization. Ph. TEYSSIE, A. DEVAUX, P. HADJIANDREOU, M. JULEMONT, J. M. THOMASSIN, E. WALCKIERS and R. WARIN	131
6. Stereochemistry of the Metathesis Reaction of Olefins. H. HÖCKER	151
7. Stereoregulation of Homogeneous Free Radical, Cationic and Anionic Polymerization Reactions. R. W. LENZ	163
8. Coexistence of Active Species in Anionic Polymerization of Ethyl Methacrylate. K. HATADA, T. KITAYAMA, H. SUGINO, M. FUROMOTO and H. YUKI	185
9. Ion Pair Effects on the Anionic Oligomerization. Stereochemistry of Vinyl Pyridines and Related Monomers. W. L. JENKINS, R. A. SMITH, C. F. TIEN and T. E. HOGEN-ESCH	191

10.Auto- and Induced Stereoregulation of Polyisocyanides. F.MILLICH	195
11.Present Understanding of the Stereospecific Polymerization of Cyclic Monomers:Three-Member Rings. N.SPASSKY,A.MOMTAZ and M.SEPULCHRE	201
12.Present Understanding of the Stereospecific Polymerization of Cyclic Monomers:Large Rings. J.KOPS	225
13.Stereoregular Polymers from Substituted β -Lactones and β -Lactams. R.W.LENZ	243
II.CHARACTERIZATION AND PROPERTIES OF STEREOREGULAR POLYMERS	
14.Physical and Mechanical Properties of Optically Active and Racemic Poly(α -Methyl- α -n-Propyl- β -Propiolactone). R.E.PRUD'HOMME and J.NOAH	259
15.NMR Analysis of Stereoregular Homopolymers. H.J. HARWOOD	263
16.NMR Analysis of Stereoregular Copolymers. H.J. HARWOOD	295
17.Present Status of the Configurational and Conformational Analysis of Stereoregular Polymers P.CORRADINI,G.GUERRA and B.PIROZZI	317
18.Application of Chiroptical Properties to Conformational Analysis of Stereoregular Polymers. F.CIARDELLI,C.CARLINI,E.CHIELLINI,P.SALVADORI, L.LARDICCI,R.MENICAGLI and C.BERTUCCI	353
19.Recent Developments of Vibrational Spectroscopy of Polymers: Dynamics and Spectra of Disordered Polymers. G.ZERBI	369
20.The Crystalline Structure of Addition Polymers. Recent Research Results. P.CORRADINI,G.GUERRA and B.PIROZZI	387
21.New Insights and Unsolved Problems in the Crystalline Structure of Polyesters. F.BRISSE,R.H. MARCHESSAULT and S.PEREZ	407
22.Present Understanding of the Viscoelastic and Mechanical Properties of Stereoregular Polymers. W.J.MACKNIGHT	431

TABLE OF CONTENTS

vii

23. Effect of Stereoregularity on Bulk Properties
of Polymers. F.E.KARASZ
