

CONTENTS

I. UV DEGRADATION AND STABILIZATION OF POLYMERS	
Recent Developments in Photodegradation and Photostabilization of Polydienes	1
J. F. Rabek	
Advances in UV Stabilization of Polyethylene	17
F. L. Gugumus	
Hindered Amines as Antioxidants in UV Exposed Polymers	35
D. J. Carlson, K. H. Chan, J. P. Tovborg Jensen, D. M. Wiles and J. Durmis	
Effect of Various Additives on the Photodegradation of Polyurethanes	49
Z. Osawa, E. Tajima, T. Yanagisawa and K. Suzuki	
Photochemical Degradation and Biological Deface- ment of Polymers - I	61
P. D. Gabriele, J. R. Geib, J. S. Puglisi and W. J. Reid	
UV Stabilization of Instant Color Photographs	71
I. O. Salyer and A. M. Usmani	

Photochemical Grafting of Acrylated Azo Dyes on Polymeric Surfaces VI. Effect of 1,2 Diphenyl, 2,2-Dimethoxy, Ethanone as Photo- initiator of the Grafting of Some Acryloxy- Substituted of Aromatic Diazenes onto Poly- (propylene) and Poly(caprolactam) Fibers	83
I. R. Bellobono, S. Calgari and E. Selli	
II. OXIDATIVE DEGRADATION AND STABILIZATION	
Critical Phenomena in the Inhibited Oxidation of Polymers	95
Yu. A. Shlyapnikov	
Critical Temperature for Solubility of a Phenolic Antioxidant	103
V. J. Kuck	
An Automated, Multistation, Oxygen Uptake System	111
J. C. Wozny	
Recent Developments in Phosphorus Stabilizers	127
E. Lewis	
Thermooxidation and Stabilization of Urethane and (Urethane-urea) Block Copolymers	135
G. N. Mathur and J. E. Kresta	
III. STABILIZATION OF PVC	
Model Compounds Studies to Establish the Basic Mechanism for Tin Stabilizers in PVC	155
A. Guyot, A. Michel and T. V. Hoang	
Reactions of PVC with Organotin Stabilizers Under Controlled Conditions	171
G. Ayrey, S. Y. Hsu and R. C. Poller	
New Mercapto Esters as Intermediates for PVC Stabilizers	189
G. P. Mack	

IV. FLAME RETARDANCE AND SMOKE SUPPRESSION

The effects of Bromine and Antimony-Containing
Flame Retardants on the Burning
Characteristics of Polyethylene 203
Y.-L. Hsieh and K. Yeh

Molybdenum Smoke Suppressants in PVC 215
F. W. Moore, G. A. Tsigdinos and T. R. Weber

Mechanism of PVC Fire Retardance by Molybdenum
(VI) Oxide. Further Evidence in Favor
of the Lewis Acid Theory 237
W. H. Starnes, Jr., L. D. Wescott, Jr., W. D.
Reents, Jr., R. E. Cais, G. M. Villacorta,
I. M. Plitz and L. J. Anthony

V. PLASTICIZERS, FILLERS AND ADDITIVES

Diffusion of Additives and Plasticizers in PVC -
III. Diffusion of Three Phthalate
Plasticizers in PVC 249
P. J. F. Griffiths, K. G. Krikor and G. S. Park

Effect of Additives on Properties of Coating
Processes of Polyphenylquinoxalines 261
Lu Fengcai, Wang Beiging and Chang Jinbiao

Effect of Pigments on the Aging Characteristics
of Polyolefins 273
H. M. Gilroy and M. G. Chan

Dynamic Mechanical Investigations of Highly
Filled Polyethylene 289
R. Kosfeld, T. Uhlenbroich and F. H. J. Maurer

The Use of Titanate Coupling Agents for Improved
Properties and Aging of Plastic
Composites and Coatings 301
S. J. Monte and G. Sugerman

Compounding of Additives and Fillers 343
K. Eise

The Effect of Lubricants on the Extrusion
Characteristics of PVC 351
E. A. Collins, T. E. Fahey and A. J. Hopfinger

Precipitated Calcium Carbonates as Ultraviolet
Stabilizers and Impact Modifiers in
PVC Siding and Profiles 371
K. K. Mathur and D. B. Vanderheiden

Iron Compounds as Adhesion Promoters for Bitumen 391
J. Shim-ton, S. Varevorakul and
R. T. Woodhams

Index 403
